Table of Contents

WNS (Holdings) Limited is incorporating by reference the information and exhibits set forth in this Form 6-K into its registration statements on Form S-8 (File No. 333-136168), Form S-8 (File No. 333-157356), Form S-8 (File No. 333-176849) and Form F-3 (File No. 333-177250).

CONVENTIONS USED IN THIS REPORT

In this report, references to “US” are to the United States of America, its territories and its possessions. References to “UK” are to the United Kingdom. References to “India” are to the Republic of India. References to “\$” or “dollars” or “US dollars” are to the legal currency of the US and references to “₹” or “rupees” or “Indian rupees” are to the legal currency of India. References to “pound sterling” or “£” or “pence” are to the currency of the UK. References to the Euro are to the legal currency of the European Monetary Union. Our financial statements are prepared in US dollars. Until March 31, 2011, we prepared our financial statements in accordance with US generally accepted accounting principles (“US GAAP”), which is considered our Previous GAAP. With effect from April 1, 2011, we adopted the International Financial Reporting Standards and its interpretations (“IFRS”), as issued by International Accounting Standards Board (“IASB”). Our financial statements included in this report are prepared in accordance with IFRS, as issued by IASB, as in effect as at September 30, 2011. To the extent IASB issues any amendments or any new standards subsequent to September 30, 2011, there may be differences between IFRS applied to prepare the financial statements included in this report and those that will be applied in our annual financial statements for the year ending March 31, 2012.

The financial statements included in this report are our second IFRS condensed interim consolidated financial statements and IFRS 1, “*First-time Adoption of International Financial Reporting Standards*” has been applied. These unaudited condensed interim consolidated financial statements do not include all the information required for full audited annual consolidated financial statements and are prepared in accordance with IAS 34, “*Interim Financial Reporting*.” An explanation of how the transition to IFRS has affected our reported financial position and financial performance is provided in Note 2.w. to the unaudited condensed interim consolidated financial statements included in this report. Note 2.w. includes reconciliations of equity as at April 1, 2010, September 30, 2010 and March 31, 2011, and profit and comprehensive income for the three months and six months ended September 30, 2010 and for the year ended March 31, 2011. References to a particular “fiscal” year are to our fiscal year ended March 31 of that year. Any discrepancies in any table between totals and sums of the amounts listed are due to rounding.

In this report, unless otherwise specified or the context requires, the term “WNS” refers to WNS (Holdings) Limited, a public company incorporated under the laws of Jersey, Channel Islands, and the terms “our company,” “we,” “our” and “us” refer to WNS (Holdings) Limited and its subsidiaries.

We also refer in various places within this report to “revenue less repair payments,” which is a non-GAAP measure that is calculated as revenue less payments to automobile repair centers and more fully explained in “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” The presentation of this non-GAAP information is not meant to be considered in isolation or as a substitute for our financial results prepared in accordance with IFRS. Unless otherwise indicated, references to “GAAP” in this report are to IFRS, as issued by IASB.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains “forward-looking statements” that are based on our current expectations, assumptions, estimates and projections about our company and our industry. The forward-looking statements are subject to various risks and uncertainties. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as “anticipate,” “believe,” “estimate,” “expect,” “intend,” “will,” “project,” “seek,” “should” and similar expressions. Those statements include, among other things, the discussions of our business strategy and expectations concerning our market position, future operations, margins, profitability, liquidity and capital resources and the impact of our adoption of IFRS, as issued by IASB. We caution you that reliance on any forward-looking statement involves risks and uncertainties, and that although we believe that the assumptions on which our forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and, as a result, the forward-looking statements based on those assumptions could be materially incorrect. These risks and uncertainties include but are not limited to:

- worldwide economic and business conditions;
- political or economic instability in the jurisdictions where we have operations;
- regulatory, legislative and judicial developments;
- our ability to attract and retain clients;
- technological innovation;
- telecommunications or technology disruptions;

Table of Contents

- future regulatory actions and conditions in our operating areas;
- our dependence on a limited number of clients in a limited number of industries;
- our ability to expand our business or effectively manage growth;
- our ability to hire and retain enough sufficiently trained employees to support our operations;
- negative public reaction in the US or the UK to offshore outsourcing;
- increasing competition in the business process outsourcing industry;
- our ability to successfully grow our revenue, expand our service offerings and market share and achieve accretive benefits from our acquisition of Aviva Global Services Singapore Pte. Ltd., or Aviva Global (which we have renamed as WNS Customer Solutions (Singapore) Private Limited, or WNS Global Singapore following our acquisition) and our master services agreement with Aviva Global Services (Management Services) Private Limited, or AVIVA MS, as described below;
- our ability to successfully consummate strategic acquisitions; and
- volatility of our ADS price.

These and other factors are more fully discussed in our other filings with the Securities and Exchange Commission, or the SEC, including in “Risk Factors,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and elsewhere in our annual report on Form 20-F for our fiscal year ended March 31, 2011. In light of these and other uncertainties, you should not conclude that we will necessarily achieve any plans, objectives or projected financial results referred to in any of the forward-looking statements. Except as required by law, we do not undertake to release revisions of any of these forward-looking statements to reflect future events or circumstances.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

1. Company overview

WNS (Holdings) Limited (“WNS Holdings”), along with its subsidiaries (collectively, “the Company”), is a global business process outsourcing (“BPO”) company with client service offices in Australia, London (UK), New York (US), Singapore and delivery centers in Costa Rica, India, the Philippines, Romania, Sri Lanka, and the UK. The Company’s clients are primarily in the travel, banking, financial services, insurance, healthcare and utilities, retail and consumer product industries.

WNS Holdings is incorporated in Jersey, Channel Islands and maintains a registered office in Jersey at Queensway House, Hilgrove Street, St Helier, Jersey JE1 1ES.

These condensed interim consolidated financial statements were authorized for issue by the Board of Directors on October 18, 2011.

2. Summary of significant accounting policies

a. Basis of preparation

These condensed interim consolidated financial statements are covered by International Financial Reporting Standards (“IFRS”) 1, “*First-time Adoption of International Financial Reporting Standards*” (“IFRS 1”), as they are part of the period covered by the Company’s first IFRS financial statements for the fiscal year ending March 31, 2012 and are prepared in accordance with International Accounting Standard (“IAS”) 34, “*Interim Financial Reporting*”. They do not include all of the information required in annual financial statements in accordance with IFRS.

The condensed interim consolidated statement of financial position corresponds to the classification provisions contained in IAS 1 (revised), “*Presentation of Financial Statements*”. For clarity, various items are aggregated in the statements of income and statements of financial position. These items are disaggregated separately in the Notes, where applicable.

The Company has adopted IFRS and the adoption was carried out in accordance with IFRS 1. The transition was carried out from accounting principles generally accepted in the United States of America (“US GAAP”) which is considered as the Previous GAAP. An explanation of the effect of the transition from Previous GAAP to IFRS on the Company’s equity and profit and comprehensive income is provided in note 2.w.

Accounting policies have been applied consistently to all periods presented in the consolidated financial statements including the preparation of the IFRS opening statement of financial position as at April 1, 2010 (“Transition Date”) for the purpose of the transition to IFRS and as required by IFRS 1.

b. Basis of measurement

The condensed interim consolidated financial statements have been prepared on a historical cost convention and on an accrual basis, except for the following material items that have been measured at fair value as required by relevant IFRS:-

- a. Derivative financial instruments; and
- b. Share based payment transactions.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

c. Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future period affected. In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amount recognized in the condensed interim consolidated financial statements is included in the following notes:

i. Revenue recognition:

The Company has, in limited instances, minimum commitment arrangements, wherein the service contracts provide for a minimum revenue commitment on a cumulative basis over multiple years, stated in terms of annual minimum amounts. However, when the shortfall in a particular year can be offset with revenue received in excess of minimum commitments in subsequent years, the Company recognizes deferred revenue for the shortfall which has been invoiced and received. To the extent the Company has sufficient experience to conclude that the shortfall will not be satisfied by excess revenue in a subsequent period, the deferred revenue will be recognized as revenue in that period.

Key factors that are used to determine whether the Company has sufficient experience include:

- the historical volume of business done with a client as compared with initial projections of volume as agreed to by the client and the Company;
- the length of time for which the Company has such historical experience;
- future volume expected based on projections received from the client; and
- the Company's internal expectations of the ongoing volume with the client.

Otherwise the deferred revenue will remain until such time the Company concludes that it will not receive revenue in excess of the minimum commitment.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

For certain agreements, the Company has retroactive discounts related to meeting agreed volumes. In such situations, the Company records revenue at the discounted rate, although the Company initially bill at the higher rate, unless the Company can determine that the agreed volumes will not be met, based on the factors discussed above.

The Company provides automobile claims handling services, wherein the Company enters into contracts with its clients to process all their claims over the contract period, where the fees are determined either on a per claim basis or is a fixed payment for the contract period. Where the contracts are on a per claim basis, the Company invoices the client at the inception of the claim process. The Company estimates the processing period for the claims and recognizes revenue over the estimated processing period. This processing period generally ranges between one to two months. The processing time may be greater for new clients and the estimated service period is adjusted accordingly. The processing period is estimated based on historical experience and other relevant factors, if any.

ii. Allowance for doubtful accounts:

The allowance for doubtful accounts is evaluated on a regular basis and adjusted based upon management's best estimate of probable losses inherent in accounts receivable. In estimating probable losses, the Company reviews accounts that are past due, non-performing or in bankruptcy. The Company determines an estimated loss for specific accounts and estimates an additional amount for the remainder of receivables based on historical trends and other factors. Adverse economic conditions or other factors that might cause deterioration of the financial health of customers could change the timing and levels of payments received and necessitate a change in estimated losses.

iii. Current income taxes:

The major tax jurisdictions for the Company are India, United Kingdom and the United States of America, though the Company also files tax returns in other foreign jurisdictions. Significant judgments are involved in determining the provision for income taxes including judgment on whether tax positions are probable of being sustained in tax assessments. A tax assessment can involve complex issues, which can only be resolved over extended time periods. The recognition of taxes that are subject to certain legal or economic limits or uncertainties is assessed individually by management based on the specific facts and circumstances.

iv. Deferred income taxes:

The assessment of the probability of future taxable profit in which deferred tax assets can be utilized is based on the Company's latest approved budget forecast, which is adjusted for significant non-taxable profit and expenses and specific limits to the use of any unused tax loss or credit. The tax rules in the numerous jurisdictions in which the Company operates are also carefully taken into consideration. If a positive forecast of taxable profit indicates the probable use of a deferred tax asset, especially when it can be utilized without a time limit, that deferred tax asset is usually recognized in full. The recognition of deferred tax assets that are subject to certain legal or economic limits or uncertainties is assessed individually by management based on the specific facts and circumstances.

v. Impairment:

An impairment loss is recognized for the amount by which an asset's or cash-generating unit's carrying amount exceeds its recoverable amount. To determine the recoverable amount, management estimates expected future cash flows from each asset or cash-generating unit and determines a suitable interest rate in order to calculate the present value of those cash flows. In the process of measuring expected future cash flows management makes assumptions about future operating results. These assumptions relate to future events and circumstances. The actual results may vary, and may cause significant adjustments to the Company's assets within the next financial year.

In most cases, determining the applicable discount rate involves estimating the appropriate adjustment to market risk and the appropriate adjustment to asset-specific risk factors.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

vi. Valuation of derivative financial instrument:

Management uses valuation techniques in measuring the fair value of financial instruments, where active market quotes are not available. In applying the valuation techniques, management makes maximum use of market inputs, and uses estimates and assumptions that are, as far as possible, consistent with observable data that market participants would use in pricing the instrument. Where applicable data is not observable, management uses its best estimate about the assumptions that market participants would make. These estimates may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date.

vii. Accounting for defined benefit plans:

In accounting for pension and post-retirement benefits, several statistical and other factors that attempt to anticipate future events are used to calculate plan expenses and liabilities. These factors include expected return on plan assets, discount rate assumptions and rate of future compensation increases. To estimate these factors, actuarial consultants also use estimates such as withdrawal, turnover, and mortality rates which require significant judgment. The actuarial assumptions used by the Company may differ materially from actual results in future periods due to changing market and economic conditions, regulatory events, judicial rulings, higher or lower withdrawal rates, or longer or shorter participant life spans.

viii. Share-based compensation:

The share based compensation expense is determined based on the Company's estimate of equity instruments that will eventually vest.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

d. Basis of consolidation

The Company consolidates entities over which it owns or controls. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that are currently exercisable are taken into account. Subsidiaries are consolidated from the date control commences until the date control ceases.

i. Business Combinations

Business combinations consummated subsequent to the Transition Date are accounted for using the acquisition method under the provisions of IFRS 3 (Revised), "*Business Combinations*".

The cost of an acquisition is measured at the fair value of the assets transferred, equity instruments issued and liabilities incurred or assumed at the date of acquisition. The cost of acquisition also includes the fair value of any contingent consideration. Identifiable tangible and intangible assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair value on the date of acquisition. Significant estimates are required to be made in determining the value of contingent consideration and intangible assets. These valuations are conducted by independent valuation experts.

Transaction costs that the Company incurs in connection with a business combination such as finders' fees, legal fees, due diligence fees, and other professional and consulting fees are expensed as incurred.

ii. Transactions with noncontrolling interest

The joint venture between the Company and Paxys Inc. Philippines ("Paxys") in the Philippines is majority owned by the Company (65%) and the balance by Paxys. Pursuant to the joint venture agreement, the Company has a call option to acquire from Paxys the remaining shares owned by Paxys and Paxys has a put option to sell all of its shareholding in the joint venture to the Company, upon the occurrence of certain conditions, as set forth in the joint venture agreement, or after August 6, 2012.

In accordance with IAS 32, "*Financial Instruments: Presentation*", the Company has derecognized noncontrolling interest since the Company had the risk and rewards for the ownership of the joint venture. However, with the existence of the put option, the Company has a contractual obligation to deliver cash and hence the put option has been classified as a financial liability. The Company's Board of Directors, in its meeting held in September 2011, has determined that its call option has become exercisable as a result of the non-performance event triggered in the prior quarter on account of the joint venture making six months of continuous losses for the period from January 2011 to June 2011, and approved the exercise of the call option. Accordingly, the Company has shared its intention to exercise the call option with Paxys. As of September 30, 2011, the Company has not yet exercised its call option but has assessed that the event of the Company exercising the call option is highly probable as against Paxys exercising their put option and since the Company anticipates that there will be an outflow of cash in connection with the exercise of the call option in the near future, the liability is re-measured at the fair value of the call option as at September 30, 2011.

iii. Transactions eliminated on consolidation

All intra-company balances, transactions, income and expenses including unrealized income or expenses are eliminated in full on consolidation.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

e. Functional and presentation currency

The condensed interim consolidated financial statements of each of the Company's subsidiaries are measured using the currency of the primary economic environment in which these entities operate (i.e. the functional currency). The condensed interim consolidated financial statements are presented in US dollars (USD) which is the presentation currency of the Company and has been rounded off to the nearest thousands.

f. Foreign currency transactions and translation

i. Transactions in foreign currency

Transactions in foreign currency are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at the exchange rates prevailing at reporting date of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of income. Gains/losses relating to translation or settlement of trading activities are disclosed under foreign exchange gains/losses and translation or settlements of financing activities are disclosed under finance expenses.

ii. Foreign operations

For the purpose of presenting condensed interim consolidated financial statements, the assets and liabilities of the Company's foreign operations that have local functional currency are translated into US dollars using exchange rates prevailing at the reporting date. Income and expense are translated at the average exchange rates for the period. Exchange differences arising, if any, are recorded in equity as part of the Company's other comprehensive income. Such exchange differences are recognized in the statement of income in the period in which such foreign operations are disposed. Goodwill and fair value adjustments arising on the acquisition of foreign operation are treated as assets and liabilities of the foreign operation and translated at the exchange rate prevailing at the reporting date.

iii. Others

Foreign currency differences arising on the translation or settlement of a financial liability designated and effective as a hedge of a net investment in foreign operation are recognized directly in equity as part of the Company's other comprehensive income. The amount recognized in equity is transferred to the statement of income, as an adjustment to the profit or loss upon disposal of the related foreign operation.

g. Financial instruments — initial recognition and subsequent measurement

Financial instruments are classified in the following categories:

- Non-derivative financial assets comprising loans and receivables and available-for-sale.
- Non-derivative financial liabilities comprising long term and short term borrowings and trade and other payables.
- Derivative financial instruments under the category of financial assets or financial liabilities at fair value through profit or loss ("FVTPL") and fair value through other comprehensive income.

The classification of financial instruments depends on the purpose for which those were acquired. Management determines the classification of the Company's financial instruments at initial recognition.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011

(Amounts in thousands, except share and per share data)

i. Non-derivative financial assets

a) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are presented as current assets, except for those maturing later than 12 months after the balance sheet date which are presented as non-current assets. Loans and receivables are measured initially at fair value plus transaction costs and subsequently carried at amortized cost using the effective interest rate method, less any impairment loss or provisions for doubtful accounts. Loans and receivables are represented by trade receivables, net of allowances for impairment, unbilled revenue, cash and cash equivalents and other assets.

b) Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are either designated in this category or are not classified in any of the other categories. Available-for-sale financial assets are recognized initially at fair value plus transactions costs. Subsequent to initial recognition, these are measured at fair value and changes therein, other than impairment losses and foreign exchange gains and losses on available-for-sale monetary items, are recognized directly in other comprehensive income. When an investment is derecognized, the cumulative gain or loss in other comprehensive income is transferred to the statement of income. These are presented as current assets unless management intends to dispose of the assets after 12 months from the balance sheet date.

ii. Non derivative financial liabilities

All financial liabilities are recognized initially at fair value, except in the case of loans and borrowings which are recognized at fair value net of directly attributable transaction costs. The Company's financial liabilities include trade and other payables, bank overdrafts, loans and borrowings.

Trade and other payables maturing later than 12 months after the balance sheet date are presented as non-current liabilities.

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate method. Gains and losses are recognized in the statement of income when the liabilities are derecognized as well as through the effective interest rate method amortization process.

iii. Derivative financial instruments and hedge accounting

The Company is exposed to foreign currency fluctuations on foreign currency assets, liabilities, net investment in foreign operations and forecasted cash flows denominated in foreign currency. The Company limits the effect of foreign exchange rate fluctuation by following established risk management policies including the use of derivatives. The Company enters into derivative financial instruments where the counter party is a bank. The Company holds derivative financial instruments such as foreign exchange forward and option contracts and interest rate swaps to hedge certain foreign currency and interest rate exposures.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

Cash flow hedges

The Company recognizes derivative instruments as either assets or liabilities in the statement of financial position at fair value. Derivative instruments qualify for hedge accounting when the instrument is designated as a hedge; the hedged item is specifically identifiable and exposes the Company to risk; and it is expected that a change in fair value of the derivative instrument and an opposite change in the fair value of the hedged item will have a high degree of correlation.

For derivative instruments where hedge accounting is applied, the Company records the effective portion of derivative instruments that are designated as cash flow hedges in other comprehensive income (loss) in the statement comprehensive income, which is reclassified into earnings in the same period during which the hedged item affects earnings. The remaining gain or loss on the derivative instrument in excess of the cumulative change in the present value of future cash flows of the hedged item, if any (i.e., the ineffective portion) or hedge components excluded from the assessment of effectiveness, and changes in fair value of other derivative instruments not designated as qualifying hedges is recorded as gains / losses, net in the statement of income. Gains/losses on cash flow hedges on intercompany forecasted revenue transactions are recorded in foreign exchange gains/losses and cash flow hedge on interest rate swaps are recorded in finance expense. Cash flows from the derivative instruments are classified within cash flows from operating activities in the statement of cash flows.

iv. Offsetting of financial instruments

Financial assets and financial liabilities are offset against each other and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

v. Fair value of financial instruments

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations, without any deduction for transaction costs. For financial instruments not traded in an active market, the fair value is determined using appropriate valuation models. Where applicable, these models project future cash flows and discount the future amounts to a present value using market-based observable inputs including interest rate curves, credit risk, foreign exchange rates, and forward and spot prices for currencies.

vi. Impairment of financial assets

The Company assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset is considered impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset. Individually significant financial assets are tested for impairment on an individual basis. The remaining financial assets are assessed collectively in groups that share similar credit risk characteristics.

a) Loans and receivables

Impairment loss in respect of loans and receivables measured at amortized cost are calculated as the difference between their carrying amount, and the present value of the estimated future cash flows discounted at the original effective interest rate. Such impairment loss is recognized in the statement of income.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

b) Available-for-sale financial assets

Significant or prolonged decline in the fair value of the security below its cost and the disappearance of an active trading market for the security are objective evidence that the security is impaired. An impairment loss in respect of an available-for-sale financial asset is calculated by reference to its fair value. The cumulative loss that was recognized in the equity is transferred to the statement of income upon impairment.

h. Equity and share capital

i. Share capital and share premium

The Company has only one class of equity shares. The authorized share capital of the Company is 50,000,000 equity shares, par value \$0.16 (10 pence) per share. Par value of the equity share is recorded as the share capital and the amount received in excess of par value is classified as share premium. The credit corresponding to the share-based compensation and excess tax benefit related to the exercise of share options is recorded in share premium.

ii. Retained earnings

Retained earnings comprise the Company's undistributed earnings after taxes.

iii. Other components of equity

Other components of equity consist of the following:

Cash flow hedging reserve

Changes in fair value of derivative hedging instruments designated and effective as a cash flow hedge are recognized net of taxes.

Foreign currency translation reserve

Foreign currency translation consists of the exchange difference arising from the translation of financial statement of foreign subsidiaries.

Pension adjustments

This reserve represents cumulative actuarial gain and losses recognized on defined benefits plans.

i. Bank deposits and marketable securities

Bank deposits consist of term deposits with an original maturity of more than three months. The Company's marketable securities represent highly liquid investments and are acquired principally for the purpose of generating a profit from short-term fluctuation in prices. All purchases and sales of such investments are recognized on the trade date. Investments are initially measured at cost, which is the fair value of the consideration paid, including transaction costs. All marketable securities are classified and accounted as trading investments and accordingly, reported at fair value, with changes in fair value recognized in the consolidated statement of income. Interest and dividend income is recognized when earned.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

j. Funds held for clients

Some of the Company's agreements in the Auto Claims handling services allow the Company to temporarily hold funds on behalf of the client. The funds are segregated from the Company's funds and there is usually a short period of time between when the Company receives these funds from the client and when the payments are made on their behalf.

k. Property and equipment

Property and equipment are stated at historical cost, except for certain items of furniture, fixture and office equipment and leasehold improvements for which fair value as of the Transition Date is taken as its deemed cost (see note 2 v. a) ii.), and depreciation and amortization is computed using the straight-line method over the estimated useful lives of the assets, which are as follows:

Asset description	Asset life (in years)
Buildings	20
Computers and software	3-4
Furniture, fixtures and office equipment	2-5
Vehicles	3
Leasehold improvements	Lesser of estimated useful life or lease term

Assets acquired under finance leases are capitalized as assets by the Company at the lower of the fair value of the leased property or the present value of the related lease payments or where applicable, the estimated fair value of such assets. Assets under finance leases and leasehold improvements are depreciated over the shorter of the lease term or the estimated useful life of the assets. Where the fair valuation of an asset on the Transition Date is taken as the deemed cost, the depreciation is calculated over its estimated remaining useful life.

Advances paid towards the acquisition of property and equipment and the cost of property and equipment not put to use before the balance sheet date are disclosed under the caption capital work-in-progress.

Property and equipment are reviewed for impairment, if indicators of impairment arise. The evaluation of impairment is based upon a comparison of the carrying amount of the property and equipment to the estimated future undiscounted net cash flows expected to be generated by the property and equipment. If estimated future undiscounted cash flows are less than the carrying amount of the property and equipment, the asset is considered impaired. The impairment expense is determined by comparing the estimated fair value of the property and equipment to its carrying value, with any shortfall from fair value recognized as an expense in the current period. The fair value is determined based on valuation techniques such as discounted cash flows or comparison to fair values of similar assets.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

l. Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the Company's share of the net identifiable assets of the acquired subsidiary at the date of acquisition. Goodwill is allocated to the cash-generating units expected to benefit from the synergies of the combination for the purpose of impairment testing. Goodwill is tested, at the cash-generating unit (or group of cash generating units) level, for impairment annually or if events or changes in circumstances indicate that the carrying amount may not be recoverable. Goodwill is carried at cost less accumulated impairment losses. Impairment loss on goodwill is not reversed. See further, discussion on impairment testing under "Impairment of intangible assets and goodwill" below.

m. Intangible assets

Intangible assets are recognized only when it is probable that the expected future economic benefits attributable to the assets will accrue to the Company and the cost can be reliably measured. Intangible assets acquired in a business combination are recorded at fair value using generally accepted valuation methods appropriate for the type of intangible asset. Intangible assets with definite lives are amortized over the estimated useful lives and are reviewed for impairment, if indicators of impairment arise. See further, discussion on impairment testing under "Impairment of intangible assets and goodwill" below.

The Company's definite lived intangible assets are amortized over the estimated useful life of the assets:

Asset description	Weighted average amortization period (in months)
Customer contracts	100
Customer relationship	90
Intellectual property rights	36
Leasehold benefits	48
Covenant not-to-compete	48

n. Impairment of intangible assets and goodwill

Goodwill is not subject to amortization and tested annually for impairment and whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Intangible assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the cash generating unit level which is the lowest level for which there are separately identifiable cash flows. Impairment losses recognized in respect of cash generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash generating units (or group of cash generating units) and then, to reduce the carrying amount of the other assets in the cash generating unit (or group of cash generating units) on a pro rata basis. Intangible assets that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

o. Employee benefits

i. Defined contribution plans

US Savings Plan

Eligible employees of the Company in the United States participate in a savings plan (“the Plan”) under Section 401(k) of the United States Internal Revenue Code (“the Code”). The Plan allows for employees to defer a portion of their annual earnings on a pre-tax basis through voluntary contributions to the Plan. The Plan provides that the Company can make optional contributions up to the maximum allowable limit under the Code.

UK Pension Scheme

Eligible employees in the UK contribute to a defined contribution pension scheme operated in the UK. The assets of the scheme are held separately in an independently administered fund. The pension expense represents contributions payable to the fund maintained by the Company.

Provident Fund

Eligible employees of the Company in India, the Philippines, Sri Lanka and United Kingdom participate in a defined contribution fund in accordance with the regulatory requirements in the respective jurisdictions. Both the employee and the Company contribute an equal amount to the fund which is equal to a specified percentage of the employee’s salary.

The Company has no further obligation under defined contribution plans beyond the contributions made under these plans. Contributions are charged to income in the year in which they accrue and are included in the consolidated statement of income.

ii. Defined benefit plan

Employees in India, the Philippines and Sri Lanka are entitled to a defined benefit retirement plan covering eligible employees of the Company. The plan provides for a lump-sum payment to eligible employees, at retirement, death, and incapacitation or on termination of employment, of an amount based on the respective employees’ salary and tenure of employment (subject to a maximum of approximately \$20 per employee in India). In India contributions are made to funds administered and managed by the Life Insurance Corporation of India and AVIVA Life Insurance Company Private Limited (together, the “Fund Administrators”) to fund the gratuity liability of an Indian subsidiary. Under this scheme, the obligation to pay gratuity remains with the Company, although the Fund Administrators administer the scheme. The Company’s Sri Lanka subsidiary, Philippines subsidiary and one Indian subsidiary have unfunded gratuity obligations.

Gratuity liabilities are determined by actuarial valuation, performed by an independent actuary, at each balance sheet date using the projected unit credit method. The Company recognizes the net obligation of a defined benefit plan in its balance sheet as an asset or liability, respectively, in accordance with IAS 19, “*Employee Benefits*”. The discount rate is based on the Government securities yield. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recorded in other comprehensive income in the statement of comprehensive income in the period in which they arise.

iii. Compensated absence

The Company’s liability for compensated absences is determined on an accrual basis for the entire unused vacation balance standing to the credit of each employee as at year-end and were charged to income in the year in which they accrue.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011

(Amounts in thousands, except share and per share data)

p. Share based payment

The Company accounts for share-based compensation expense relating to share-based payments using a fair-value method in accordance with IFRS 2, "*Share-based Payments*". Grants issued by the Company vest in graded manner. Under the fair value method, the estimated fair value of awards is charged to income over the requisite service period, which is generally the vesting period of the award, for each separately vesting portion of the award as if the award was, in substance, multiple awards. The Company includes a forfeiture estimate in the amount of compensation expense being recognized based on the Company's estimate of equity instruments that will eventually vest.

q. Provisions

A provision is recognized in the balance sheet when the Company has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are recognized at present value by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money.

Provisions for onerous contracts are recognized when the expected benefits to be derived by the Company from a contract are lower than the unavoidable costs of meeting the future obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognizes any impairment loss on the assets associated with that contract.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

r. Revenue recognition

The Company derives revenue from BPO services comprised of back office administration, data management, contact center management and auto claims handling services.

Revenue is recognized to the extent it is probable that the economic benefit will flow to the Company, the amount of revenue can be measured reliably, collection is probable, the cost incurred or to be incurred can be measured reliably. Revenue from rendering services is recognized on an accrual basis when services are performed.

Revenue earned by back office administration, data management and contact center management services

Depending on the terms of the arrangement, revenue from back office administration, data management and contact center management is recognized based on three pricing models — per full-time-equivalent; per transaction; or cost-plus — as follows:

- a) per full-time-equivalent arrangements typically involve billings based on the number of full-time employees (or equivalent) deployed on the execution of the business process outsourced;
- b) per transaction arrangements typically involve billings based on the number of transactions processed (such as the number of e-mail responses, or airline coupons or insurance claims processed); and
- c) cost-plus arrangements typically involve billing the contractually agreed direct and indirect costs and a fee based on the number of employees deployed under the arrangement.

Amounts billed or payments received, where revenue recognition criteria have not been met, are recorded as deferred revenue and are recognized as revenue when all the recognition criteria have been met. However, the costs related to the performance of BPO services unrelated to transition services (see discussion below) are recognized in the period in which the services are rendered. An upfront payment received towards future services is recognized ratably over the period when such services are provided.

The Company has certain minimum commitment arrangements that provide for a minimum revenue commitment on an annual basis or a cumulative basis over multiple years, stated in terms of annual minimum amounts. Where a minimum commitment is specific to an annual period, any revenue shortfall is invoiced and recognized at the end of this period. When the shortfall in a particular year can be offset with revenue received in excess of minimum commitments in a subsequent year, the Company recognizes deferred revenue for the shortfall which has been invoiced and received. To the extent the Company has sufficient experience to conclude that the shortfall will not be satisfied by excess revenue in a subsequent period, the deferred revenue will be recorded as revenue in that period. In order to determine whether the Company has sufficient experience, the Company considers several factors which include (i) the historical volume of business done with a client as compared with initial projections of volume as agreed to by the client and the Company, (ii) the length of time for which the Company has such historical experience, (iii) future volume expected based on projections received from the client, and (iv) the Company's internal expectations of ongoing volume with the client. Otherwise, the deferred revenue will remain until such time when the Company can conclude that it will not receive revenue in excess of the minimum commitment.

For certain BPO customers, the Company performs transition activities at the outset of entering into a new contract. The Company has determined these transition activities do not meet the criteria using the guidance in IAS 18 "Revenue" ("IAS 18"), to be accounted for as a separate unit of accounting with stand-alone value separate from the ongoing BPO contract. Accordingly, transition revenue and costs are subsequently recognized ratably over the period in which the BPO services are performed. Further, the deferral of costs is limited to the amount of the deferred revenue. Any costs in excess of the deferred transition revenue are recognized in the period incurred.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

Revenue earned by auto claims handling services

Auto claims handling services include claims handling and administration (“Claims Handling”), car hire and arranging for repairs with repair centers across the United Kingdom and the related payment processing for such repairs (“Accident Management”). With respect to Claims Handling, the Company receives either a per-claim fee or a fixed fee. Revenue for per claim fee is recognized over the estimated processing period of the claim, which currently ranges from one to two months and revenue for fixed fee is recognized on a straight line basis over the period of the contract. In certain cases, the fee is contingent upon the successful recovery of a claim on behalf of the customer. In these circumstances, the revenue is deferred until the contingency is resolved. Revenue in respect of car hire is recognized over the car hire term.

In order to provide Accident Management services, the Company arranges for the repair through a network of repair centers. The repair costs are invoiced to customers. In determining whether the receipt from the customers related to payments to repair centers should be recognized as revenue, the Company considers the criteria established by IAS 18, Illustrative example (“IE”) 21 — “*Determining whether an entity is acting as a principal or as an agent*”. When the Company determines that it is the principal in providing Accident Management services, amounts received from customers are recognized and presented as third party revenue and the payments to repair centers are recognized as cost of revenue in the consolidated statement of income. Factors considered in determining whether the Company is the principal in the transaction include whether

- a) the Company has the primary responsibility of providing the services,
- b) the Company negotiates labor rates with repair centers,
- c) the Company is responsible for timely and satisfactory completion of repairs, and
- d) the Company bears the risk that the customer may not pay for the services provided (credit risk).

If there are circumstances where the above criteria are not met and therefore the Company is not the principal in providing Accident Management services, amounts received from customers are recognized and presented net of payments to repair centers in the consolidated statement of income. Revenue from Accident Management services is recorded net of the repairer referral fees passed on to customers.

s. Leases

The Company leases most of its delivery centers and office facilities under operating lease agreements that are renewable on a periodic basis at the option of the lessor and the lessee. The lease agreements contain rent free periods and rent escalation clauses. Rental expenses for operating leases with step rents are recognized on a straight-line basis over the lease term. When a lease agreement undergoes a substantial modification of the existing terms, it would be accounted as a new lease agreement with the resultant deferred rent liability credited to the statement of income.

Leases under which the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. When acquired, such assets are capitalized at fair value or present value of the minimum lease payments at the inception of the lease, whichever is lower.

t. Income taxes

Income tax comprises current and deferred tax. Income tax expense is recognized in statements of income except to the extent it relates to items directly recognized in equity, in which case it is recognized in equity.

i. Current income tax

Current income tax for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the taxable profit for the period. The tax rates and tax laws used to compute the amount are those that are enacted by the reporting date and applicable for the period. The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and liability simultaneously.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

ii. Deferred income tax

Deferred income tax is recognized using the balance sheet approach. Deferred income tax assets and liabilities are recognized for all deductible temporary differences arising between the tax bases of assets and liabilities and their carrying amount in financial statements, except when the deferred income tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profits or loss at the time of transaction.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred income tax asset in respect of carry forward of unused tax credits and unused tax losses are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized.

u. Earnings per share

Basic earnings per share is computed using the weighted-average number of ordinary shares outstanding during the period. Diluted earnings per share is computed by considering the impact of the potential issuance of ordinary shares, using the treasury stock method, on the weighted average number of shares outstanding during the period, using the treasury share method for options, except where the results would be anti-dilutive.

v. Transition to IFRS

The Company's consolidated financial statements for the year ending March 31, 2012 will be the first annual consolidated financial statements prepared in compliance with IFRS. Accordingly all interim financial statements during the year ending March 31, 2012 would be prepared in accordance with principles of IFRS.

The adoption of IFRS was carried out in accordance with IFRS 1, using April 1, 2010 as the Transition Date. IFRS 1 requires that all IFRS standards and interpretations that are effective for the first IFRS consolidated financial statements for the year ending March 31, 2012, be applied consistently and retrospectively for all fiscal years presented.

Until the adoption of IFRS, the financial statements included in the Company's annual reports on Form 20-F and reports on Form 6-K were prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP), which is considered as the Previous GAAP.

All applicable IFRS have been applied consistently and retrospectively wherever required. The resulting difference between the carrying amounts of the assets and liabilities in the consolidated financial statements under IFRS and Previous GAAP as of the Transition Date are recognized directly in equity at the Transition Date.

In preparing these consolidated financial statements, the Company has availed itself of certain exemptions and complied with exceptions in accordance with IFRS 1 as explained below:

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

a) Exemptions from retrospective application

The following are the optional exemptions available and elected by the Company:

- i. **Business combinations exemption** — The Company has applied the exemption as provided in IFRS 1 on non-application of IFRS 3 (Revised) to business combinations consummated prior to Transition Date, pursuant to which goodwill and other assets acquired under business combinations prior to Transition Date have been stated at the carrying amount as per Previous GAAP.
- ii. **Fair value as deemed cost exemption** — The Company has applied the exemption as provided in IFRS 1 and measured specific items of property and equipment, on a selective basis within certain classes of assets, at its fair value at the date of transition. The Company has chosen to fair value items of following classes of assets namely, furniture and fixtures, equipment and fittings, generators and leasehold improvements, as at the Transition Date. Consequent to this, the fair value as of Transition Date is taken as its deemed cost for all those assets within these classes of assets where the fair value was lower than the carrying value. Such impact has been taken to retained earnings. For all other assets within these classes of assets where the fair value was greater than the carrying value, those assets have not been restated and their Previous GAAP amount has been considered as cost under IFRS. For all other asset classes namely building, computers and software and vehicles, their Previous GAAP amount have been considered as cost under IFRS.
- iii. **Employee benefits exemption** — The Company has applied the exemption as provided in IFRS 1 relating to application of the corridor approach and to recognize all cumulative actuarial gains and losses up to the date of transition to retained earnings. Any actuarial gains and losses after Transition Date would be recognized in other comprehensive income.
- iv. **Fair value measurement of financial assets or liabilities at initial recognition** — The Company has not applied the amendment offered by the revision of IAS 39, “ *Financial Instruments: Recognition and Measurement* ”, on the initial recognition of the financial assets and financial liabilities that are not traded in an active market.

b) Exceptions from full retrospective application

The following are the exceptions from full retrospective application:

- i. **De-recognition of financial assets and liabilities exception** — The Company has chosen not to apply the IAS 39 de-recognition criteria to an earlier date. No arrangements were identified that had to be assessed under this exception.
- ii. **Hedge accounting exception** — The Company has followed hedge accounting under Previous GAAP which is aligned to IFRS. Accordingly, this exception of not reflecting in its opening IFRS statement of financial position a hedging relationship of a type that does not qualify for hedge accounting under IAS 39, is not applicable to the Company.
- iii. **Estimates exception** — Upon an assessment of the estimates made under Previous GAAP, the Company has concluded that there was no necessity to revise such estimates under IFRS, except where estimates were required by IFRS and not required by Previous GAAP.
- iv. **Noncontrolling Interest** — The Company does not have noncontrolling interests under IFRS. Hence this exception is not applicable to the Company.

(Amounts in thousands, except share and per share data)

w. Reconciliations

As required under IFRS 1, the Company has prepared the reconciliations of equity and profit and comprehensive income in accordance with IFRS 1 to provide a quantification of the effect of the transition to IFRS from previous GAAP;

- equity as at April 1, 2010;
- equity as at September 30, 2010;
- equity as at March 31, 2011;
- profit and comprehensive income for the three months ended September 30, 2010;
- profit and comprehensive income for the six months ended September 30, 2010; and
- profit and comprehensive income for the year ended March 31, 2011.

There is no material changes in cash flows statements, accordingly the reconciliation is not been presented.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

Notes:

- 1 Under IFRS, debt is a financial liability recognized initially at fair value adjusted for transaction costs that are directly attributable to the issue of the financial liability and measured subsequently at amortized cost. Accordingly, debt issue costs have been netted off against long term debt. Under Previous GAAP, such debt issue costs were recorded as deferred charges. Due to the netting off of debt issue cost with the carrying amount of long term debt, prepayment and other current assets and other non-current assets are lower by \$433 and \$342 and current portion and non-current portion of the long term debt are lower by \$433 and \$342, respectively.
- 2 The Company has applied the exemption as provided in IFRS 1 with respect to deemed cost and measured specific items of property and equipment, on a selective basis within certain classes of assets, at their fair values at the Transition Date. Consequent to this, the fair value as of the Transition Date is taken as their deemed cost for all those assets within these classes of assets where the fair value is lower than the carrying value. For all other assets within these classes of assets where the fair value is greater than the carrying value, those assets have been carried at their Previous GAAP amounts. As a result, property and equipment under IFRS is lower by \$3,153, with a corresponding impact to retained earnings.
- 3 Certain deferred tax credits (net) amounting to \$1,826 not recognized under Previous GAAP are now recognized under IFRS due to a difference in accounting treatment on account of:
 - a) accelerated amortization of share-based compensation expense in the initial years following the grant of share options amounting to a credit of \$1,408;
 - b) time value of purchased options amounting to a credit of \$720;
 - c) application of substantially enacted tax rates amounting to a credit of \$203; and
 - d) deferred tax debit amounting to \$505 on account of election of IFRS 1 exemption on the Transition Date relating to selective measurement of items of property and equipment at their fair value.

The above adjustments have an impact on retained earnings and other components of equity.

- 4 Under IFRS, any contingent consideration payable on the date of acquisition shall be recognized at the fair value on the acquisition date and shall be recognized as a liability. The transition guidance on IFRS 3 requires contingent consideration balances arising from previous business combinations to be accounted as cost of acquisition and adjusted to goodwill, which do not apply to a first time adopter of IFRS. However IFRS 1 states that only intangible assets and its' related deferred tax recognized under Previous GAAP that do not meet the recognition criteria under IFRS be adjusted against goodwill. Under IFRS, the Company has recognized \$471 of contingent consideration as liability and the corresponding impact to retained earnings. Under Previous GAAP, such earn out consideration was recorded as an addition to goodwill.
- 5 Under employee benefits in India, the defined benefit plan provides for a lump-sum payment to eligible employees at retirement, death and incapacitation or on termination of employment, of an amount based on the respective employees' salary and tenure of employment, subject to a maximum of approximately \$8 per employee. In March 2010, the Indian Union Cabinet gave its consent for enhancing the gratuity limit at the time of retirement from \$8 to \$22 per employee in India. The amendment was subsequently passed in the Parliament on May 2010. As a result of the law being substantially enacted on the Transition Date, the carrying value of employee benefits increased by \$255 with a corresponding impact to retained earnings. The impact of the above change was accounted in the first quarter of fiscal 2011 under Previous GAAP.

Under IFRS, the Company uses the projected unit credit method to determine the present value of defined benefit obligations using the market yields on Government bonds. Under Previous GAAP, the Company used a discount rate that reflects Government bond yield plus a spread for credit risk. As a result, the carrying value of employee benefits increased by \$156 with a corresponding impact to retained earnings.

The Company has applied the exemption as provided in IFRS 1 with respect to employee benefits and has elected to recognize all cumulative actuarial gains and losses up to the Transition Date. As a result, the Company has recognized \$454 in retained earnings under IFRS with a corresponding debit to other comprehensive income.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

- 6 Under IFRS, the noncontrolling interest is derecognized, since the Company believes that the risk and reward of ownership of the joint venture always vested with the Company.

Under IFRS, the put option in the joint venture agreement has been classified as a financial liability and valued based on the probability weighted assessment of possible outcomes of the various conditions for the put option. Further, the exercise of the put option is not under the control of the Company. Accordingly, under IFRS, a liability has been recorded based on the obligation existing as at the Transition Date based on the present value of the put option amounting to \$1,676.

Under Previous GAAP, redeemable noncontrolling interest was classified as temporary equity as the net settlement of the put option and call option is not possible and hence was not classified as a derivative. The Company recognized the changes in redemption value of the redeemable noncontrolling interest at the end of each reporting period.

As a result, under IFRS, the redemption value of redeemable noncontrolling interest of \$278 has been reclassified to other liabilities. Further, this liability was increased by \$1,398 to record the existing obligation as at the Transition Date with a corresponding debit to retained earnings of \$1,354 and a debit of \$44 to other components of equity.

- 7 The Company grants share options to its employees. These share options vest in a graded manner over the vesting period. Under IFRS, each tranche of vesting is treated as a separate award and the share-based compensation expense relating to that tranche is amortized over the vesting period of the underlying tranche. This results in accelerated amortization of share-based compensation expense in the initial years following the grant of share options.

Under Previous GAAP, an entity was allowed to recognize the share-based compensation expense, relating to share options which vest in a graded manner, on a straight-line basis over the requisite vesting period for the entire award. However, the amount of compensation cost recognized at any date must at least equal the portion of the grant-date value of the award that is vested at that date.

Accordingly, the share-based compensation expense recognized under IFRS is higher by \$2,150 as at the Transition Date in respect of the unvested awards.

- 8 Under the Indian tax laws, Fringe Benefit Tax (FBT) was imposed on all stock options exercised on or after April 1, 2007. Under this legislation, on exercise of an option or Restricted Share Unit (RSUs), employers were responsible for a tax equal to the intrinsic value at its vesting date multiplied by the applicable tax rate. The FBT was included as a component of the exercise price while computing the fair value of the grant. In August 2009, the Indian tax laws withdrew the levy of FBT with effect from April 1, 2009. Consequent to this change in legislation, no FBT were recovered for options and RSUs issued to Indian option holders, resulting in a reduction in the exercise price of the options and RSUs. Under Previous GAAP, the charge in FBT was treated as a modification.

Under IFRS, the levy of FBT is accounted as reimbursement under IAS 37, "*Provisions, Contingent Liabilities and Contingent Assets*". The grant date fair values of options and RSUs computed under Previous GAAP have been recomputed to remove the effect of FBT component included in the exercise price. As a result of the change in accounting treatment under IFRS, share-based compensation expense is higher by \$1,287 as on the Transition Date.

- 9 Under IFRS, the time value of the options are separated from the option value and recorded at fair value at each reporting period with the resultant gains or losses reported in the statement of income. Consequently under IFRS, the change in accounting treatment resulted in an increase to other components of equity by \$11,015 (net of tax) and a corresponding debit to retained earnings. Under Previous GAAP, for effective hedges the premium paid for purchased options were recorded in other components of equity.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

Notes:

- 1 Under IFRS, debt is a financial liability recognized initially at fair value adjusted for transaction costs that are directly attributable to the issue of the financial liability and measured subsequently at amortized cost. Accordingly, debt issue costs have been netted off against long term debt. Under Previous GAAP, such debt issue costs were recorded as deferred charges. Due to the netting off of debt issue cost with the carrying amount of long term debt, prepayment and other current assets and other non-current assets are lower by \$641 and \$290 and current portion and non-current portion of the long term debt are lower by \$641 and \$290 respectively.

Further, under Previous GAAP, in connection with the refinancing of the long term debt, the debt issue cost for the new loan pertaining to existing lenders continuing as new lenders were charged to the statement of income. Under IFRS, the same has been netted off against the long term debt. As a result, under IFRS, the long term debt is lower by \$320.

Under IFRS, lease deposits have been recorded at fair value, and the resultant difference between the fair value and carrying value is shown as prepaid rent. As a result, under IFRS, prepayment and other current assets have increased by \$47 and other non-current assets have reduced by \$47.

- 2 Under IFRS, contingent consideration relating to acquisitions is recognized if it is probable that such consideration would be paid and can be measured reliably. Under Previous GAAP, contingent consideration is recognized after the contingency is resolved and additional consideration becomes payable. As a result, under IFRS, the Company has recognized contingent consideration as additional liability and retained earnings on the Transition Date. Consequently, goodwill under IFRS is lower by \$490.

- 3 The Company has applied the exemption as provided in IFRS 1 with respect to deemed cost and measured specific item of property and equipment, on a selective basis within certain classes of assets, at its fair value at the Transition Date. Consequent to this, the fair value as of the Transition Date is taken as their deemed cost for all those assets within these classes of assets where the fair value is lower than the carrying value. For all other assets within these classes of assets where the fair value is greater than the carrying value, those assets have been carried at their Previous GAAP amounts. As a result, under IFRS, property and equipment is lower by \$2,225, with a corresponding impact to retained earnings.

- 4 Certain deferred tax credits (net) amounting to \$2,146 not recognized under Previous GAAP are now recognized under IFRS due to a difference in accounting treatment on account of:

- a) accelerated amortization of share-based compensation expense amounting to a credit of \$2,015;
- b) time value of purchased options amounting to a credit of \$597; and
- c) deferred tax debit amounting to \$466, due to a difference in accounting treatment on account of selective measurement of items of property and equipment at their fair value.

The above adjustment has an impact on retained earnings and other components of equity.

- 5 Under IFRS the Company uses the projected unit credit method to determine the present value of defined benefit obligations using the market yields on Government bonds. Under Previous GAAP, the Company used a discount rate that reflects Government bond yield plus a spread for credit risk. As a result, the carrying value of employee benefits increased by \$217 with a corresponding impact to retained earnings.

The Company has applied the exemption as provided in IFRS 1 with respect to employee benefits and has elected to recognize all cumulative actuarial gains and losses up to the Transition Date. As a result, under IFRS, the Company has recognized \$645 into retained earnings.

- 6 The Company grants share options to its employees. These share options vest in a graded manner over the vesting period. Under IFRS, each tranche of vesting is treated as a separate award and the share-based compensation expense relating to that tranche is amortized over the vesting period of the underlying tranche. This results in accelerated amortization of share-based compensation expense in the initial years following the grant of share options.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

Previous GAAP permits an entity to recognize the share-based compensation expense, relating to share options which vest in a graded manner, on a straight-line basis over the requisite vesting period for the entire award. However, the amount of compensation cost recognized at any date must at least equal the portion of the grant-date value of the award that is vested at that date. As a result of the change in accounting treatment under IFRS, share premium is higher by \$1,545 on account of higher share-based compensation expense.

- 7 Under the Indian tax laws, FBT was imposed on all stock options exercised on or after April 1, 2007. Under this legislation, on exercise of an option or RSUs, employers were responsible for a tax equal to the intrinsic value at its vesting date multiplied by the applicable tax rate. The FBT was included as a component of the exercise price while computing the fair value of the grant. In August 2009, the Indian tax laws withdrew the levy of FBT with effect from April 1, 2009. Consequent to this change in legislation, no FBT were recovered for options and RSUs issued to Indian option holders, resulting in a reduction in the exercise price of the options and RSUs. Under Previous GAAP, the change in FBT was treated as a modification

Under IFRS, the levy of FBT is accounted as reimbursement under IAS 37. The grant date fair values of options and RSUs computed under the Previous GAAP have been recomputed to remove the effect of FBT component included in the exercise price. As a result of the change in accounting treatment under IFRS, share premium is higher by \$1,027 on account of higher share-based compensation expense.

- 8 Under Previous GAAP, for effective hedges the premium paid for purchased options were recorded in other components of equity. Under IFRS, the time value of the options are separated from the option value and recorded at fair value at each reporting period with the resultant gains or losses reported in the statement of income. Consequently under IFRS, the change in accounting treatment resulted in an increase to other components of equity by \$10,494 (net of tax).
- 9 Under IFRS the redeemable noncontrolling interest has been derecognized, since the Company believes that the risks and rewards of the joint venture always vested with the Company.

Under IFRS, put option has been classified as a financial liability and valued based on the probability weighted assessment of possible outcomes of the various conditions for put option. Further, the exercise of the put option is not under the control of the Company. Accordingly, under IFRS, a liability has been recorded based on the obligation existing as at the Transition Date based on the present value of the put option.

Under Previous GAAP, redeemable noncontrolling interest was classified as temporary equity as the net settlement of the put option and call option is not possible and hence was not classified as a derivative. The Company recognized the changes in redemption value of the redeemable noncontrolling interest at the end of each reporting period. As a result, under IFRS, the share of losses on redeemable noncontrolling interest amounting to \$43 recorded in other components of equity has been transferred to retained earnings.

- 10 Under IFRS, the deferred tax asset on share-based compensation expense is adjusted based on the prevailing share price at each reporting date. Any fluctuation in share price will result in a change in deferred tax. At the time of exercise of options, any excess deferred tax created is recognized as a charge in the statement of income.

Under Previous GAAP, deferred tax asset on share-based compensation expense is calculated at the date of the grant of option. At the time of exercise of option, the shortfall is recorded as a debit to equity to the extent prior excess tax benefits exist.

As a result of the change in accounting treatment under IFRS, the Company has recognized \$659 of tax deficiency in statement of income with a corresponding credit to share premium.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

Notes:

- 1 Under IFRS, debt is a financial liability recognized initially at fair value adjusted for transaction costs that are directly attributable to the issue of the financial liability and measured subsequently at amortized cost. Accordingly, debt issue costs have been netted off against long term debt. Under Previous GAAP, such debt issue costs were recorded as deferred charges. Due to the netting off of debt issue cost with the carrying amount of long term debt, prepayment and other current assets and other non-current assets are lower by \$505 and \$90 and current portion and non-current portion of the long term debt are lower by \$505 and \$90, respectively.

Further, under Previous GAAP, in connection with the refinancing of the long term debt, the debt issue cost for the new loan pertaining to existing lenders continuing as new lenders were charged to the statement of income. Under IFRS, the same has been netted off against the long term debt. As a result, under IFRS, the long term debt is lower by \$219.

Under IFRS, lease deposits have been recorded at fair value, and the resultant difference between the fair value and carrying value is shown as prepaid rent. As a result, prepayment and other current assets have increased by \$273 and other non-current assets have reduced by \$283.

- 2 Under IFRS, contingent consideration relating to acquisitions is recognized if it is probable that such consideration would be paid and can be measured reliably. Under Previous GAAP, contingent consideration is recognized after the contingency is resolved and additional consideration becomes payable. As a result, under IFRS, the Company has recognized contingent consideration as additional liability and retained earnings on the Transition Date. Consequently, goodwill under IFRS is lower by \$503.
- 3 The Company has applied the exemption as provided in IFRS 1 with respect to deemed cost and measured specific items of property and equipment, on a selective basis within certain classes of assets, at their fair values at the Transition Date. Consequent to this, the fair value as of the Transition Date is taken as their deemed cost for all those assets within these classes of assets where the fair value was lower than the carrying value. For all other assets within these classes of assets where the fair value is greater than the carrying value, those assets have been carried at their Previous GAAP amounts. As a result, under IFRS, property and equipment is lower by \$1,414, with a corresponding impact to retained earnings.
- 4 Certain deferred tax credits (net) amounting to \$2,495 not recognized under Previous GAAP are now recognized under IFRS due to a difference in accounting treatment on account of:
- a) accelerated amortization of share-based compensation expense amounting to a credit of \$1,119;
 - b) time value of purchased options amounting to a credit of \$1,672;
 - c) application of substantially enacted tax rates amounting to \$198; and
 - d) deferred tax debit amounting to \$494 on account of the following:
 - i) \$426 on account of selective measurement of items of property and equipment at its fair value; and
 - ii) deferred tax created on employee benefits plan in India of \$68.

The above adjustment has an impact on retained earnings and other components of equity.

- 5 Under IFRS, the Company uses the projected unit credit method to determine the present value of defined benefit obligations using the market yields on Government bonds. Under Previous GAAP, the Company used a discount rate that reflects Government bond yield plus a spread for credit risk. As a result, the carrying value of employee benefits increased by \$393 with a corresponding impact to retained earnings.

The Company has applied the exemption as provided in IFRS 1 with respect to employee benefits and has elected to recognize all cumulative actuarial gains and losses up to the Transition Date. As a result, under IFRS, the Company has recognized \$425 into retained earnings.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

- 6 The Company grants share options to its employees. These share options vest in a graded manner over the vesting period. Under IFRS, each tranche of vesting is treated as a separate award and the share-based compensation expense relating to that tranche is amortized over the vesting period of the underlying tranche. This results in accelerated amortization of share-based compensation expense in the initial years following the grant of share options.

Previous GAAP permits an entity to recognize the share-based compensation expense, relating to share options which vest in a graded manner on a straight-line basis over the requisite vesting period for the entire award. However, the amount of compensation cost recognized at any date must at least equal the portion of the grant-date value of the award that is vested at that date. As a result of the change in accounting treatment under IFRS, share premium is higher by \$1,858 on account of higher share-based compensation expense.

- 7 Under the Indian tax laws, FBT was imposed on all stock options exercised on or after April 1, 2007. Under this legislation, on exercise of an option or RSUs, employers were responsible for a tax equal to the intrinsic value at its vesting date multiplied by the applicable tax rate. The FBT was included as a component of the exercise price while computing the fair value of the grant. In August 2009, Indian tax laws withdrew the levy of FBT with effect from April 1, 2009. Consequent to this change in legislation, no FBT were recovered for options and RSUs issued to Indian optionees, resulting in a reduction in the exercise price of the options and RSUs. Under Previous GAAP, FBT charge was treated as a modification.

Under IFRS, the levy of FBT is accounted as reimbursement under IAS 37. The grant date fair values of options and RSUs computed under the Previous GAAP have been recomputed to remove the effect of FBT component included in the exercise price. As a result of the change in accounting treatment under IFRS, share premium is higher by \$782 on account of higher share-based compensation expense.

- 8 Under Previous GAAP, for effective hedges the premium paid for purchased options were recorded in other components of equity. Under IFRS, the time value of the options are separated from the option value and recorded at fair value at each reporting period with the resultant gains or losses reported in the statement of income. Consequently under IFRS, the change in accounting treatment resulted in an increase to other components of equity by \$3,613 (net of tax).

- 9 Under IFRS the redeemable noncontrolling interest is derecognized, since the Company believes that the risks and rewards of the joint venture always vested with the Company.

Under IFRS, the put option in the joint venture agreement has been classified as a financial liability and valued based on the probability weighted assessment of possible outcomes of the various conditions for the put option. Further, the exercise of the put option is not under the control of the Company. Accordingly, under IFRS, a liability has been recorded based on the obligation existing as at the Transition Date based on the present value of the put option.

Under Previous GAAP, redeemable noncontrolling interest was classified as temporary equity as the net settlement of the put option and call option is not possible and hence was not classified as a derivative. The Company recognized the changes in redemption value of the redeemable noncontrolling interest at the end of each reporting period. As a result, under IFRS, the share of losses on redeemable noncontrolling interest amounting to \$53 recorded in other components of equity has been transferred to retained earnings.

- 10 Under IFRS, the deferred tax asset on share-based compensation expense is adjusted based on the prevailing share price at each reporting date. Any fluctuation in share price will result in a change in deferred tax. At the time of exercise of options, any excess deferred tax created is recognized as a charge in the statement of income.

Under Previous GAAP, deferred tax asset on share-based compensation expense is calculated at the date of the grant of option. At the time of exercise of option, the shortfall is recorded as a debit to equity to the extent prior excess tax benefits exist.

As a result of the change in accounting treatment under IFRS, the Company has recognized \$740 of tax deficiency in the statement of income with a corresponding credit to share premium.

NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

- 3 Under IFRS, the Company amortizes share-based compensation expense, relating to share options, which vest in a graded manner on an accelerated basis. Under Previous GAAP, share-based compensation expense is recorded on a straight-line basis. Accordingly, due to a change in expense recognition method under IFRS, the Company has recognized lower share-based compensation expense of \$183 in cost of revenue, \$46 in selling and marketing expenses and \$184 in general and administrative expenses.
- 4 Under IFRS, the Company has recorded at fair value lease deposits and the resultant difference between the amount paid and fair value is recognized as prepaid rent. As a result of fair valuation, under IFRS, the cost of revenue has increased by \$3 on account of the amortization of deferred rent cost on a straight line basis and recorded interest income of \$2 based on the effective interest rate method.
- 5 Under Previous GAAP, in connection with the refinancing of the long term debt, the debt issue cost for the new loan pertaining to existing lenders continuing as new lenders were charged to the statement of income. Under IFRS, the debt issue costs have been netted off against the long term debt and amortized to statement of income over the period of the loan. As a result, under IFRS, the expenses are higher on account of debt issue cost amortization by \$56.
- 6 Under Previous GAAP, for effective hedges, the premium paid for purchased options is recorded in other comprehensive income. Under IFRS, the time value of the options are separated from the option value and recorded at fair value at each reporting period and the resultant gains or losses are reported under the statement of income. As a result, under IFRS, the Company has recognized foreign exchange gains of \$305.
- Under Previous GAAP, in connection with the refinancing of the long term debt, the debt issuance cost for the new loan pertaining to existing lenders continuing as new lenders were charged to the statement of income. Under IFRS, the debt issue costs have been netted off against the long term debt. As a result, under IFRS, the Other (income) expense, net is lower by \$42.
- The Company recorded revaluation loss on account of payout made in respect of contingent consideration amounting to \$23.
- 7 Certain deferred tax credits (net) amounting to \$10 not recognized under Previous GAAP are now recognized under IFRS due to a difference in accounting treatment on account of:
- a) accelerated amortization of share-based compensation expense amounting to a credit of \$127;
 - b) time value of purchased options amounting to a credit of \$1;
 - c) tax deficiencies on exercise of options recognized in statement of income amounting to a debit of \$99; and
 - d) deferred tax debit amounting to \$19 on account of selective measurement of items of property and equipment at their fair value.
- 8 Under Previous GAAP, redeemable noncontrolling interest was classified as temporary equity as certain conditions of the put option and call option are not within the control of the Company. Under IFRS, the shares held by redeemable noncontrolling interest do not meet the conditions for being classified as equity since the Company has a contractual obligation to deliver cash and hence they have been classified as financial liability. As a result, under IFRS, the Company bears all the losses attributable to noncontrolling interest amounting to \$94.
- 9 Under IFRS, the Company has reclassified and presented foreign exchange gain as a separate line item under operating profits. Under Previous GAAP, these transactions were presented under Other (income) expenses, net. Similarly, under IFRS, the mark to market gain of \$435 on interest rate swap has been reclassified into finance expense from Other (income) expense, net.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011

(Amounts in thousands, except share and per share data)

- 10 Under Previous GAAP the Company recognizes actuarial gains and losses in other comprehensive income and subsequently, accumulated gains and losses over and above the 10% corridor are recognized, systematically over the expected working lives of the employees, as an expense component of net periodic benefit cost. Under IFRS, the Company has applied the exemption as provided in IFRS 1 with respect to employee benefits and has elected to recognize all cumulative actuarial gains and losses in other comprehensive income and subsequently not to recognize the same in statement of income. As a result, under IFRS, the other comprehensive income with respect to pension adjustment is lower by \$12.
- 11 Under Previous GAAP, for effective hedges the premium paid for purchased options were recorded in other components of equity. Under IFRS, the time value of the options are separated from the option value and recorded at fair value at each reporting period with the resultant gains or losses reported in the statement of income. As a result, under IFRS, the other comprehensive income with respect to cash flow hedges (net of tax) is lower by \$789.
- 12 Under IFRS, the shares held by redeemable noncontrolling interest do not meet the conditions for being classified as equity since the Company has a contractual obligation to deliver cash and hence they have been classified as financial liability.

Under Previous GAAP, redeemable noncontrolling interest was classified as temporary equity as certain conditions of the put option and call option are not within the control of the Company. The Company recognized the changes in redemption value of the redeemable noncontrolling interest at the end of each reporting period.

Under IFRS, the Company bears all the changes attributable to redeemable noncontrolling interest. Consequently, the other comprehensive income with respect to noncontrolling interest is lower by \$61.

Reconciliation of comprehensive income for the year ended March 31, 2011

	Relevant notes for adjustments	Amount as per Previous GAAP	Effect of transition to IFRS	Amount as per IFRS	Reclassific- ation	Amount as per IFRS
Profit		\$ 9,087	\$ 8,826	\$ 17,913	\$ —	\$ 17,913
Other comprehensive income for the period, net of taxes						
Pension adjustment	10	788	(91)	697	—	697
Changes in fair value of cash flow hedges	11	(4,707)	(7,265)	(11,972)	—	(11,972)
Foreign currency translation		7,544	(239)	7,305	—	7,305
Total other comprehensive income (loss), net of taxes		3,625	(7,595)	(3,970)		(3,970)
Less: Comprehensive income attributable to redeemable noncontrolling interest	12	(633)	633	—	—	—
Total comprehensive income		\$ 13,345	\$ 598	\$ 13,943	\$ —	\$ 13,943

Notes:

- Under IFRS, the Company has applied the exemption as provided in IFRS 1 with respect to deemed cost and measured specific items of property and equipment, on a selective basis within certain classes of assets, at their fair values at the Transition Date. Consequent to this, the fair value as of the Transition Date is taken as their deemed cost for all those classes of assets where the fair value is lower than the carrying value. As a result, under IFRS, the depreciation charge is lower by \$1,524 in cost of revenue, \$206 in selling and marketing expenses and \$12 in general and administrative expenses.
- Under IFRS, the Company uses the projected unit credit method to determine the present value of defined benefit obligations using the market yields on Government bonds. Under Previous GAAP, the Company used a discount rate that reflects Government bond yield plus a spread for credit risk. As a result of the change in discount rates, under IFRS, the employee benefit expense has reduced by \$49 in cost of revenue.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

- 3 Under IFRS, the Company amortizes share-based compensation expense, relating to share options which vest in a graded manner on an accelerated basis. Under Previous GAAP, share-based compensation expense is recorded on a straight-line basis. Accordingly, due to the change in expense recognition method under IFRS, the Company has recognized lower share-based compensation expense of \$286 in cost of revenue, \$127 in selling and marketing expenses and \$381 in general and administrative expenses.
- 4 Under IFRS, the Company has recorded at fair value lease deposits and the resultant difference between the amount paid and fair value is recognized as prepaid rent difference. As a result of the fair valuation, under IFRS, the cost of revenue has increased by \$33 on account of the amortization of deferred rent cost on a straight line basis and recorded interest income \$23 based on the effective interest rate method.
- 5 Under Previous GAAP, in connection with the refinancing of the long term debt, the debt issue cost for the new loan pertaining to existing lenders continuing as new lenders were charged to the statement of income. Under IFRS, the debt issue costs have been netted off against the long term debt and amortized to the statement of income over the period of the loan. As a result, under IFRS, the expenses are higher on account of debt issue cost amortization by \$200.
- 6 Under Previous GAAP, for effective hedges, the premium paid for purchased options is recorded in other comprehensive income. Under IFRS, the time value of the options are separated from the option value and recorded at fair value at each reporting period and the resultant gains or losses are reported under the statement of income. As a result, under IFRS, the Company has recognized foreign exchange gains of \$6,496.
- Under Previous GAAP, in connection with the refinancing of the long term debt, the debt issuance cost for the new loan pertaining to existing lenders continuing as new lenders were charged to the statement of income. Under IFRS, the debt issue cost has been netted off against the long term debt. As a result, under IFRS, the other (income) expenses are lower by \$418.
- The Company recorded revaluation loss on account of payout made in respect of contingent consideration amounting to \$23.
- 7 Certain deferred tax debit (net) amounting to \$440 not recognized under Previous GAAP are now recognized under IFRS due to a difference in accounting treatment on account of:
- a) tax deficiencies on exercise of options recognized in the statement of income amounting to a debit of \$738;
 - b) selective measurement of items of property and equipment at their fair value amounting to a debit of \$83;
 - c) time value of purchased option amounting to a debit of \$46;
 - d) accelerated amortization of share-based compensation expense amounting to a credit of \$132;
 - e) deferred tax asset created on employee benefits in India amounting to a credit of \$100; and
 - f) application of substantially enacted rate amounting to a credit of \$196.
- 8 Under Previous GAAP, redeemable noncontrolling interest was classified as temporary equity as certain conditions of the put option and call option are not within the control of the Company. Under IFRS, the shares held by redeemable noncontrolling interest do not meet the conditions for being classified as equity since the Company has a contractual obligation to deliver cash and hence they have been classified as financial liability. As a result, under IFRS, the Company bears all the losses attributable to noncontrolling interest amounting to \$730.
- 9 Under IFRS, the Company has reclassified and presented foreign exchange (gain)/losses as a separate line item under Operating Profits. Under Previous GAAP, these transactions were presented under Other (Income) Expenses, net. Similarly, under IFRS, the mark to market loss of \$3,228 on interest rate swap has been reclassified into finance expense from Other (income) expense.

SEPTEMBER 30, 2011

(Amounts in thousands, except share and per share data)

- 10 Under Previous GAAP the Company recognizes actuarial gains and losses in other comprehensive income and subsequently, accumulated gains and losses over and above the 10% corridor are recognized, systematically over the expected working lives of the employees, as an expense component of net periodic benefit cost. Under IFRS, the Company has applied the exemption as provided in IFRS 1 with respect to employee benefits and has elected to recognize all cumulative actuarial gains and losses in other comprehensive income and subsequently not to recognize the same in the statement of income. As a result, under IFRS, the other comprehensive income with respect to pension adjustment is lower by \$91.
- 11 Under Previous GAAP, for effective hedges the premium paid for purchased options were recorded in other components of equity. Under IFRS, the time value of the options are separated from the option value and recorded at fair value at each reporting period with the resultant gains or losses reported in the statement of income. As a result, under IFRS, the other comprehensive income with respect to cash flow hedges (net of tax) is lower by \$7,265.
- 12 Under IFRS, the shares held by redeemable noncontrolling interest do not meet the conditions for being classified as equity since the Company has a contractual obligation to deliver cash and hence they have been classified as financial liability.

Under Previous GAAP, redeemable noncontrolling interest was classified as temporary equity as certain conditions of the put option and call option are not within the control of the Company. The Company recognized the changes in redemption value of the redeemable noncontrolling interest at the end of each reporting period.

Under IFRS, the Company bears all the changes attributable to redeemable noncontrolling interest. Consequently, the other comprehensive income with respect to noncontrolling interest is higher by \$633.

3. New accounting pronouncements not yet adopted by the Company

Certain new standards, interpretations and amendments to existing standards have been published that are mandatory for the Company's accounting periods beginning on or after April 1, 2011 or later periods. Those which are considered to be relevant to the Company's operations are set out below.

- i. International Accounting Standards Board ("IASB") issued an amendment in IFRS 7 "*Financial Instruments: Disclosure*" ("IFRS 7") that requires additional quantitative and qualitative disclosures relating to transfers of financial assets effective for annual periods beginning on or after July 1, 2011 with earlier application permitted, where:
- financial assets are derecognized in their entirety, but where the entity has a continuing involvement in them (e.g., options or guarantees on the transferred assets); and
 - financial assets are not derecognized in their entirety.

The Company is evaluating the impact of additional disclosure requirement.

- ii. In November 2009, the IASB issued IFRS 9 "*Financial Instruments: Classification and Measurement*" ("IFRS 9"). This standard introduces certain new requirements for classifying and measuring financial assets and liabilities and divides all financial assets that are currently in the scope of IAS 39 into two classifications, viz. those measured at amortized cost and those measured at fair value. The standard has subsequently proposed expansion of IFRS 9 for classifying and measuring financial liabilities, de-recognition of financial instruments, impairment, and hedge accounting.

IFRS 9 is effective for fiscal years beginning on or after January 1, 2013. Earlier application is permitted. The Company is currently evaluating the impact that will have on its consolidated financial statements.

- iii. In May 2011, the IASB issued IFRS 13 "*Fair Value Measurements*" ("IFRS 13"). IFRS 13 defines fair value, provides single IFRS framework for measuring fair value; and requires disclosure about fair value measurements. IFRS 13 is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted. The Company is currently evaluating the impact that this new standard will have on its consolidated financial statements.
- iv. In May, 2011, the IASB issued IFRS 10 "*Consolidated Financial Statements*" ("IFRS 10") which replaces consolidation requirements in IAS 27 "*Consolidated and Separate Financial Statements*" and SIC-12 "*Consolidation — Special Purpose Entities*" and builds on existing principles by identifying the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements of the parent company. This pronouncement is effective for the annual period beginning on or after January 1, 2013 with earlier application permitted so long as each of this standard is applied together with other four standards as mentioned below;

IFRS 11 "*Joint Ventures*"

IFRS 12 "*Disclosures of Involvement with Other Entities*"

IAS 27 (Revised) "*Separate Financial Statements*"

IAS 28 (Revised) "*Investments in Associates and Joint Ventures*"

The remainder of IAS 27, '*Separate Financial Statements*', now contains accounting and disclosure requirements for investments in subsidiaries, joint ventures and associates only when an entity prepares separate financial statements and is therefore not applicable in the Company's consolidated financial statements.

IFRS 11 "*Joint Arrangements*" ("IFRS 11"), which replaces IAS 31, "*Interests in Joint Ventures*" and SIC-13, "*Jointly Controlled Entities — Non-monetary Contributions by Venturers*", requires a single method, known as the equity method, to account for interests in jointly controlled entities. The proportionate consolidation method in joint ventures is prohibited. IAS 28, '*Investments in Associates and Joint Ventures*', was amended as a consequence of the issuance of IFRS 11. In addition to prescribing the accounting for investment in associates, it now sets out the requirements for the application of the equity method when accounting for joint ventures. The application of the equity method has not changed as a result of this amendment.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011
(Amounts in thousands, except share and per share data)

IFRS 12 “*Disclosure of Interest in Other Entities*” is a new and comprehensive standard on disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, special purpose vehicles and other off balance sheet vehicles. The standard includes disclosure requirements for entities covered under IFRS 10 and IFRS 11.

The Company is currently evaluating the impact of above pronouncements on the Company’s consolidated financial statements.

- v. In June 2011, the IASB published amendments to IAS 1 “*Presentation of Financial Statements*” (“IAS 1”). The amendments to IAS 1 require companies preparing financial statements in accordance with IFRS to group items within other comprehensive income that may be reclassified to the profit or loss separately from those items which would not be recyclable in the profit or loss section of the statement of income. It also requires the tax associated with items presented before tax to be shown separately for each of the two groups of other comprehensive income items (without changing the option to present items of other comprehensive income either before tax or net of tax).

The amendments also reaffirm existing requirements that items in other comprehensive income and profit or loss should be presented as either a single statement or two consecutive statements. This amendment is applicable to annual periods beginning on or after 1 July 2012, with early adoption permitted. The Company is required to adopt IAS 1 (Amended) by accounting year commencing April 1, 2013. The Company has evaluated the requirements of IAS 1 (Amended) and the Company does not believe that the impacts of adoption of IAS 1 (Amended) will have a material effect on its consolidated financial statements.

- vi. In June 2011, the IASB issued an amended IAS 19 “*Employee Benefits*”. This amendment is applicable on a modified retrospective basis to annual periods beginning on or after January 1, 2013, with early adoption permitted. Apart from certain miscellaneous changes, key changes are:
- a. recognition of changes in the net defined liability(assets);
 - b. introduced enhanced disclosures about defined benefit plans; and
 - c. modified accounting for termination benefits.

The Company is currently evaluating the impact that will have on its consolidated financial statements.

4. Cash and cash equivalents

The Company considers all highly liquid investments with an initial maturity of up to three months to be cash equivalents. The components of cash and cash equivalents are as follows:

	As at		
	September 30, 2011	March 31, 2011	April 1, 2010
Cash and bank balance	\$ 14,390	\$ 21,631	\$ 25,320
Short term deposits with bank	1,744	5,459	6,991
Total	\$ 16,134	\$ 27,090	\$ 32,311

Short term deposits can be withdrawn by the Company at any time without prior notice and without any penalty on the principal.

5. Trade receivables

	As at		
	September 30, 2011	March 31, 2011	April 1, 2010
Trade receivables	\$ 60,551	\$ 82,427	\$ 47,234
Trade receivables from related parties	407	556	739
Allowances for doubtful account receivables	(5,007)	(4,397)	(3,152)
Total	\$ 55,951	\$ 78,586	\$ 44,821

The activity in the allowances for doubtful accounts receivables is given below:

	As at		
	September 30, 2011	March 31, 2011	April 1, 2010
Balance at the beginning of the period	\$ 4,397	\$ 3,152	\$ 1,935
Charged to operations	876	1,794	1,666

Fair value hierarchy

The following is the hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1 — quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 — other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.

Level 3 — techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

The assets and liabilities measured at fair value on a recurring basis are summarized below as on September 30, 2011:-

Description	September 30, 2011	Fair value measurement at reporting date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets				
<i>Financial assets at FVTPL</i>				
Foreign exchange contracts	\$ 544	\$ —	\$ 544	\$ —
<i>Financial assets at fair value through other comprehensive income</i>				
Foreign exchange contracts	7,215	—	7,215	—
Total assets	\$ 7,759	\$ —	\$ 7,759	\$ —
Liabilities				
<i>Financial liabilities at FVTPL</i>

Liabilities				
<i>Financial liabilities at FVTPL</i>				
Foreign exchange contracts	\$ 5,410	\$ —	\$ 5,410	\$ —
<i>Financial liabilities at fair value through other comprehensive income</i>				
Foreign exchange contracts	3,083	—	3,083	—
Interest rate swaps	1,901	—	1,901	—
Total liabilities	\$ 10,394	\$ —	\$ 10,394	\$ —

The fair value is estimated using the discounted cash flow approach and market rates of interest. The valuation technique involves assumption and judgments regarding risk characteristics of the instruments, discount rates, future cash flows and other factors. During the six months ended September 30, 2011 and year ended March 31, 2011, there were no transfers between Level 1 and Level 2 fair value measurements, and no transfers into and out of Level 3 fair value measurements.

SEPTEMBER 30, 2011

(Amounts in thousands, except share and per share data)

Derivative financial instruments

The primary risks managed by using derivative instruments are foreign currency exchange risk and interest rate risk. Forward and option contracts on various foreign currencies are entered into to manage the foreign currency exchange rate risk on forecasted revenue denominated in foreign currencies and monetary assets and liabilities held in non-functional currencies. Interest rate swaps are entered into to manage interest rate risk associated with the Company's floating rate borrowings. The Company's primary exchange rate exposure is with the US dollars, pound sterling and the Indian rupee. For derivative instruments which qualify for cash flow hedge accounting, the Company records the effective portion of gain or loss from changes in the fair value of the derivative instruments in other comprehensive income (loss), which is reclassified into earnings in the same period during which the hedged item affects earnings. Derivative instruments qualify for hedge accounting when the instrument is designated as a hedge; the hedged item is specifically identifiable and exposes the Company to risk; and it is expected that a change in fair value of the derivative instrument and an opposite change in the fair value of the hedged item will have a high degree of correlation. Determining the high degree of correlation between the change in fair value of the hedged item and the derivative instruments involves significant judgment including the probability of the occurrence of the forecasted transaction. When it is probable that a forecasted transaction will not occur, the Company discontinues the hedge accounting and recognizes immediately in the statement of income, the gains and losses attributable to such derivative instrument that were accumulated in other comprehensive income (loss).

As at September 30, 2011, an unrealized loss of \$2,290 on derivative instruments included in other comprehensive income is expected to be reclassified to earnings during the next 12 months (unrealized gain of \$5,091 as at March 31, 2011).

As at September 30, 2011 the notional values of outstanding foreign exchange forward contracts and foreign exchange option contracts amounted to \$317,545 and \$275,557, respectively (\$273,500 and \$250,012, respectively, as at March 31, 2011).

Financial risk management

Financial risk factors

The Company's activities expose it to a variety of financial risks: market risk, interest risk, credit risk and liquidity risk. The Company's primary focus is to foresee the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance. The primary market risk to the Company is foreign exchange risk. The Company uses derivative financial instruments to mitigate foreign exchange related risk exposures. The Company's exposure to credit risk is influenced mainly by the individual characteristic of each customer and the concentration of risk from the top few customers. The demographics of the customer including the default risk of the industry and country in which the customer operates also has an influence on credit risk assessment.

Risk management procedures

The Company manages market risk through treasury operations. Senior management and board of directors approve the Company's treasury operations' objectives and policies. The activities of treasury operations include management of cash resources, implementation of hedging strategies for foreign currency exposures, implementation of borrowing strategies and monitoring compliance with market risk limits and policies. The Company's foreign exchange committee, comprising the Chairman of the Board, Group Chief Executive Officer and Group Chief Financial Officer, is the approving authority for all hedging transactions.

Components of market risk

Exchange rate risk:

The Company's exposure to market risk arises principally from exchange rate risk. Although substantially all of revenue is denominated in pound sterling and US dollars, a significant portion of expenses for the six months ended September 30, 2011 (net of payments to repair centers made as part of the Company's WNS Auto Claims BPO segment) were incurred and paid in Indian rupees. The exchange rates among the Indian rupee, the pound sterling and the US dollar have changed substantially in recent years and may fluctuate substantially in the future. The Company hedges a portion of forecasted external and inter-company revenue denominated in foreign currencies with forward contracts and options. The Company does not enter into hedging agreements for speculative purposes and does not anticipate non-performance by the counterparties.

Based upon the Company's level of operations for the six months ended September 30, 2011, a sensitivity analysis shows that a 10% appreciation in the pound sterling against the US dollar would have increased revenue for the six months ended September 30, 2011 by approximately \$18,867. Similarly, a 10% appreciation or depreciation in the Indian rupee against the US dollar would have increased or decreased, respectively, the Company's expenses incurred and paid in Indian rupee for the six months ended September 30, 2011 by approximately \$2,968.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011

(Amounts in thousands, except share and per share data)

Interest risk:

The Company's exposure to interest rate risk arises principally from borrowings which have a floating rate of interest, a portion of which is linked to the US dollar LIBOR and the remainder is linked to the Bank of England base rate. The costs of floating rate borrowings may be affected by the fluctuations in the interest rates. In connection with the term loan facility entered into in 2008, which was refinanced in 2010, the Company entered into interest rate swap agreements with banks in fiscal 2009. These swap agreements effectively converted the term loan from a variable US dollar LIBOR interest rate to a fixed rate, thereby managing the Company's exposure to changes in market interest rates under the term loan. The outstanding swap agreements as at September 30, 2011 aggregated \$54,000. The Company's use of derivative instruments is limited to effective fixed and floating interest rate swap agreements used to manage well-defined interest rate risk exposures.

The Company monitors positions and does not anticipate non-performance by the counterparties. It intends to selectively use interest rate swaps, options and other derivative instruments to manage exposure to interest rate movements. These exposures are reviewed by appropriate levels of management on a periodic basis. The Company does not enter into hedging agreements for speculative purposes.

Credit risk:

Credit risk arises from the possibility that customers may not be able to settle their obligations as agreed. Trade receivables are typically unsecured and are derived from revenue earned from customers primarily located in the United Kingdom and the United States. Credit risk is managed through periodical assessment of the financial reliability of customers, taking into account the financial condition, current economic trends, analysis of historical bad debts and ageing of accounts receivable.

The following table gives details in respect of percentage of revenue generated from top customer and top five customers:

	Three months ended		Six months ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Revenue from top customer	18%	16%	17%	17%
Revenue from top five customers	42%	54%	42%	54%

Financial assets that are neither past due nor impaired

Cash equivalents, bank deposits and marketable securities, unbilled revenue and other assets, are neither past due and nor impaired except trade receivables as described below.

Past due 31-60 days	922	1,580
Past due 61-90 days	829	4,934
Past due over 90 days	10,973	22,784
Total	\$ 60,958	\$ 82,983
Allowances for doubtful account receivables	\$ (5,007)	\$ (4,397)
Trade receivables net of allowances for doubtful account receivables	\$ 55,951	\$ 78,586

Liquidity risk:

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under normal and stressed conditions, without incurring unacceptable losses or risking damage to the reputation. Typically the Company ensures that it has sufficient cash on demand to meet expected operational expenses and service financial obligations. In addition, the Company has concluded arrangements with well reputed banks and has unused lines of credit that could be drawn upon should there be a need.

On July 12, 2010 the Company entered into a term loan facility of \$94,000 in Mauritius with interest equal to the three month US dollar LIBOR plus a margin of 2% per annum. This term loan is repayable in semi-annual installments of \$20,000 on each of January 10, 2011 and July 11, 2011 and \$30,000 on January 10, 2012 with the final installment of \$24,000 payable on July 10, 2012. On January 10, 2011 and July 11, 2011, the Company made a scheduled installment repayment of \$20,000 each, following which the amount outstanding under the facility was \$54,000.

The Company has also established a £19,760 (\$30,806 based on the exchange rate on September 30, 2011) line of credit in UK pursuant to a facility agreement dated June 30, 2010. This facility consists of a two year term loan facility of £9,880 (\$15,403 based on the exchange rate on September 30, 2011) at the Bank of England base rate plus a margin of 1.95% per annum and a working capital facility of £9,880 (\$15,403 based on the exchange rate on September 30, 2011) at the Bank of England base rate plus a margin of 2.45% per annum which has been renewed on June 30, 2011. As at September 30, 2011 the amount outstanding under the term loan facility was £9,880 (\$15,403 based on the exchange rate on September 30, 2011) and an amount of £4,671 (\$7,282 based on the exchange rate on September 30, 2011) was utilized from the working capital facility.

The Company has also established a \$3,200 line of credit in the Philippines pursuant to a facility agreement dated September 8, 2010. This facility consists of a three year term loan facility at the three-month US dollar LIBOR plus a margin of 3% per annum. As at September 30, 2011 the amount outstanding under the facility was \$3,200.

Non-current:			
Deferred rent expenses	\$ 2,359	\$ 2,851	\$ 3,071
Other liabilities	—	127	656
Total	\$ 2,359	\$ 2,978	\$ 3,727

13. Revenue recognition

In Auto Claims BPO, the Company has started re-negotiating contractual terms with insurance company and the repair centers as and when they come up for renewal. The Company has renewed its contract with one of its customer and negotiated a new contract with the repair center in April 2011. In May 2011, the Company has further negotiated for a new contract with the repair center, which is appended as part of the main revenue contract with two other insurance customers.

The key changes to the “Principal Agent Consideration” are summarized below:

- a) The primary responsibility of the repair work has now shifted from the Company to the repair center.
- b) The credit risk is now passed on from the Company to the insurance company.
- c) The true economic benefit which the Company earns in the process is the claims handling fee with the repairs cost being a pass through from the insurance company to the repair center without any significant risk and reward involved on the Company’s part.

The Company has evaluated the principal or agent recognition criteria as per IAS 18. Based on the evaluation of the terms of the contract with repair centers and arrangement with insurance company, the Company has concluded that it is not the principal in providing claims handling services and hence it would be appropriate to record revenue from repair services on a net basis i.e. net of repair cost.

Accordingly, the revenues from three of the Company’s clients in Auto Claims BPO have been recorded net of repair cost during the six months period ended September 30, 2011. The change in revenue accounting for one of its clients is effective from April 2011 and the balance two clients is effective from May 2011.

WNS (HOLDINGS) LIMITED
NOTES TO UNAUDITED CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2011

(Amounts in thousands, except share and per share data)

The Company has 13 delivery centers in India which were eligible to claim income-tax exemption with respect to profits earned from export revenue from operating units registered under the Software Technology Parks of India (“STPI”) which expired on April 1, 2011. The Company has a delivery center located in Gurgaon, India registered under the Special Economic Zone (“SEZ”) scheme and eligible for 100% income tax exemption until fiscal 2012, and 50% income tax exemption from fiscal 2013 till fiscal 2022. During fiscal 2012, the Company has also started its operations in delivery centers in Pune & Navi Mumbai, India registered under the SEZ scheme and eligible for 100% income tax exemption until fiscal 2016 and 50% income tax exemption from fiscal 2017 till fiscal 2026. The Government of India pursuant to the Indian Finance Act, 2011 has levied minimum alternate tax (“MAT”) on the profits earned by the SEZ units at the rate of 20.01%. The Company’s operations in Costa Rica and Philippines are also eligible for tax exemptions which expire in fiscal 2017 and fiscal 2013, respectively. The Company’s operations in Sri Lanka were also eligible for tax exemptions which expired in fiscal 2011. However, the Government of Sri Lanka has exempted the profits earned from export revenue from tax. This will enable the Company’s Sri Lankan subsidiary to continue to claim tax exemption under Sri Lankan Inland Revenue Act following the expiry of the tax holiday.

In January 2009 the Company received an order of assessment for fiscal 2005 from the Indian tax authorities that could give rise to an estimated \$14,870 in additional taxes, including interest of \$4,614. The Company had contested the order and in November 2010 the Company received the order from the first level Indian appellate authority deciding the issues in favor of the Company. However, the order has been contested before higher appellate authorities by the Indian tax authorities.

In November 2009, the Company received draft orders of assessment in relation to WNS Global and certain of its other subsidiaries assessed for tax in India for fiscal 2006 from the Indian tax authorities. The Company had contested the draft orders of assessment before the Dispute Resolution Panel (“DRP”), a panel set up by the Government of India as alternate first level appellate authorities. The DRP order as well as the orders of assessment giving effect to the DRP order, which were received by the Company in the month of September 2010, could give rise to an estimated \$9,339 in additional taxes, including interest of \$3,275 in the case of WNS Global, and \$5,580 in additional taxes, including interest of \$1,949 in the case of certain of its other subsidiaries assessed for tax in India.

In February 2011, the Company received orders of assessment in relation to WNS Global and certain of its other subsidiaries assessed for tax in India for fiscal 2007 from the Indian income tax authorities that could give rise to an estimated \$17,447 in additional taxes, including interest of \$5,662 in the case of WNS Global, and \$8,909 in additional taxes, including interest of \$2,818 in the case of certain of its other subsidiaries assessed for tax in India. The Company has contested these orders before higher appellate tax authorities. In April 2011, the Indian income tax authorities granted the Company a stay of demand in respect of an estimated \$13,491 in additional taxes in the case of WNS Global after adjusting for the refund due to WNS Global for prior years which amounted to \$2,542, rectification of the assessment order which amounted to \$802 and taxes that have been paid by WNS Global which amounted to \$612. Following the grant of the stay of demand, the Company paid an additional tax of \$153.

In October 2011, the Company received a notice from the Indian income tax authorities revoking the stay of demand issued in respect of the assessment orders relating to WNS Global for fiscal 2007, and demanding payment of the pending tax amount. After consultation with its tax advisors, the Company has filed a writ petition with the Bombay High Court, requesting for a stay of demand. The Company has contested the assessment orders from the Indian tax authorities for fiscal 2007 before the higher appellate tax authorities, and intends to contest such notice as well. The Company believes that as this notice is merely a revocation of the stay on the previous assessment orders and not a new assessment order, it will not materially affect the Company’s financial position.

Based on certain favorable decision from appellate authorities in previous years, certain legal opinions from counsel and after consultation with the Indian tax advisors, the Company believes that the chances of the aforementioned assessments, upon challenge, being sustained at the higher appellate authorities are remote and the Company intends to vigorously dispute the assessments and orders. The Company has deposited a small portion of the disputed amount with the tax authorities and may be required to deposit the remaining portion of the disputed amount with the tax authorities pending final resolution of the respective matter.

(Amounts in thousands, except share and per share data)

Others

On March 21, 2009, the Company received an order from the Indian service tax authority, demanding \$7,070 of service tax and related penalty for the period from March 1, 2003 to January 31, 2005. The assessment order alleges that service tax is payable in India on BPO services provided by the Company to clients based abroad as the export proceeds are repatriated outside India by the Company. The Company has filed an appeal to the appellate tribunal against the assessment order and the appeal is currently pending. After consultation with the Indian tax advisors, the Company believes the chances that the assessment would be upheld against it are remote. The Company intends to continue to vigorously dispute the assessment.

17. Earnings per share

The following table sets forth the computation of basic and diluted earnings per share:

	Three months ended		Six months ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Numerator:				
Profit	\$ 3,428	\$ 5,985	\$ 4,087	\$ 150
Denominator:				
Basic weighted average ordinary shares outstanding	44,543,249	44,253,774	44,506,899	44,117,597
Dilutive impact of equivalent stock options and RSUs	1,070,919	882,006	1,144,940	960,550
Diluted weighted average ordinary shares outstanding	45,614,168	45,135,780	45,651,839	45,078,147

The computation of earnings per ordinary share ("EPS") was determined by dividing profit by the weighted average ordinary shares outstanding during the respective periods.

The Company excludes options with exercise price that are greater than the average market price from the calculation of diluted EPS because their effect would be anti-dilutive. In the three months and six months period ended September 30, 2011, the Company excluded from the calculation of diluted EPS options to purchase 890,148 and 911,148 shares, respectively.

18. Subsidiaries

The following is a list of the Company's subsidiaries as at September 30, 2011:

S/No.	Name of subsidiary	Place of incorporation
1.	WNS Global Services Netherlands Cooperative U.A.	The Netherlands
2.	WNS North America Inc.	Delaware, USA
3.	WNS Global Services (UK) Limited	United Kingdom
4.	Business Applications Associates Limited	United Kingdom
5.	WNS (Mauritius) Limited	Mauritius
6.	WNS Global Services (Romania) S.R.L.	Romania
7.	WNS Philippines Inc. (1)	Philippines
8.	WNS Global Services Philippines, Inc.	Philippines
9.	WNS Business Consulting Services Private Limited	India
10.	WNS Workflow Technologies Limited	United Kingdom
11.	Accidents Happen Assistance Limited	United Kingdom
12.	Baizan International Software Technology (Beijing) Co. Limited	China
13.	WNS Capital Investment Limited	Mauritius
14.	WNS Global Services (Private) Limited	Sri Lanka
15.	WNS Customer Solutions (Singapore) Private Limited	Singapore
16.	WNS Customer Solutions (Private) Limited	Sri Lanka
17.	WNS Global Services Private Limited	India
18.	WNS BPO Services Costa Rica, S.A.	Costa Rica
19.	WNS Global Services (Australia) Pty Limited	Australia
20.	WNS Global FZE	United Arab Emirates

All the above subsidiaries are held by the Company directly or indirectly for the entire shareholding of 100% except WNS Philippines Inc. as discussed in note (1) below;

Note:

- (1) WNS Philippines Inc. is a joint venture company set up between the WNS Global Services Netherlands Cooperative U.A. ("the Co-op") and ACS. ACS has assigned its rights and obligations under the joint venture agreement in favor of its holding company Paxys, Inc. The Co-op has a 65% ownership interest in WNS Philippines Inc.

19. Operating segments

The Company has several operating segments based on a mix of industry and the types of services. The composition and organization of these operating segments currently is designed in such a way that the back office shared processes, i.e. the horizontal structure, delivers service to industry specific back office and front office processes i.e. the vertical structure. These structures represent matrix form of organization structure, accordingly operating segments have been determined based on core principle of segments reporting in accordance with IFRS 8 “*Operating segments*” (IFRS 8). These operating segments include travel, insurance, banking and financial services, healthcare, utilities, retail and consumer products groups, auto claims and others. The Company believes that the business process outsourcing services that it provides to customers in industries other than auto claims such as travel, insurance, banking and financial services, healthcare, utilities, retail and consumer products groups and others are similar in terms of services, service delivery methods, use of technology, and long-term gross profit and hence meet the aggregation criteria in accordance with IFRS 8. WNS Assistance and AHA (“WNS Auto Claims BPO”), which provide automobile claims handling services, do not meet the aggregation criteria. Accordingly, the Company has determined that it has two reportable segments “WNS Global BPO” and “WNS Auto Claims BPO”.

The Chief Operating Decision Maker (“CODM”) has been identified as the Group Chief Executive Officer. The CODM evaluates the Company’s performance and allocates resources based on revenue growth of vertical structure.

In order to provide accident management services, the Company arranges for the repair through a network of repair centers. Repair costs paid to automobile repair centers are invoiced to customers and recognized as revenue. The Company uses revenue less repair payments for “Fault” repairs as a primary measure to allocate resources and measure segment performance. For “Non-fault repairs”, revenue including repair payments is used as a primary measure. As the Company provides a consolidated suite of accident management services including credit hire and credit repair for its “Non-fault” repairs business, the Company believes that measurement of that line of business has to be on a basis that includes repair payments in revenue. The Company believes that the presentation of this measure in the segmental information provides useful information for investors regarding the segment’s financial performance. The presentation of this information is not meant to be considered in isolation or as a substitute for the Company’s financial results prepared in accordance with IFRS.

20. Commitment and Contingencies

Bank guarantees and others

Certain subsidiaries in India and Romania hold bank guarantees aggregating \$483 and \$483 as at September 30, 2011 and March 31, 2011, respectively. These guarantees have a remaining expiry term ranging from one to five years.

Restricted time deposits placed with bankers as security for guarantees given by them to regulatory authorities in India and lessors in Romania, aggregating to \$296 and \$194 at September 30, 2011 and March 31, 2011, respectively, are included in other current assets. These deposits represent cash collateral against bank guarantees issued by the banks on behalf of the Company to third parties.

Contingencies

In the ordinary course of business, the Company is involved in lawsuits, claims and administrative proceedings. While uncertainties are inherent in the final outcome of these matters, the Company believes, after consultation with counsel, that the disposition of these proceedings will not have a material adverse effect on the Company's financial position, results of operations or cash flows.

21. Joint venture with ACS

In April 2008, the Company formed a joint venture, WNS Philippines, Inc., with Advanced Contact Solutions, Inc. ("ACS"), a BPO services and customer care provider, in the Philippines. ACS has assigned its rights and obligations under the joint venture agreement in favor of its holding company Paxys. This joint venture is majority owned by the Company (65%) and the balance by Paxys. This joint venture offers contact center services to global clients across industries. This joint venture enables the Company to bring a large scale talent pool to help solve the business challenges of its clients while diversifying the geographic concentration of delivery. Pursuant to the joint venture agreement, the Company has a call option to acquire from Paxys the remaining shares owned by Paxys and Paxys has a put option to sell all of its shareholding in the joint venture to the Company, upon the occurrence of certain conditions, as set forth in the joint venture agreement, or after August 6, 2012.

As the Company always had the risk and rewards for the ownership of the joint venture and with the existence of put option, the Company has a contractual obligation to deliver cash, hence the noncontrolling interest is classified as liability in accordance with IAS 32. The put and call option would trigger on expiry of four years from the date of commencement of operations or occurrence of non-performance event i.e. six months of continuous losses by the joint venture.

As at the Transition Date, the Company had done the probability weighted assessment of possible outcomes of the put and call options under the various conditions of contract and recorded its obligation towards the put option liability. Accordingly, a liability had been recorded based on the obligation existing at the Transition Date based on the present value of the put option with the initial recognition to equity amounting to \$1,676.

At every period end, the Company has re-measured the put liability. As at June 30, 2011, the non-performance event has been triggered as the joint venture has made six months of continuous losses for the period January 2011 to June 2011. The Company had evaluated the trigger of non-performance event and the consequent put and call option liability and concluded that the liability recorded in the books of accounts is adequate as at June 30, 2011.

In the three months ended September 30, 2011, the joint venture has continued to incur losses. As a result, the Company and Paxys, after discussions, have decided to mutually terminate the joint venture. Accordingly, the Company's Board of Directors, in its meeting held in September 2011, has determined that its call option has become exercisable as a result of the non-performance event being triggered in the prior quarter and approved the exercise of the call option. Accordingly, the Company has shared its intention to exercise the call option with Paxys.

As of September 30, 2011, the Company has not yet exercised its call option but has assessed that the event of the Company exercising the call option is highly probable as against Paxys exercising their put option and since the Company anticipates that there will be an outflow of cash in connection with the exercise of the call option in the near future, the liability is re-measured at the fair value of the call option as at September 30, 2011. Accordingly, the Company has recorded an additional charge of \$346 towards the interest payable and increased its liability from \$1,676 (as measured based on put liability) to \$2,033 as at September 30, 2011.

**Part II — MANAGEMENT’S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

You should read the following discussion in conjunction with our unaudited condensed consolidated financial statements and the related notes included elsewhere in this report. We urge you to carefully review and consider the various disclosures made by us in this report and in our other SEC filings, including our annual report on Form 20-F for our fiscal year ended March 31, 2011. Some of the statements in the following discussion are forward-looking statements. See “Special note regarding forward-looking statements.”

Overview

We are a leading provider of offshore business process outsourcing, or BPO, services. We provide comprehensive data, voice and analytical services to our clients, which are typically companies located in the Asia Pacific regions, Europe and North America.

Although we typically enter into long-term contractual arrangements with our clients, these contracts can usually be terminated with or without cause by our clients and often with short notice periods. Nevertheless, our client relationships tend to be long-term in nature given the scale and complexity of the services we provide coupled with risks and costs associated with switching processes in-house or to other service providers. We structure each contract to meet our clients’ specific business requirements and our target rate of return over the life of the contract. In addition, since the sales cycle for offshore business process outsourcing is long and complex, it is often difficult to predict the timing of new client engagements. As a result, we may experience fluctuations in growth rates and profitability from quarter to quarter, depending on the timing and nature of new contracts. Our operating results may also differ significantly from quarter to quarter due to seasonal changes in the operations of our clients. For example, our clients in the travel and leisure industry typically experience seasonal changes in their operations due to the holiday travel season in the third quarter of each fiscal year, as a result of which we may experience seasonal fluctuations in our Travel and leisure vertical during such period. Our focus, however, is on deepening our client relationships and maximizing shareholder value over the life of a client’s relationship with us.

Our revenue is generated primarily from providing business process outsourcing services. We have two reportable segments for financial statement reporting purposes — WNS Global BPO and WNS Auto Claims BPO. In our WNS Auto Claims BPO segment, we provide both “fault” and “non fault” repairs. For “fault” repairs, we provide claims handling and accident management services, where we arrange for automobile repairs through a network of third party repair centers. In our accident management services, where we act as the principal in our dealings with the third party repair centers and our clients, the amounts which we invoice to our clients for payments made by us to third party repair centers are reported as revenue. Where we are not the principal in providing the services, we record revenue from repair services net of repair cost. See Note 13 of the unaudited condensed consolidated financial statements included elsewhere in this report. Since we wholly subcontract the repairs to the repair centers, we evaluate our financial performance based on revenue less repair payments to third party repair centers which is a non-GAAP measure. We believe that revenue less repair payments for “fault” repairs reflects more accurately the value addition of the business process outsourcing services that we directly provide to our clients. For “non fault” repairs, revenue including repair payments is used as a primary measure to allocate resources and measure operating performance. As we provide a consolidated suite of accident management services including credit hire and credit repair for our “non fault” repairs business, we believe that measurement of that line of business has to be on a basis that includes repair payments in revenue. Revenue less repair payments is a non-GAAP measure which is calculated as revenue less payments to repair centers. The presentation of this non-GAAP information is not meant to be considered in isolation or as a substitute for our financial results prepared in accordance with IFRS. Our revenue less repair payments may not be comparable to similarly titled measures reported by other companies due to potential differences in the method of calculation.

Table of Contents

The following table reconciles our revenue (a GAAP measure) to revenue less repair payments (a non-GAAP measure) for the periods indicated:

(US \$ in million)

	Three months ended September 30,		Six months ended September 30,	
	2011	2010	2011	2010
Revenue	117.9	154.2	243.6	304.1
Less: Payments to repair centers	17.7	61.1	45.5	121.7
Revenue less repair payments	100.2	93.1	198.0	182.4

Global Market and Economic Conditions

In Asia, Europe and the United States, market and economic conditions have been challenging with tighter credit conditions and slower growth since fiscal 2009. Since fiscal 2009 and continuing into fiscal 2012, continued concerns about the systemic impact of inflation, energy costs, geopolitical issues and the availability and cost of credit have contributed to increased market volatility and diminished expectations for the economy globally. These conditions, combined with volatile oil prices, declining business and consumer confidence and increased unemployment, have, since fiscal 2009 and continuing into fiscal 2012, contributed to extreme volatility.

These economic conditions may affect our business in a number of ways. The general level of economic activity, such as decreases in business and consumer spending, could result in a decrease in demand for our services, thus reducing our revenue. The cost and availability of credit has been and may continue to be adversely affected by illiquid credit markets and wider credit spreads. Continued turbulence in the US and international markets and economies may adversely affect our liquidity and financial condition, and the liquidity and financial condition of our customers. If these market conditions continue or worsen, they may limit our ability to access financing or increase our cost of financing to meet liquidity needs, and affect the ability of our customers to use credit to purchase our services or to make timely payments to us, resulting in adverse effects on our financial condition and results of operations. Furthermore, a weakening of the rate of exchange for the US dollar or the pound sterling (in which our revenue is principally denominated) against the Indian rupee (in which a significant portion of our costs are denominated) also adversely affects our results. Fluctuations between the pound sterling or the Indian rupee and the US dollar also expose us to translation risk when transactions denominated in pound sterling or Indian rupees are translated to US dollars, our reporting currency. For example, the average pound sterling/US dollar exchange rate for fiscal 2011 depreciated 2.6% as compared to the average exchange rate for fiscal 2010, which adversely impacted our results of operations. Uncertainty about current global economic conditions could also continue to increase the volatility of our share price. We cannot predict the timing or duration of the economic slowdown or the timing or strength of a subsequent economic recovery generally or in our targeted industries, including the travel and leisure, and insurance industries. If macroeconomic conditions worsens or the current global economic condition continues for a prolonged period of time, we are not able to predict the impact such worsening conditions will have on our targeted industries in general, and our results of operations specifically.

Revenue

We generate revenue by providing business process outsourcing services to our clients.

(US \$ in million)

	Three months ended September 30,		Change		Six months ended September 30,		Change	
	2011	2010	\$	%	2011	2010	\$	%
Revenue	117.9	154.2	(36.3)	(23.5)%	243.6	304.1	(60.6)	(19.9)%
Revenue less repair payments	100.2	93.1	7.1	7.6%	198.0	182.4	15.6	8.6%

During the six months ended September 30, 2011, we re-negotiated contracts with certain of our clients and repair centers in the Auto Claims business, whereby the significant risk of services and the credit risk are now borne by these clients instead of us. As a result of these changes, we no longer account for the amount received from these clients for payments to repair centers and the payments made to repair centers for cases referred by these clients as revenue and cost of revenue, respectively, resulting in lower revenue and cost of revenue. The contract re-negotiation process is ongoing and aimed at simplifying our accounting requirements.

We believe that we have been successful in achieving growth in our revenue less repair payment due to a number of factors, including our understanding of our clients' industries, our focus on operational excellence and our world-class management team with significant experience in the global outsourcing industry. We have been successful in adding new clients who are diversified across industries and geographies to our existing large client base.

Our Contracts

We provide our services under contracts with our clients, the majority of which have terms ranging between three and eight years, with some being rolling contracts with no end dates. Typically, these contracts can be terminated by our clients with or without cause and with notice periods ranging from three to six months. However, we tend to have long-term relationships with our clients given the complex and comprehensive nature of the business processes executed by us, coupled with the switching costs and risks associated with relocating these processes in-house or to other service providers.

Each client contract has different terms and conditions based on the scope of services to be delivered and the requirements of that client. Occasionally, we may incur significant costs on certain contracts in the early stages of implementation, with the expectation that these costs will be recouped over the life of the contract to achieve our targeted returns. Each client contract has corresponding service level agreements that define certain operational metrics based on which our performance is measured. Some of our contracts specify penalties or damages payable by us in the event of failure to meet certain key service level standards within an agreed upon time frame.

When we are engaged by a client, we typically transfer that client's processes to our delivery centers over a two to six month period. This transfer process is subject to a number of potential delays. Therefore, we may not recognize significant revenue until several months after commencing a client engagement.

In the WNS Global BPO segment, we charge for our services primarily based on three pricing models — per full-time-equivalent; per transaction; or cost-plus — as follows:

- per full-time equivalent arrangements typically involve billings based on the number of full-time employees (or equivalent) deployed on the execution of the business process outsourced;
- per transaction arrangements typically involve billings based on the number of transactions processed (such as the number of e-mail responses, or airline coupons or insurance claims processed); or
- cost-plus arrangements typically involve billing the contractually agreed direct and indirect costs and a fee based on the number of employees deployed under the arrangement.

Apart from the above-mentioned three primary pricing methods, a small portion of our revenue is comprised of reimbursements of out-of-pocket expenses incurred by us in providing services to our clients.

Our prior contracts with a major client, AVIVA, granted Aviva Global the option to require us to transfer our facilities at Pune and Sri Lanka to Aviva Global. The Sri Lanka facility was transferred at book value and did not result in a material gain or loss, although we lost the revenue generated by the facility upon our transfer of the facility to Aviva Global. With the transaction that we entered into with AVIVA in July 2008 described below, we have, through the acquisition of Aviva Global, resumed control of the Sri Lanka facility and we have continued to retain ownership of the Pune facility and we expect these facilities to continue to generate revenue for us under the AVIVA master services agreement described below. However we may in the future enter into contracts with other clients with similar call options that may result in the loss of revenue that may have a material impact on our business, results of operations, financial condition and cash flows, particularly during the quarter in which the option takes effect.

In July 2008, we entered into a transaction with AVIVA consisting of a share sale and purchase agreement with AVIVA and a master services agreement with AVIVA MS. Pursuant to the share sale and purchase agreement with AVIVA, we acquired all the shares of Aviva Global in July 2008.

Pursuant to the master services agreement with AVIVA MS, or the AVIVA master services agreement, we provide BPO services to AVIVA's UK and Canadian businesses for a term of eight years and four months. Under the terms of the agreement, we have agreed to provide a comprehensive spectrum of life and general insurance processing functions to AVIVA, including policy administration and settlement, along with finance and accounting, customer care and other support services. In addition, we have the exclusive right to provide certain services such as finance and accounting, insurance back-office, customer interaction and analytics services to AVIVA's UK and Canadian businesses for the first five years, subject to the rights and obligations of the AVIVA group under their existing contracts with other providers. In March 2009, we entered into a variation deed to the AVIVA master services agreement pursuant to which we commenced provision of services to AVIVA's Irish subsidiary, Hibernian Aviva Direct Limited, and certain of its affiliates. AVIVA's Canadian business has ceased to require our BPO services and we are currently providing BPO services to AVIVA's UK business and AVIVA's Irish subsidiary, Hibernian Aviva Direct Limited, and certain of its affiliates.

Our clients customarily provide one to three month rolling forecasts of their service requirements. Our contracts with our clients do not generally provide for a committed minimum volume of business or committed amounts of revenue, except for our contract with one of our top five clients based on revenue less repair payments in fiscal 2010, and the AVIVA master services agreement that we entered into in July 2008 as described above. AVIVA MS has agreed to provide a minimum volume of business, or minimum volume commitment, to us during the term of the contract. The minimum volume commitment is calculated as 3,000 billable full-time employees, where one billable full time employee is the equivalent of a production employee engaged by us to perform our obligations under the contract for one working day of at least nine hours for 250 days a year. In August 2009, we entered into a variation agreement to the AVIVA master services agreement pursuant to which AVIVA MS agreed to increase the minimum volume commitment from the current 3,000 billable full time employees to 3,300 billable full time employees for a period of 17 months from March 1, 2010 to July 31, 2011 and to 3,250 billable full time employees for a period of six months from August 1, 2011 to January 31, 2012. The minimum volume commitment will revert to 3,000 billable full time employees after January 31, 2012 for the remaining term of the AVIVA master services agreement. In the event the mean average monthly volume of business in any rolling three-month period does not reach the minimum volume commitment, AVIVA MS has agreed to pay us a minimum commitment fee as liquidated damages. Notwithstanding the minimum volume commitment, there are termination at will provisions which permit AVIVA MS to terminate the AVIVA master services agreement without cause at any time after the expiry of 24 months from October 9, 2008, except in the case of the Chennai facility which was transferred to WNS Global Singapore in July 2008, at any time after expiry of 24 months from September 19, 2008, and in the case of the Pune facility which was transferred to WNS Global Singapore in August 2008, at any time after expiry of 24 months from October 10, 2008, in each case, with six months' notice upon payment of a termination fee. The annual minimum volume commitment under this contract was met in fiscal 2011.

Under the terms of our agreement with one of our top five clients, we are the exclusive provider of certain key services from delivery locations outside of the US, including customer service and ticketing support for the client. Our earlier agreement with this client was due to expire in December 2010. We re-negotiated this agreement and entered into a new agreement with the client on December 31, 2009. The new agreement replaced our earlier agreement and became effective on April 1, 2010 and expires in December 2015. Under the earlier agreement with this client, we were entitled to charge premium pricing because we had absorbed the initial transition cost in 2004. That premium pricing is no longer available in the new contract with this client. The early termination of the old agreement entitled us to a payment by the client of a termination fee of \$5.4 million which was received on April 1, 2010. As the termination fee was related to a renewal of our agreement with the client, we have determined that the recognition of the termination fee as revenue will be deferred over the term of the new agreement (i.e., over the period from April 1, 2010 to December 31, 2015).

FMFC, a US mortgage lender, was one of our major clients from November 2005 to August 2007. FMFC was a major client of Trinity Partners which we acquired in November 2005 from the First Magnus Group. In August 2007, FMFC filed a voluntary petition for relief under Chapter 11 of the US Bankruptcy Code. For fiscal 2007, FMFC accounted for 4.3% and 6.8% of our revenue and revenue less repair payments, respectively. Contractually, FMFC was obligated to provide us with annual minimum revenue, or pay the shortfall, through fiscal 2011. We have filed claims in FMFC's Chapter 11 case both for the payment of unpaid invoices for services rendered to FMFC before FMFC filed for Chapter 11 bankruptcy, for our entitlement under FMFC's annual minimum revenue commitment, and for administrative expenses. The amount of outstanding claims filed totaled \$15.6 million. In a judgment passed by the bankruptcy court in 2009, the claim filed by WNS amounting to \$11.7 million on account of loss of profit from the remainder of the minimum revenue commitment has been denied. We filed an appeal against this order in the bankruptcy appellate court, Tucson, Arizona. On August 31, 2010, the appellate court passed judgment in our favor thereby reversing the orders passed by the bankruptcy court and remanded the matter back to the bankruptcy court. In the same matter, the liquidating trustee, appointed by the bankruptcy court, has filed a petition against us claiming a refund of payments made by FMFC to us during the 90 days period immediately prior to its filing of the bankruptcy petition. FMFC paid a sum of \$4 million during the period from May 22, 2007 through August 21, 2007. All these payments were made in the ordinary course of business and were against the undisputed invoices of the services provided by us to FMFC during the relevant period. On August 31, 2010, we entered into a settlement agreement with the liquidating trustee pursuant to which the liquidating trustee agreed to allow our claims to the extent of \$11.8 million and dismissal of the liquidating trustee's claim of \$4 million for payments made by FMFC to us and we agreed to make a settlement payment of \$50,000 to the liquidating trustee. On October 3, 2010, the bankruptcy court approved the settlement agreement and on October 13, 2010 we made the settlement payment of \$50,000 to the liquidating trustee. At this stage we cannot confirm the amount which we can realize from the allowed claims. In fiscal 2008, we had provided an allowance for doubtful accounts for the entire amount of accounts receivable from FMFC.

Table of Contents

In our WNS Auto Claims BPO segment, we earn revenue from claims handling and accident management services. For claims handling, we charge on a per claim basis or a fixed fee per vehicle over a contract period. For automobile accident management services, where we arrange for the repairs through a network of repair centers that we have established, we invoice the client for the amount of the repair. When we direct a vehicle to a specific repair center, we receive a referral fee from that repair center. We also provide consolidated suite of services towards accident management including credit hire and credit repair for “non-fault” repairs business. Overall, we believe that we have established a sustainable business model which offers revenue visibility over a substantial portion of our business. We have done so by:

- developing a broad client base which has resulted in limited reliance on any particular client;
- seeking to balance our revenue base by targeting industries that offer significant offshore outsourcing potential;
- addressing the largest markets for offshore business process outsourcing services, which provide geographic diversity across our client base; and
- focusing our service mix on diverse data, voice and analytical processes, resulting in enhanced client retention.

Expenses

The majority of our expenses comprise cost of revenue and operating expenses. The key components of our cost of revenue are payments to repair centers, employee costs, facilities costs, depreciation and legal and professional costs. Our operating expenses include selling and marketing expenses, general and administrative expenses, foreign exchange gains and losses and amortization of intangible assets. Our non-operating expenses include finance expenses, other income and other expenses.

Cost of revenue

Our WNS Auto Claims BPO segment includes automobile accident management services, where we arrange for repairs through a network of repair centers. The payments to repair centers represent the largest component of cost of revenue. The value of these payments in any given period is primarily driven by the volume of accidents and the amount of the repair costs related to such accidents.

Employee costs are also a significant component of cost of revenue. In addition to employee salaries, employee costs include costs related to recruitment, training and retention.

Our facilities costs comprise lease rentals, facilities management and telecommunication network cost. Most of our leases for our facilities are long-term agreements and have escalation clauses which provide for increases in rent at periodic intervals commencing between three and five years from the start of the lease. Most of these agreements have clauses that cap escalation of lease rentals.

Selling and marketing expenses

Our selling and marketing expenses primarily comprise employee costs for sales and marketing personnel, travel expenses, legal and professional fees, share-based compensation expense, brand building expenses and other general expenses relating to selling and marketing.

General and administrative expenses

Our general and administrative expenses primarily comprise employee costs for senior management and other support personnel, travel expenses, legal and professional fees, share-based compensation expense and other general expenses not related to cost of revenue and selling and marketing.

Foreign exchange gains or losses, net

Foreign exchange gains or losses, net includes:

- marked to market gains or losses on derivative instruments;
- foreign currency exchange gains or losses on translation of other assets and liabilities; and
- unrealized foreign currency exchange gains or losses on revaluation of other assets and liabilities.

Amortization of intangible assets

Amortization of intangible assets is associated with our acquisitions of Marketics, in May 2007, Flovate in June 2007, Accidents Happen Assistance Limited, or AHA (formerly known as Call 24-7 Limited, or Call 24-7) in April 2008, BizAps in June 2008 and Aviva Global in July 2008.

[Table of Contents](#)

Finance expense

Finance expense primarily relates to interest charges payable on our term loan and short-term borrowings.

Other income and expense, net

Other income and expense, net comprise interest income and income or loss from sale of fixed assets and other miscellaneous expenses.

Operating Data

The following table presents certain operating data as of the dates indicated:

	September 30, 2011	June 30, 2011	March 31, 2011	December 31, 2010	September 30, 2010
Total head count	21,565	21,808	21,523	21,213	21,460
Built up seats ⁽¹⁾	17,915	16,573	16,278	16,320	16,127
Used seats ⁽¹⁾	13,336	13,450	13,256	13,235	13,149

Note:

- (1) Built up seats refer to the total number of production seats (excluding support functions like Finance, Human Resource and Administration) that are set up in any premises. Used seats refer to the number of built up seats that are being used by employees. The remainder would be termed "vacant seats." The vacant seats would get converted into used seats when we acquire a new client or increase headcount.

Results of Operations

The following table sets forth certain financial information as a percentage of revenue and revenue less repair payments:

	As a percentage of							
	Revenue		Revenue less repair payments		Revenue		Revenue less repair payments	
	Three months ended		Three months ended		Six months ended		Six months ended	
	September 30,		September 30,		September 30,		September 30,	
	2011	2010	2011	2010	2011	2010	2011	2010
Cost of revenue	72.3%	78.1%	67.4%	63.7%	74.2%	79.9%	68.2%	66.6%

Profit	2.9%	3.9%	3.4%	6.4%	1.7%	0.0%	2.1%	0.1%

The following table reconciles revenue (a GAAP measure) to revenue less repair payments (a non-GAAP measure) and sets forth payments to repair centers and revenue less repair payments as a percentage of revenue:

(US \$ in million)

	Three months ended September 30,				Six months ended September 30,			
	2011	2010	2011	2010	2011	2010	2011	2010
Revenue	\$ 117.9	\$ 154.2	100%	100%	\$ 243.6	\$ 304.1	100%	100%
Less: Payments to repair centers	17.7	61.1	15%	40%	45.5	121.7	19%	40%
Revenue less repair payments	\$ 100.2	\$ 93.1	85%	60%	\$ 198.0	\$ 182.4	81%	60%

[Table of Contents](#)

The following table presents our results of operations for the periods indicated:

(US \$ in million)

	Three months ended,		Six months ended,	
	September 30, 2011	September 30, 2010	September 30, 2011	September 30, 2010
Revenue	\$ 117.9	\$ 154.2	\$ 243.6	\$ 304.1
Cost of revenue ⁽¹⁾	85.2	120.4	180.6	243.1
Gross profit	32.7	33.8	62.9	61.0
Operating expenses:				
Selling and marketing expenses ⁽²⁾	7.0	6.4	13.6	11.4
General and administrative expenses ⁽³⁾	13.1	13.0	25.9	27.1
Foreign exchange gains, net	(1.8)	(1.6)	(3.2)	(4.7)
Amortization of intangible assets	7.5	7.9	15.4	15.9
Operating profit	6.9	8.1	11.2	11.2
Other (income) expense, net	0.1	(0.2)	(0.1)	(0.3)
Finance expense	0.9	1.5	2.1	9.1
Provision for income taxes	2.4	0.7	5.1	2.3
Profit	\$ 3.4	\$ 6.0	\$ 4.1	\$ 0.1

Notes:

- (1) Includes share-based compensation expense of \$0.2 million and \$0.5 million for the three and six months ended September 30, 2011, respectively, and \$0.1 million for each of the three and six months ended September 30, 2010.
- (2) Includes share-based compensation expense of \$0.1 million and \$0.2 million for the three and six months ended September 30, 2011, respectively, and \$0.0 million for each of the three and six months ended September 30, 2010.
- (3) Includes share-based compensation expense of \$0.8 million and \$1.8 million for the three and six months ended September 30, 2011, respectively, and \$0.4 million and \$0.5 million for the three and six months ended September 30, 2010, respectively.

Results for three months ended September 30, 2011 compared to the three months ended September 30, 2010

Revenue

The following table sets forth our revenue and percentage change in revenue for the periods indicated:

(US \$ in million)

	Three months ended September 30,		Change	% Changes
	2011	2010		
Revenue	\$ 117.9	\$ 154.2	\$ (36.3)	(23.5)%

The decrease in revenue of \$36.3 million was primarily attributable to a decrease in revenue from existing clients of \$40.2 million partially offset by revenue from new clients of \$4.0 million. The decrease in revenue from existing clients was primarily attributable to our auto claims business on account of changes to certain client contracts and contracts with repair centers whereby the significant risk of services and the credit risk are now borne by these clients instead of us. As a result of these changes, we no longer account for the amounts received from these clients as revenue, resulting in lower revenue.

[Table of Contents](#)

Revenue by Geography

The following table sets forth the composition of our revenue based on the location of our clients in our key geographies for the periods indicated:

(US \$ in million)

	Revenue		As a percentage of revenue	
	Three months ended September 30,			
	2011	2010	2011	2010
UK	\$ 71.2	\$ 92.9	60.4%	60.3%
North America (primarily the US)	\$ 37.7	\$ 34.9	32.0%	22.6%
Europe (excluding the UK)	\$ 6.6	\$ 24.9	5.6%	16.2%
Rest of World	\$ 2.4	\$ 1.5	2.0%	0.9%

The decrease in revenue from the UK and Europe region was primarily attributable to our auto claims business on account of changes to certain client contracts and contracts with repair centers whereby the significant risk of services and the credit risk are now borne by these clients instead of us. As a result of these changes, we no longer account for the amounts received from these clients as revenue, resulting in lower revenue.

Revenue less Repair Payments

The following table sets forth our revenue less repair payment and percentage change in revenue less repair payments for the periods indicated:

(US \$ in million)

	Three months ended September 30,			
	2011	2010	Change	% Changes
Revenue less repair payments	\$ 100.2	\$ 93.1	\$ 7.1	7.6%

The increase in revenue less repair payments of \$7.1 million was primarily attributable to an increase in revenue less repair payments from existing clients of \$3.0 million and revenue less repair payments from new clients of \$4.1 million. The increase in revenue less repair payments was primarily due to higher volumes in our Insurance, Consulting and professional services, Travel and leisure, Diversified businesses and Utilities verticals and an appreciation of the pound sterling against the US dollar.

Revenue less Repair Payments by Geography

The following table sets forth the composition of our revenue less repair payments based on the location of our clients in our key geographies for the periods indicated:

(US \$ in million)

	Revenue less repair payments		As a percentage of revenue less repair payments	
	Three months ended September 30,			
	2011	2010	2011	2010
UK	\$ 53.5	\$ 50.0	53.4%	53.7%
North America (primarily the US)	\$ 37.7	\$ 34.9	37.6%	37.5%
Europe (excluding the UK)	\$ 6.6	\$ 6.8	6.5%	7.3%
Rest of World	\$ 2.4	\$ 1.4	2.5%	1.5%

The increase in revenue less repair payments from the UK region was primarily attributable to higher volumes in our Consulting and professional services, Diversified businesses and Insurance verticals, and from the North America (primarily the US) region was primarily attributable to higher volumes in the Travel and leisure and Insurance verticals.

[Table of Contents](#)

Cost of Revenue

The following table sets forth the composition of our cost of revenue for the periods indicated:

(US \$ in million)

Cost of revenue	Three months ended September 30,		
	2011	2010	Change
Employee costs	\$ 39.9	\$ 37.6	\$ (2.3)
Repair payments	17.7	61.0	43.3
Facilities costs	14.5	11.1	(3.4)
Depreciation	4.0	4.1	0.1
Legal and professional costs	2.4	2.3	(0.1)
Travel costs	2.7	1.8	(0.9)
Other costs	4.1	2.5	(1.5)
Total cost of revenue	\$ 85.2	\$ 120.4	\$ 35.2
As a percentage of revenue	72.3%	78.1%	

The decrease in repair payments was primarily attributable to our auto claims business on account of changes to certain client contracts and contracts with repair centers whereby the significant risk of services and the credit risk are now borne by these clients instead of us. As a result of these changes, we no longer account for the payments made to repair centers for cases referred by this client as cost of revenue, which resulted in lower repair payments. The decrease was partially offset by an increase in employee costs due to an increase in salary and an appreciation of the Indian rupee against the US dollar. The facilities costs are higher by \$3.4 million on account of new facilities in Costa Rica, Mumbai, Pune, Gurgaon and Chennai.

Gross Profit

The following table sets forth our gross profit for the periods indicated:

(US \$ in million)

Gross profit	Three months ended September 30,		
	2011	2010	Change
Gross profit	\$ 32.7	\$ 33.8	\$ 1.1
As a percentage of revenue	27.7%	21.9%	
As a percentage of revenue less repair payments	32.6%	36.3%	

Gross profit is lower due to an increase in employee cost and facilities cost and an appreciation of the Indian rupee against the US dollar, partially offset by higher revenue less repair payments as discussed above.

Selling and marketing expenses

The following table sets forth the composition of our selling and marketing expenses for the periods indicated:

(US \$ in million)

Selling and marketing expenses	Three months ended September 30,		
	2011	2010	Change
Employee costs	\$ 5.6	\$ 5.0	\$ (0.6)
Other costs	1.4	1.4	0.0
Total selling and marketing expenses	\$ 7.0	\$ 6.4	\$ (0.6)
As a percentage of revenue	5.9%	4.1%	
As a percentage of revenue less repair payments	7.0%	6.9%	

The increase was primarily the result of ongoing investment in the expansion of our sales team, client partner program, and branding and marketing initiatives. We anticipate maintaining a consistent level of investment (as a percentage of our revenue less repair payments) in support of our growth strategy.

[Table of Contents](#)

General and administrative expenses

The following table sets forth the composition of our general and administrative expenses for the periods indicated:

(US \$ in million)

	Three months ended September 30,		
	2011	2010	Change
Employee costs	\$ 9.3	\$ 5.9	\$ (3.4)
Other costs	3.8	7.1	3.3
Total general and administrative expenses	\$ 13.1	\$ 13.0	\$ (0.1)
As a percentage of revenue	11.1%	8.4%	
As a percentage of revenue less repair payments	13.1%	13.9%	

The increase was primarily on account of an increase in employee costs as a result of higher salary including share based compensation expense of \$0.3 million. This increase was partially offset by costs optimization in support functions and better operating leverage resulting in lower costs in legal and professional, facilities and other costs.

Foreign exchange gains, net

The following table sets forth our foreign exchange gains, net for the periods indicated:

(US \$ in million)

	Three months ended September 30,		
	2011	2010	Change
Foreign exchange gains, net	\$ (1.8)	\$ (1.6)	\$ 0.2

The increase was due to higher unrealized foreign exchange gains on revaluation of assets and liabilities, partially offset by lower foreign exchange loss on account of hedging.

Amortization of intangible asset

The following table sets forth our amortization of intangible assets for the periods indicated:

(US \$ in million)

	Three months ended September 30,		
	2011	2010	Change
Amortizations of intangible asset	\$ 7.5	\$ 7.9	\$ 0.4

The decrease was primarily due to the lower amortization charge of intangible assets acquired in connection with the acquisition of Flovate in June 2007 and BizAps in June 2008.

Operating profit

The following table sets forth our operating profit for the periods indicated:

(US \$ in million)

	Three months ended September 30,		
	2011	2010	Change
Operating profit	\$ 6.9	\$ 8.1	\$ (1.3)
As a percentage of revenue	5.8%	5.3%	
As a percentage of revenue less repair payments	6.8%	8.7%	

Operating profit decreased due to lower gross profit as discussed above and higher selling and marketing expenses, partially offset by lower amortization charge of intangible assets.

[Table of Contents](#)

Finance Expense

The following table sets forth our finance expense for the periods indicated:

(US \$ in million)

	Three months ended September 30,		
	2011	2010	Change
Finance expense	\$ 0.9	\$ 1.5	\$ 0.6

The decrease was primarily due to lower interest cost on account of the partial repayment of our term loan.

Other (income) expense, net

The following table sets forth our other income, net for the periods indicated:

(US \$ in million)

	Three months ended September 30,		
	2011	2010	Change
Other (income) expense, net	\$ 0.1	\$ (0.2)	\$ (0.3)

Provision for income taxes

The following table sets forth our provision for income taxes for the periods indicated:

(US \$ in million)

	Three months ended September 30,		
	2011	2010	Change
Provision for income taxes	\$ 2.4	\$ 0.7	\$ (1.7)

The increase in income taxes is primarily on account of the expiry of the STPI tax holiday period in India as of April 1, 2011.

Profit

The following table sets forth our profit for the periods indicated:

(US \$ in million)

	Three months ended September 30,		
	2011	2010	Change
Profit	\$ 3.4	\$ 6.0	\$ (2.6)
As a percentage of revenue	2.9%	3.9%	
As a percentage of revenue less repair payments	3.4%	6.4%	

The decrease in profit was primarily on account of higher employee costs, facilities cost and provision for income taxes as discussed above, partially offset by higher revenue less repair payments and savings from cost management initiatives.

Results for six months ended September 30, 2011 compared to the six months ended September 30, 2010

Revenue

The following table sets forth our revenue and percentage change in revenue for the periods indicated:

(US \$ in million)

	Six months ended September 30,			
	2011	2010	Change	% Changes
Revenue	\$ 243.6	\$ 304.1	\$ 60.6	(19.9)%

The decrease in revenue of \$60.6 million was primarily attributable to a decrease in revenue from existing clients of \$66.7 million, partially offset by revenue from new clients of \$6.1 million. The decrease in revenue from existing clients was primarily attributable to our auto claims business on account of changes to certain client contracts and contracts with repair centers whereby the significant risk of services and the credit risk are now borne by these clients instead of us. As a result of these changes, we no longer account for the amounts received from these clients as revenue, resulting in lower revenue.

Revenue by Geography

The following table sets forth the composition of our revenue based on the location of our clients in our key geographies for the periods indicated:

(US \$ in million)

	Revenue		As a percentage of revenue	
	Six months ended September 30,			
	2011	2010	2011	2010
UK	\$ 152.3	\$ 182.9	62.5%	60.1%
North America (primarily the US)	\$ 73.9	\$ 69.9	30.4%	23.0%
Europe (excluding the UK)	\$ 13.2	\$ 48.4	5.4%	15.9%
Rest of World	\$ 4.2	\$ 2.9	1.7%	1.0%

The decrease in revenue from the UK and Europe region was primarily attributable to our auto claims business on account of changes to certain client contracts and contracts with repair centers whereby the significant risk of services and the credit risk are now borne by these clients instead of us. As a result of these changes, we no longer account for the amounts received from these clients as revenue, resulting in lower revenue. The increase in revenue in North America (primarily the US) was primarily due to higher volumes in the Travel and leisure and Insurance verticals.

Revenue less Repair Payments

The following table sets forth our revenue less repair payment and percentage change in revenue less repair payments for the periods indicated:

(US \$ in million)

	Six months ended September 30,			
	2011	2010	Change	% Changes
Revenue less repair payments	\$ 198.0	\$ 182.4	\$ 15.6	8.6%

The increase in revenue less repair payments of \$15.6 million was primarily attributable to an increase in revenue less repair payments from existing clients of \$9.5 million and revenue less repair payments from new clients of \$6.1 million. The increase in revenue less repair payments was primarily due to higher volumes in the Insurance, Diversified businesses, Consulting and professional services and Travel and leisure verticals and an appreciation of the pound sterling against the US dollar.

Table of Contents

Revenue less Repair Payments by Geography

The following table sets forth the composition of our revenue less repair payments based on the location of our clients in our key geographies for the periods indicated:

(US \$ in million)

	Revenue less repair payments		As a percentage of revenue less repair payments	
	Six months ended September 30,			
	2011	2010	2011	2010
UK	\$ 106.7	\$ 96.3	53.9%	52.8%
North America (primarily the US)	\$ 73.9	\$ 69.9	37.3%	38.3%
Europe (excluding the UK)	\$ 13.2	\$ 13.3	6.7%	7.3%
Rest of World	\$ 4.2	\$ 2.9	2.1%	1.6%

The increase in revenue less repair payments from the UK region was primarily attributable to higher volumes in the Insurance, Diversified businesses and Consulting and professional services verticals. The increase in revenue in North America (primarily the US) was primarily due to higher volumes in the Travel and leisure and Insurance verticals.

Cost of Revenue

The following table sets forth the composition of our cost of revenue for the periods indicated:

(US \$ in million)

Cost of revenue	Six months ended September 30,		
	2011	2010	Change
Employee costs	\$ 82.7	\$ 76.5	\$ (6.2)
Repair payments	45.5	121.7	76.2
Facilities costs	26.8	22.9	(3.9)
Depreciation	7.8	8.6	0.8
Legal and professional costs	5.0	4.6	(0.5)
Travel costs	5.1	3.1	(2.0)
Other costs	7.7	5.8	(1.9)
Total cost of revenue	\$ 180.6	\$ 243.1	\$ 62.5
As a percentage of revenue	74.2%	79.9%	

The decrease in repair payments was primarily attributable to our auto claims business on account of changes to certain client contracts and contracts with repair centers whereby the significant risk of services and the credit risk are now borne by these clients instead of us. As a result of these changes, we no longer account for the payments made to repair centers for cases referred by this client as cost of revenue, which resulted in lower repair payments. The decrease was partially offset by an increase in employee costs due to an increase in salary and an appreciation of the Indian rupee against the US dollar. The facilities costs were higher by \$3.9 million on account of new facilities in Costa Rica, Mumbai, Pune and Chennai, which were partially offset by a de-recognition of deferred rent liability of \$1.0 million resulting from significant modifications in our lease agreement for Mumbai location.

Gross Profit

The following table sets forth our gross profit for the periods indicated:

(US \$ in million)

	Six months ended September 30,		
	2011	2010	Change
Gross profit	\$ 62.9	\$ 61.0	\$ 1.9
As a percentage of revenue	25.8%	20.1%	
As a percentage of revenue less repair payments	31.8%	33.4%	

Gross profit is higher due to higher revenue less repair payments as detailed above, partially offset by an increase in employee costs, facilities cost and an appreciation of the Indian rupee against the US dollar.

[Table of Contents](#)

Selling and marketing expenses

The following table sets forth the composition of our selling and marketing expenses for the periods indicated:

(US \$ in million)

	Six months ended September 30,		
	2011	2010	Change
Employee costs	\$ 10.2	\$ 8.3	\$ (1.9)
Other costs	3.5	3.2	(0.3)
Total selling and marketing expenses	\$ 13.6	\$ 11.4	\$ (2.2)
As a percentage of revenue	5.6%	3.8%	
As a percentage of revenue less repair payments	6.9%	6.3%	

The increase was primarily the result of ongoing investment in the expansion of our sales team, client partner program, and branding and marketing initiatives. We anticipate maintaining a consistent level of investment (as a percentage of our revenue less repair payments) in support of our growth strategy.

General and administrative expenses

The following table sets forth the composition of our general and administrative expenses for the periods indicated:

(US \$ in million)

	Six months ended September 30,		
	2011	2010	Change
Employee costs	\$ 18.8	\$ 12.8	\$ (6.0)
Other costs	7.1	14.3	7.2
Total general and administrative expenses	\$ 25.9	\$ 27.1	\$ 1.2
As a percentage of revenue	10.6%	8.9%	
As a percentage of revenue less repair payments	13.1%	14.9%	

The decrease was primarily on account of cost optimization in support functions and better operating leverage resulting in lower legal and professional costs, facilities costs and other costs. This decrease was partially offset by an increase in employee costs as a result of higher salary including share based compensation expense of \$1.3 million.

Foreign exchange gains, net

The following table sets forth our foreign exchange gains, net for the periods indicated:

(US \$ in million)

	Six months ended September 30,		
	2011	2010	Change
Foreign exchange gains, net	\$ (3.2)	\$ (4.7)	\$ (1.5)

The decrease was due to lower unrealized foreign exchange gains on revaluation of assets and liabilities, partially offset by higher foreign exchange loss on account of hedging.

Amortization of intangible asset

The following table sets forth our amortization of intangible assets for the periods indicated:

(US \$ in million)

	Six months ended September 30,		
	2011	2010	Change
Amortizations of intangible asset	\$ 15.4	\$ 15.9	\$ 0.5

The decrease was primarily due to the lower amortization charge of intangible assets acquired in connection with the acquisition of Flovate in June 2007 and BizAps in June 2008.

Table of Contents

Operating profit

The following table sets forth our operating profit for the periods indicated:

(US \$ in million)

	Six months ended September 30,		
	2011	2010	Change
Operating profit	\$ 11.2	\$ 11.2	\$ 0.0
As a percentage of revenue	4.6%	3.7%	
As a percentage of revenue less repair payments	5.7%	6.2%	

Operating profit has remained the same primarily due to higher gross profit as discussed above and lower general and administrative expenses, partially offset by higher selling and marketing expenses and lower foreign exchange gain.

Finance Expense

The following table sets forth our finance expense for the periods indicated:

(US \$ in million)

	Six months ended September 30,		
	2011	2010	Change
Finance expense	\$ 2.1	\$ 9.1	\$ 7.0

The decrease was primarily due to lower interest cost on account of the scheduled repayment of our term loan and a onetime cost impact of \$5.1 million due to an interest rate swap unwinding charge as a result of our term loan restructuring in the first quarter of fiscal 2011.

Other (income) expense, net

The following table sets forth our other income, net for the periods indicated:

(US \$ in million)

	Six months ended September 30,		
	2011	2010	Change
Other income, net	\$ (0.1)	\$ (0.3)	\$ (0.2)

Provision for income taxes

The following table sets forth our provision for income taxes for the periods indicated:

(US \$ in million)

	Six months ended September 30,		
	2011	2010	Change
Provision for income taxes	\$ 5.1	\$ 2.3	\$ (2.8)

The increase in income tax is primarily on account of the expiry of the STPI tax holiday period in India as of April 1, 2011.

Profit

The following table sets forth our profit for the periods indicated:

(US \$ in million)

	Six months ended September 30,		
	2011	2010	Change
Profit	\$ 4.1	\$ 0.1	\$ 3.9
As a percentage of revenue	1.7%	0.0%	
As a percentage of revenue less repair payments	2.1%	0.1%	

The increase in profit was primarily on account of higher revenue less repair payments, cost savings from management initiatives and a onetime cost impact of \$5.1 million due to an interest rate swap unwinding charge in the first quarter of fiscal 2011, partially offset by higher employee costs and provision for income taxes as discussed above.

Liquidity and Capital Resources

Our capital requirements are principally for debt repayment, the establishment of operations facilities to support our growth and acquisitions. Our sources of liquidity include cash and cash equivalents, and cash flow from operations, supplemented by equity and debt financing and bank credit lines as required.

As at September 30, 2011, we had cash and cash equivalents of \$16.1 million. We typically seek to invest our available cash on hand in bank deposits, and money market instruments.

As at September 30, 2011, our Indian subsidiary, WNS Global, had unsecured lines of credit of ₹470.0 million (\$9.6 million based on the exchange rate on September 30, 2011) from The Hongkong and Shanghai Corporation Limited and \$10.0 million from BNP Paribas, interest on which would be determined on the date of the borrowing. As at September 30, 2011, ₹293.8 million (\$6.0 million based on the exchange rate on September 30, 2011) was utilized for working capital requirement and ₹11.5 million (\$0.2 million based on the exchange rate on September 30, 2011) was utilized for obtaining bank guarantees from the line of credit available with The Hongkong and Shanghai Corporation Limited and \$5.0 million was utilized for working capital requirements from the lines of credit available with BNP Paribas.

In July 2008, we obtained a \$200 million term loan facility to fund, together with existing cash and cash equivalents, the AVIVA transaction. Interest on the term loan was payable on a quarterly basis. Interest on the term loan was initially agreed at a rate equivalent to the three-month US dollar LIBOR plus 3% per annum. Effective January 10, 2009, the interest rate was increased by 0.5% per annum. In connection with the term loan, we entered into interest rate swap with banks covering the outstanding amount under the facility to swap the variable portion of the interest based on US dollar LIBOR to a fixed average rate. The outstanding balance of the term loan following prepayments and scheduled repayments made on the term loan as at July 12, 2010 was \$115 million.

On July 12, 2010 the balance of \$115 million was prepaid with cash on hand and proceeds from a term loan facility for \$94 million obtained pursuant to a facility agreement dated July 2, 2010 between WNS (Mauritius) Limited and The Hongkong and Shanghai Banking Corporation Limited, Hong Kong, DBS Bank Limited, Singapore and BNP Paribas, Singapore, or the 2010 Term Loan. This 2010 Term Loan has been financed equally by all the three lenders and bears interest at a rate equivalent to the three-month US dollar LIBOR plus a margin of 2% per annum. This term loan is repayable in semi-annual installments of \$20 million on each of January 10, 2011 and July 11, 2011 and \$30 million on January 10, 2012 with the final installment of \$24 million payable on July 10, 2012. On January 10, 2011 and July 11, 2011, we made a scheduled repayment installment of \$20 million each. Following the installment repayments, the amount outstanding under the facility was \$54 million. Repayment under the facility is guaranteed by us and secured by, among other things, pledges of shares provided by us and certain of our subsidiaries, charges over certain of our bank accounts and a fixed and floating charge over the assets of one of our UK subsidiaries, or the 2010 Term Loan Charge, which ranks pari passu with the UK Loan Charge (as defined below). The facility agreement contains certain restrictive covenants on our indebtedness, total borrowings to tangible net worth ratio, total borrowings to EBITDA ratio and a minimum interest coverage ratio, each as defined in the facility agreement.

WNS Global Services (UK) Limited, or WNS UK, entered into a facility agreement dated June 30, 2010 with HSBC Bank plc for a secured line of credit for the £19.8 million (\$30.8 million based on the exchange rate on September 30, 2011), consisting of a £9.9 million (\$15.4 million based on the exchange rate on September 30, 2011) two year term loan facility repayable on maturity and a £9.9 million (\$15.4 million based on the exchange rate on September 30, 2011) working capital facility which has been renewed on June 30, 2011. The term loan bears interest at Bank of England base rate plus a margin of 1.95% per annum and the working capital facility bears interest at Bank of England base rate plus a margin of 2.45% per annum. Repayment under the facility is guaranteed by us and secured by, among other things, pledges of shares provided by us and certain of our subsidiaries, a charge over one of our bank accounts and a fixed and floating charge over the assets of one of our UK subsidiaries, or the UK Loan Charge, which ranks pari passu with the 2010 Term Loan Charge. The facility agreement contains certain restrictive covenants on our indebtedness, total borrowings to tangible net worth ratio, total borrowings to EBITDA ratio, a minimum interest coverage ratio and a minimum current ratio, each as defined in the facility agreement. As at September 30, 2011, £9.9 million (\$15.4 million based on the exchange rate on September 30, 2011) was outstanding under the term loan facility and £4.7 million (\$7.3 million based on the exchange rate on September 30, 2011) was outstanding under the working capital facility.

WNS Global Services Philippines Inc. has established a \$3.2 million line of credit pursuant to a facility agreement dated September 8, 2010 with The Hongkong and Shanghai Banking Corporation Limited. This facility consists of a three year term loan facility at the three-month US dollar LIBOR plus a margin of 3% per annum. This facility is secured by, among other things, a guarantee provided by us and contains certain restrictive covenants on our indebtedness, total borrowings to tangible net worth ratio, total borrowings to EBITDA ratio, a minimum interest coverage ratio, each as defined in the facility agreement. As at September 30, 2011, the amount outstanding against the facility was \$3.2 million.

We believe that our anticipated cash generated from operating activities and cash and cash equivalents in hand will be sufficient to meet our estimated capital expenditures and financing commitments for fiscal 2012. However, under the current extreme market conditions as discussed under “— Global Market and Economic Conditions” above, there can be no assurance that our business activity would be maintained at the expected level to generate the anticipated cash flows from operations. If the current market conditions persist or further deteriorate, we may experience a decrease in demand for our services, resulting in our cash flows from operations being lower than anticipated. If our cash flows from operations is lower than anticipated, including as a result of the ongoing downturn in the market conditions or otherwise, we may need to obtain additional financing to pursue certain of our expansion plans. Further, we may in the future consider making acquisitions which we expect to be able to finance partly or fully from cash generated from operating activities. If we have significant growth through acquisitions or require additional operating facilities beyond those currently planned to service new client contracts, we may also need to obtain additional financing. If current market conditions continue to persist or deteriorate further, we may not be able to obtain additional financing or any such additional financing may be available to us on unfavorable terms. An inability to pursue additional opportunities will have a material adverse effect on our ability to maintain our desired level of revenue growth in future periods.

In summary, our cash flows were:

(US \$ in million)

	Six months ended September 30,	
	2011	2010
Net cash provided by operating activities	\$ 24.1	\$ 9.0
Net cash used in investing activities	\$ (12.8)	\$ (7.1)
Net cash (used in) provided by financing activities	\$ (14.8)	\$ (12.1)

Cash Flows from Operating Activities

Cash provided by operating activities were \$24.1 million for the six months ended September 30, 2011 as compared to \$9.0 million for the six months ended September 30, 2010. The increase in cash provided by operating activities for the six months ended September 30, 2011 as compared to the six months ended September 30, 2010 was attributable to an increase in profit as adjusted by non-cash related items by \$15.2 million and a reduction in cash paid for interest by \$2.4 million for the six months ended September 30, 2011 as compared to September 30, 2010. The same was offset by an increase in cash paid for income taxes by \$1.4 million, decrease in interest received by \$0.1 million and an increase in working capital outflow by \$1.0 million for the six months ended September 30, 2011 as compared to September 30, 2010. Cash from working capital changes decreased by \$1.0 million primarily due to changes in other current assets, accounts payable and deferred revenue, offset by changes in accounts receivable and other current liabilities in the six months ended September 30, 2011 resulting in a net cash outflow aggregating \$16.5 million as compared to \$15.5 million in the six months ended September 30, 2010. The increase in profit as adjusted for non-cash related items by \$15.2 million was primarily on account of (i) an increase in unrealized loss on derivatives instruments by \$9.6 million, (ii) an increase in income tax expense by \$5.6 million, (iii) an increase of \$3.9 million in profit, (iv) an increase in share-based compensation expense by \$1.9 million, and (v) an increase in allowance for doubtful debts by \$0.9 million. This increase was partially offset by (i) an increase in deferred tax credit by \$2.8 million, (ii) a decrease in interest expense by \$1.9 million, (iii) a decrease in depreciation and amortization expenses by \$1.5 million, (iv) a decrease in excess tax benefit on share based options exercised by \$0.3 million, and (v) a decrease in amortization charge of deferred financing cost of \$0.3 million.

Cash Flows from Investing Activities

Cash used in investing activities were \$12.8 million for the six months ended September 30, 2011 as compared to \$7.1 million for the six months ended September 30, 2010. Investing activities comprised the following: (i) the capital expenditure incurred for leasehold improvements, purchase of computers, furniture, fixtures and other office equipment associated with expanding the capacity of our delivery centers in the six months ended September 30, 2011 was \$13.0 million, which was higher by \$6.2 million as compared to \$6.8 million in the six months ended September 30, 2010, partially offset by (ii) a payment made towards earnout consideration of \$0.5 million during the six months ended September 30, 2010.

Cash Flows from Financing Activities

Cash used in financing activities were \$14.8 million for the six months ended September 30, 2011, as compared to \$12.1 million for the six months ended September 30, 2010. Financing activities in the six months ended September 30, 2011 was primarily on account of (i) a short term loan of \$6.0 million taken by WNS Global Services Private Limited, or WNS Global, and a repayment of \$1.4 million of short term loan by WNS UK, as compared to a short term loan of \$10.6 million taken by WNS UK, in the six months ended September 30, 2010, (ii) payment made towards debt issuance cost in WNS (Mauritius) Limited was lower by \$0.8 million for the six months ended September 30, 2011 as compared to the six months ended September 30, 2010, (iii) proceeds received towards shares issued was lower by \$0.6 million for the six months ended September 30, 2011 as compared to the six months ended September 30, 2010, (iv) a long term debt taken by WNS UK for \$14.9 million, by WNS (Mauritius) Limited for \$46.8 million and by WNS Global Services Philippines, Inc. for \$3.2 million during the six months ended September 30, 2010 and (v) a loan repayment of \$20.0 million during the six months ended September 30, 2011 as compared to a repayment of \$87.8 million during the six months ended September 30, 2010 by WNS (Mauritius) Limited.

Tax Assessment Orders

Transfer pricing regulations to which we are subject require that any international transaction among WNS and its subsidiaries, or the WNS group enterprises, be on arm's-length terms. We believe that the international transactions among the WNS group enterprises are on arm's-length terms. If, however, the applicable tax authorities determine the transactions among the WNS group enterprises do not meet arm's length criteria, we may incur increased tax liability, including accrued interest and penalties. This would cause our tax expense to increase, possibly materially, thereby reducing our profitability and cash flows. The applicable tax authorities may also disallow deductions or tax holiday benefits claimed by us and assess additional taxable income on us in connection with their review of our tax returns.

From time to time, we receive orders of assessment from the Indian tax authorities assessing additional taxable income on us and/or our subsidiaries in connection with their review of our tax returns. We currently have a few orders of assessment outstanding and are vigorously disputing those assessments. We have described below assessment orders that we believe could be material to our company given the magnitude of the claim. In case of disputes, the Indian tax authorities may require us to deposit with them all or a portion of the disputed amount pending resolution of the matter on appeal. Any amount paid by us as deposits will be refunded to us with interest if we succeed in our appeals.

In January 2009, we received an order of assessment from the Indian tax authorities that assessed additional taxable income for fiscal 2005 on WNS Global, our wholly-owned Indian subsidiary, that could give rise to an estimated ₹728.1 million (\$14.9 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹225.9 million (\$4.6 million based on the exchange rate on September 30, 2011). The assessment order alleges that the transfer price we applied to international transactions between WNS Global and our other wholly-owned subsidiaries was not appropriate, disallows certain expenses claimed as tax deductible by WNS Global and disallows a tax holiday benefit claimed by us. In March 2009, we deposited ₹10.0 million (\$0.2 million based on the exchange rate on September 30, 2011) with the Indian tax authorities pending resolution of the dispute. The first level Indian appellate authorities have ruled in our favor in our dispute against an assessment order assessing additional taxable income for fiscal 2004 on WNS Global based on similar allegations on transfer pricing and tax deductibility of similar expenses and overturned the assessment. The Indian tax authorities contested the first level Indian appellate authorities' ruling before the second level appellate authorities and resolution of the dispute is pending. We disputed the order of assessment for fiscal 2005 before the first level Indian appellate authorities. In November 2010, we received the order from the first level Indian appellate authorities in respect of the assessment order for fiscal 2005 deciding the issues in our favor. However, the order has been contested before second level appellate authorities by the Indian tax authorities and resolution of the dispute is pending.

In November 2009, we received a draft order of assessment from the Indian tax authorities (incorporating the transfer pricing order that we had received on October 31, 2009) for fiscal 2006. We had disputed the draft order of assessment before Dispute Resolution Panel, or DRP, a panel set up by the Government of India as an alternative to first appellate authority. In September 2010, we have received the DRP Order as well as the order of assessment giving effect to DRP order that assessed additional taxable income on WNS Global that could give rise to an estimated ₹457.3 million (\$9.3 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹160.4 million (\$3.3 million based on the exchange rate on September 30, 2011). The assessment order involves issues similar to that alleged in the order for fiscal 2005. Further, in September 2010, we have also received the DRP Orders as well as the orders of assessment giving effect to DRP orders in case of our certain other Indian subsidiaries assessed for tax in India, that assessed additional taxable income for fiscal 2006 that could give rise to an estimated ₹273.2 million (\$5.6 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹95.4 million (\$1.9 million based on the exchange rate on September 30, 2011). The DRP orders as well as assessment orders alleges that the transfer price we applied to international transactions with our related parties were not appropriate and taxed certain receipts claimed by us as not taxable. We deposited ₹24.2 million (\$0.5 million based on the exchange rate on September 30, 2011) with the Indian tax authorities pending resolution of the dispute. We have disputed these orders before higher appellate tax authorities.

In February 2011, we received the order of assessment for fiscal 2007 from the Indian tax authorities (incorporating a transfer pricing order that we had received in November 2010) that assessed additional taxable income on WNS Global that could give rise to an estimated ₹854.4 million (\$17.4 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹277.3 million (\$5.7 million based on the exchange rate on September 30, 2011). We deposited ₹30.0 million (\$0.6 million based on the exchange rate on September 30, 2011) with the Indian tax authorities pending resolution of the dispute and were granted a stay of demand by the Indian income tax authorities in respect of the remaining ₹660.6 million (\$13.5 million based on the exchange rate on September 30, 2011) in additional taxes after adjusting for the refund due to WNS Global for prior years which amounted to ₹124.5 million (\$2.5 million based on the exchange rate on September 30, 2011), rectification of the assessment order which amounted to ₹39.2 million (\$0.8 million based on the exchange rate on September 30, 2011) and taxes that have been paid by WNS Global which amounted to ₹30 million (\$0.6 million based on the exchange rate on September 30, 2011). Following the grant of the stay of demand, we paid additional taxes of ₹7.5 million (\$0.2 million based on the exchange rate on September 30, 2011).

In October 2011, we received a notice from the Indian income tax authorities revoking the stay of demand issued in respect of the assessment orders relating to WNS Global for fiscal 2007, and demanding payment of the pending tax amount. After consultation with our tax advisors, we have filed a writ petition with the Bombay High Court, requesting for a stay of demand. We have contested the assessment orders from the Indian tax authorities for fiscal 2007 before the higher appellate tax authorities, and intend to contest such notice as well. We believe that as this notice is merely a revocation of the stay on the previous assessment orders and not a new assessment order, it will not materially affect our financial position.

Further, in February 2011, we also received the orders of assessment, relating to certain of our other subsidiaries assessed for tax in India, that assessed additional taxable income for fiscal 2007 that could give rise to an estimated ₹462.7 million (\$9.4 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹145.6 million (\$3.0 million based on the exchange rate on September 30, 2011). We have separately deposited ₹50.8 million (\$1 million based on the exchange rate on September 30, 2011) with the Indian tax authorities pending resolution of the dispute. The orders of assessment involve issues similar to that alleged in the orders for fiscal 2005 and 2006. We have disputed the said orders of assessment before first level Indian appellate authorities. In September 2011, we received an order from the first level Indian appellate authorities granting part relief to one of our subsidiaries in respect of its disputed order of assessment. As a result of this order, the adjusted assessed additional taxable income for fiscal 2007 of our subsidiaries assessed for tax in India could give rise to an estimated ₹436.2 million (\$8.9 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹138 million (\$2.8 million based on the exchange rate on September 30, 2011).

Based on certain favorable decision from appellate authorities in previous years, certain legal opinions from counsel and after consultation with the Indian tax advisors, we believe that the chances of the aforementioned assessments, upon challenge, being sustained at the higher appellate authorities are remote and we intend to vigorously dispute the assessments and order. We have deposited a small portion of the disputed amount with the tax authorities and may be required to deposit the remaining portion of the disputed amount with the tax authorities pending final resolution of the respective matters.

In March 2009, we received an assessment order from the Indian Service Tax Authority demanding payment of ₹346.2 million (\$7.1 million based on the exchange rate on September 30, 2011) of service tax and related penalty for the period from March 1, 2003 to January 31, 2005. The assessment order alleges that service tax is payable in India on BPO services provided by WNS Global to clients based abroad as the export proceeds are repatriated outside India by WNS Global. In April 2009, we filed an appeal to the appellate tribunal against the assessment order and the appeal is currently pending. After consultation with the Indian tax advisors, we believe the chances that the assessment would be upheld against us are remote. We intend to continue to vigorously dispute the assessment.

No assurance can be given, however, that we will prevail in our tax disputes. If we do not prevail, payment of additional taxes, interest and penalties may adversely affect our results of operations, financial condition and cash flows. There can also be no assurance that we will not receive similar or additional orders of assessment in the future.

Quantitative and Qualitative Disclosures about Market Risk

General

Market risk is attributable to all market sensitive financial instruments including foreign currency receivables and payables. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market risk sensitive instruments.

Our exposure to market risk is primarily a function of our revenue generating activities and any future borrowings in foreign currency. The objective of market risk management is to avoid excessive exposure of our earnings to loss. Most of our exposure to market risk arises from our revenue and expenses that are denominated in different currencies.

The following risk management discussion and the estimated amounts generated from analytical techniques are forward-looking statements of market risk assuming certain market conditions occur. Our actual results in the future may differ materially from these projected results due to actual developments in the global financial markets.

Risk Management Procedures

We manage market risk through our treasury operations. Our senior management and our board of directors approve our treasury operations' objectives and policies. The activities of our treasury operations include management of cash resources, implementation of hedging strategies for foreign currency exposures, implementation of borrowing strategies and monitoring compliance with market risk limits and policies. Our foreign exchange committee, comprising the Chairman of the Board, our Group Chief Executive Officer and our Group Chief Financial Officer, is the approving authority for all our hedging transactions.

Components of Market Risk

Exchange Rate Risk

Our exposure to market risk arises principally from exchange rate risk. Although substantially all of our revenue less repair payments is denominated in pound sterling and US dollars, a significant portion of our expenses for the six months ended September 30, 2011 (net of payments to repair centers made as part of our WNS Auto Claims BPO segment) were incurred and paid in Indian rupees. The exchange rates among the Indian rupee, the pound sterling and the US dollar have changed substantially in recent years and may fluctuate substantially in the future. We hedge a portion of our foreign currency exposures.

Our exchange rate risk primarily arises from our foreign currency-denominated receivables. Based upon our level of operations for the six months ended September 30, 2011, a sensitivity analysis shows that a 10.0% appreciation in the pound sterling against the US dollar would have increased revenue for the six months ended September 30, 2011 by approximately \$18.9 million and would have increased revenue less repair payments for the six months ended September 30, 2011 by approximately \$14.3 million. Similarly, a 10.0% appreciation or depreciation in the Indian rupee against the US dollar would have increased or decreased, respectively, expenses incurred and paid in Indian rupee for the six months ended September 30, 2011 by approximately \$3.0 million.

To protect against exchange gains (losses) on forecasted inter-company revenue, we have instituted a foreign currency cash flow hedging program. We hedge a part of our forecasted external and inter-company revenue denominated in foreign currencies with forward and option contracts.

Interest Rate Risk

Our exposure to interest rate risk arises principally from our borrowings which has a floating rate of interest, a portion of which is linked to the US dollar LIBOR and the balance of which is linked to the Bank of England base rate. The costs of floating rate borrowings may be affected by the fluctuations in the interest rates. In connection with the term loan facility entered into in 2008, which we refinanced in 2010, we entered into interest rate swap agreements with banks in fiscal 2009. These swap agreements effectively converted the term loan from a variable US dollar LIBOR interest rate to a fixed rate, thereby managing our exposure to changes in market interest rates under the term loan. The outstanding swap agreements as of September 30, 2011 aggregated \$54 million. Our use of derivative instruments is limited to effective fixed and floating interest rate swap agreements used to manage well-defined interest rate risk exposures.

We monitor our positions and do not anticipate non-performance by the counterparties. We intend to selectively use interest rate swaps, options and other derivative instruments to manage our exposure to interest rate movements. These exposures will be reviewed by appropriate levels of management on a periodic basis. We do not enter into hedging agreements for speculative purposes.

Part III — RISK FACTORS

This report contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of a number of factors, including those described in the following risk factors and elsewhere in this report. If any of the following risks actually occur, our business, financial condition and results of operations could suffer and the trading price of our ADSs could decline.

Risks Related to Our Business

The global economic conditions have been challenging and have had, and continue to have, an adverse effect on the financial markets and the economy in general, which has had, and may continue to have, a material adverse effect on our business, our financial performance and the prices of our equity shares and ADSs.

In Asia, Europe and the United States, market and economic conditions have been challenging with tighter credit conditions and slower growth since fiscal 2009. Since fiscal 2009 and continuing into fiscal 2012, continued concerns about the systemic impact of inflation, energy costs, geopolitical issues, and the availability and cost of credit have contributed to increased market volatility and diminished expectations for the economy globally. These conditions, combined with volatile oil prices, declining business and consumer confidence and increased unemployment, have, since fiscal 2009 and continuing into fiscal 2012, contributed to extreme volatility.

These economic conditions may affect our business in a number of ways. The general level of economic activity, such as decreases in business and consumer spending, could result in a decrease in demand for our services, thus reducing our revenue. The cost and availability of credit has been and may continue to be adversely affected by illiquid credit markets and wider credit spreads. Continued turbulence in the US and international markets and economies may adversely affect our liquidity and financial condition, and the liquidity and financial condition of our customers. If these market conditions continue or worsen, they may limit our ability to access financing or increase our cost of financing to meet liquidity needs, and affect the ability of our customers to use credit to purchase our services or to make timely payments to us, resulting in adverse effects on our financial condition and results of operations. Furthermore, a weakening of the rate of exchange for the US dollar or the pound sterling (in which our revenue is principally denominated) against the Indian rupee (in which a significant portion of our costs are denominated) also adversely affects our results. Fluctuations between the pound sterling or the Indian rupee and the US dollar also expose us to translation risk when transactions denominated in pound sterling or Indian rupees are translated to US dollars, our reporting currency. For example, the average pound sterling/US dollar exchange rate for fiscal 2011, 2010 and 2009 depreciated 2.6%, 7.2% and 14.3%, respectively, as compared to the average exchange rate for fiscal 2010, 2009 and 2008, respectively, which adversely impacted our results of operations. Uncertainty about current global economic conditions could also continue to increase the volatility of our share price. We cannot predict the timing or duration of the economic slowdown or the timing or strength of a subsequent economic recovery generally or in our targeted industries, including the travel and insurance industry. If macroeconomic conditions worsens or the current global economic condition continues for a prolonged period of time, we are not able to predict the impact such worsening conditions will have on our targeted industries in general, and our results of operations specifically.

A few major clients account for a significant portion of our revenue and any loss of business from these clients could reduce our revenue and significantly harm our business.

We have derived and believe that we will continue to derive in the near term a significant portion of our revenue from a limited number of large clients. In fiscal 2011 and 2010, our five largest clients accounted for 54.3% and 53.0% of our revenue and 41.1% and 45.1% of our revenue less repair payments, respectively. In fiscal 2011, our three largest clients individually accounted for 16.4%, 13.2% and 12.2%, respectively, of our revenue as compared to 15.5%, 13.4% and 12.6%, respectively, in fiscal 2010. In fiscal 2011, our largest client, AVIVA, individually accounted for 20.4% of our revenue less repair payments compared to 23.1% in fiscal 2010.

First Magnus Financial Corporation, or FMFC, a US mortgage lender, was one of our major clients from November 2005 to August 2007. FMFC was a major client of Trinity Partners which we acquired in November 2005 from the First Magnus Group. In August 2007, FMFC filed a voluntary petition for relief under Chapter 11 of the US Bankruptcy Code. In fiscal 2007, FMFC accounted for 4.3% of our revenue and 6.8% of our revenue less repair payments. The loss of revenue from FMFC materially reduced our revenue in fiscal 2008.

Our prior contracts with another major client, Aviva International Holdings Limited, or AVIVA, provided Aviva Global, which was AVIVA's business process offshoring subsidiary, options to require us to transfer the relevant projects and operations of our facilities at Sri Lanka and Pune, India to Aviva Global. On January 1, 2007, Aviva Global exercised its call option requiring us to transfer the Sri Lanka facility to Aviva Global effective July 2, 2007. Effective July 2, 2007, we transferred the Sri Lanka facility to Aviva Global and we lost the revenue generated by the Sri Lanka facility. For the period from April 1, 2007 through July 2, 2007, the Sri Lanka facility contributed \$2.0 million of revenue and in fiscal 2007, it accounted for 1.9% of our revenue and 3.0% of our revenue less repair payments. We may, in the future, enter into contracts with other clients with similar call options that may result in the loss of revenue that may have a material impact on our business, results of operations, financial condition and cash flows, particularly during the quarter in which the option takes effect.

We have, through our acquisition of Aviva Global in July 2008, resumed control of the Sri Lanka facility and we have continued to retain ownership of the Pune facility. We expect these facilities to continue to generate revenue for us under our master services agreement with AVIVA MS. Further, through our acquisition of Aviva Global, we also added three facilities in Bangalore, Chennai and Pune. We expect revenue from AVIVA under the AVIVA master services agreement to account for a significant portion of our revenue. We therefore expect our dependence on AVIVA to continue for the foreseeable future. The AVIVA master services agreement provides for a committed amount of volume. However, notwithstanding the minimum volume commitment, there are also terminations at will provisions which permit AVIVA to terminate the agreement without cause with 180 days' notice upon payment of a termination fee. These termination provisions dilute the impact of the minimum volume commitment.

In addition, the volume of work performed for specific clients is likely to vary from year to year, particularly since we may not be the exclusive outside service provider for our clients. Thus, a major client in one year may not provide the same level of revenue in any subsequent year. The loss of some or all of the business of any large client could have a material adverse effect on our business, results of operations, financial condition and cash flows. A number of factors other than our performance could cause the loss of or reduction in business or revenue from a client, and these factors are not predictable.

For example, a client may demand price reductions, change its outsourcing strategy or move work in-house. A client may also be acquired by a company with a different outsourcing strategy that intends to switch to another business process outsourcing service provider or return work in-house.

Our revenue is highly dependent on clients concentrated in a few industries, as well as clients located primarily in Europe and the United States. Economic slowdowns or factors that affect these industries or the economic environment in Europe or the United States could reduce our revenue and seriously harm our business.

A substantial portion of our clients are concentrated in the banking, financial services and insurance, or BFSI, industry, and the travel and leisure industry. In fiscal 2011 and 2010, 66.5% and 65.4% of our revenue, respectively, and 44.2% and 48.4% of our revenue less repair payments, respectively, were derived from clients in the BFSI industry. During the same periods, clients in the travel and leisure industry contributed 13.8% and 16.3% of our revenue, respectively, and 23.0% and 24.3% of our revenue less repair payments, respectively. Our business and growth largely depend on continued demand for our services from clients in these industries and other industries that we may target in the future, as well as on trends in these industries to outsource business processes. Since the second half of fiscal 2009, there has been a significant slowdown in the growth of the global economy accompanied by a significant reduction in consumer and business spending worldwide. Certain of our targeted industries are especially vulnerable to the crisis in the financial and credit markets or to the economic downturn. A downturn in any of our targeted industries, particularly the BFSI or travel and leisure industries, a slowdown or reversal of the trend to outsource business processes in any of these industries or the introduction of regulation which restricts or discourages companies from outsourcing could result in a decrease in the demand for our services and adversely affect our results of operations. For example, as a result of the mortgage market crisis, in August 2007, FMFC, a US mortgage services client, filed a voluntary petition for relief under Chapter 11 of the US Bankruptcy Code. FMFC was a major client of Trinity Partners which we acquired in November 2005 from the First Magnus Group and became one of our major clients. In fiscal 2008 and 2007, FMFC accounted for 1.0% and 4.3% of our revenue, respectively, and 1.4% and 6.8% of our revenue less repair payments, respectively. The downturn in the mortgage market could result in a further decrease in the demand for our services and adversely affect our results of our operations.

Further, since the second half of fiscal 2009, the downturn in worldwide economic and business conditions has resulted in a few of our clients reducing or postponing their outsourced business requirements, which have in turn decreased the demand for our services and adversely affected our results of operations. In particular, our revenue is highly dependent on the economic environment in Europe and the United States, which continues to be weak. In fiscal 2011 and 2010, 76.8% and 74.9% of our revenue, respectively, and 61.3% and 62.6% of our revenue less repair payments, respectively, were derived from clients located in Europe. During the same periods, 22.2% and 24.5% of our revenue, respectively, and 37.0% and 36.5% of our revenue less repair payments, respectively, were derived from clients located in North America (primarily the United States). Any further weakening of the European or United States economy will likely have a further adverse impact on our revenue.

Other developments may also lead to a decline in the demand for our services in these industries. For example, the crisis in the financial and credit markets in the United States has led to a significant change in the financial services industry in the United States in recent years, with the United States federal government taking over or providing financial support to leading financial institutions and with leading investment banks going bankrupt or being forced to sell themselves in distressed circumstances. Significant changes in the financial services industry or any of the other industries on which we focus, or a consolidation in any of these industries or acquisitions, particularly involving our clients, may decrease the potential number of buyers of our services. Any significant reduction in or the elimination of the use of the services we provide within any of these industries would result in reduced revenue and harm our business. Our clients may experience rapid changes in their prospects, substantial price competition and pressure on their profitability. Although such pressures can encourage outsourcing as a cost reduction measure, they may also result in increasing pressure on us from clients in these key industries to lower our prices which could negatively affect our business, results of operations, financial condition and cash flows.

We may fail to attract and retain enough sufficiently trained employees to support our operations, as competition for highly skilled personnel is significant and we experience significant employee attrition. These factors could have a material adverse effect on our business, results of operations, financial condition and cash flows.

The business process outsourcing industry relies on large numbers of skilled employees, and our success depends to a significant extent on our ability to attract, hire, train and retain qualified employees. The business process outsourcing industry, including our company, experiences high employee attrition. During fiscal 2011, 2010 and 2009, the attrition rate for our employees who have completed six months of employment with us was 43%, 32% and 31%, respectively. We cannot assure you that our attrition rate will not continue to increase. There is significant competition in the jurisdictions wherever we have operation centers, including India, the Philippines and Sri Lanka, for professionals with the skills necessary to perform the services we offer to our clients. Increased competition for these professionals, in the business process outsourcing industry or otherwise, could have an adverse effect on us. A significant increase in the attrition rate among employees with specialized skills could decrease our operating efficiency and productivity and could lead to a decline in demand for our services.

In addition, our ability to maintain and renew existing engagements and obtain new businesses will depend largely on our ability to attract, train and retain personnel with skills that enable us to keep pace with growing demands for outsourcing, evolving industry standards and changing client preferences. Our failure either to attract, train and retain personnel with the qualifications necessary to fulfill the needs of our existing and future clients or to assimilate new employees successfully could have a material adverse effect on our business, results of operations, financial condition and cash flows.

If we fail to maintain an effective system of internal control over financial reporting, we may not be able to accurately report our financial results or prevent or detect fraud. As a result, current and potential investors could lose confidence in our financial reporting, which could harm our business and have an adverse effect on our stock price.

Effective internal control over financial reporting is necessary for us to provide reliable financial reports. The effective internal controls together with adequate disclosure controls and procedures are designed to prevent or detect fraud. Deficiencies in our internal controls may adversely affect our management's ability to record, process, summarize, and report financial data on a timely basis. As a public company, we are required by Section 404 of the Sarbanes-Oxley Act of 2002 to include a report of management's assessment on our internal control over financial reporting and an auditor's attestation report on our internal control over financial reporting in our annual report on Form 20-F.

Based on its evaluation, management had concluded that as at March 31, 2010, our company's disclosure controls and procedures and internal control over financial reporting were not effective due to a material weakness identified in the design and operating effectiveness of our controls over the recognition and accrual of repair payments to garages and the related fees in our Auto Claims BPO segment. In fiscal 2011, we implemented remediation measures to address the material weakness. Although management concluded that our company's disclosure controls and procedures and internal control over financial reporting were effective as at March 31, 2011, it is possible that in the future, material weaknesses could be identified in our internal controls over financial reporting and we could be required to further implement remedial measures. If we fail to maintain effective disclosure controls and procedures or internal control over financial reporting, we could lose investor confidence in the accuracy and completeness of our financial reports, which could have a material adverse effect on our stock price.

Any changes in accounting standards can be difficult to predict and can materially impact how we report our financial results.

We have adopted IFRS, as issued by IASB with effect from April 1, 2011. From time to time, IASB changes its standards that govern the preparation of our financial statements. For example, IASB has proposed amendments to hedge accounting that can significantly change the way option contracts are accounted for. There is no assurance that the amendments will be adopted as proposed or at all or on the timing of any such amendments. Changes in accounting standards are difficult to anticipate and can significantly impact our financial condition and the results of our operations.

We may be unable to effectively manage our rapid growth and maintain effective internal controls, which could have a material adverse effect on our operations, results of operations and financial condition.

Since we were founded in April 1996, and especially since Warburg Pincus & Co. acquired a controlling stake in our company in May 2002, we have experienced rapid growth and significantly expanded our operations. Our revenue has grown at a compound annual growth rate of 15.6% to \$616.3 million in fiscal 2011 from \$345.4 million in fiscal 2007. Our revenue less repair payments has grown at a compound annual growth rate of 13.9% to \$369.4 million in fiscal 2011 from \$219.6 million in fiscal 2007. Our employees have increased to 21,523 as at March 31, 2011 from 15,084 as at March 31, 2007. In January 2008, we established a new delivery center in Romania, which we expanded in fiscal year 2011. Our majority owned subsidiary, WNS Philippines Inc., established a delivery center in the Philippines in April 2008, which it expanded in fiscal 2010. Additionally, in fiscal 2010, we established a new delivery center in Costa Rica and streamlined our operations by consolidating our production capacities in various delivery centers in Bangalore, Mumbai and Pune. We now have delivery centers in six locations in India, the Philippines, Sri Lanka, the UK, Romania and Costa Rica. In fiscal 2012, we intend to establish additional delivery centers, as well as continue to streamline our operations by further consolidating production capacities in our delivery centers. In February 2011, we received in-principal approval for the allotment of a piece of land on lease for a term of 99 years, measuring 5 acres in Tiruchirapalli Navalpattu, special economic zone, or "SEZ", in the state of Tamil Nadu, India from Electronics Corporation of Tamil Nadu Limited (ELCOT) for setting up delivery centers in future.

We have also completed numerous acquisitions. For example, in July 2008, we entered into a transaction with AVIVA consisting of (1) a share sale and purchase agreement pursuant to which we acquired from AVIVA all the shares of Aviva Global and (2) a master services agreement with AVIVA MS pursuant to which we are providing BPO services to AVIVA's UK business and AVIVA's Irish subsidiary, Hibernian Aviva Direct Limited, and certain of its affiliates. Aviva Global was the business process offshoring subsidiary of AVIVA. Through our acquisition of Aviva Global, we also added three facilities in Bangalore, Chennai and Sri Lanka in July 2008, and one facility in Pune in August 2008.

This rapid growth places significant demands on our management and operational resources. In order to manage growth effectively, we must implement and improve operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, we may not be able to service our clients' needs, hire and retain new employees, pursue new business, complete future acquisitions or operate our business effectively. Failure to effectively transfer new client business to our delivery centers, properly budget transfer costs or accurately estimate operational costs associated with new contracts could result in delays in executing client contracts, trigger service level penalties or cause our profit margins not to meet our expectations or our historical profit margins. As a result of any of these problems associated with expansion, our business, results of operations, financial condition and cash flows could be materially and adversely affected.

We may not be successful in achieving the expected benefits from our transaction with AVIVA in July 2008, which could have a material adverse effect on our business, results of operations, financial condition and cash flows. Furthermore, the term loan that we have incurred to fund the transaction may put a strain on our financial position.

In July 2008, we entered into a transaction with AVIVA consisting of (1) a share sale and purchase agreement pursuant to which we acquired all the shares of Aviva Global and (2) the AVIVA master services agreement pursuant to which we are providing BPO services to AVIVA's UK business and AVIVA's Irish subsidiary, Hibernian Aviva Direct Limited, and certain of its affiliates. We completed our acquisition of Aviva Global in July 2008. Aviva Global was the business process offshoring subsidiary of AVIVA with facilities in Bangalore, India, and Colombo, Sri Lanka. In addition, through our acquisition of Aviva Global, we also acquired three facilities in Chennai, Bangalore and Sri Lanka in July 2008, and one facility in Pune in August 2008. The total consideration (including legal and professional fees) for this transaction with AVIVA amounted to approximately \$249.0 million. We entered into a \$200 million term loan facility with ICICI Bank UK Plc, or the 2008 Term Loan, as agent, to fund, together with cash on hand, the consideration for the transaction. In July 2010, we refinanced the outstanding \$115 million amount under this facility with cash on hand and proceeds from a new term loan facility for \$94 million, or the 2010 Term Loan, pursuant to a facility agreement dated July 2, 2010 with The Hongkong and Shanghai Banking Corporation Limited, Hong Kong, DBS Bank Limited, Singapore and BNP Paribas, Singapore. See "Part II — Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources." We cannot assure you that we will be able to grow our revenue, expand our service offerings and market share, or achieve the accretive benefits that we expected from our acquisition of Aviva Global and the AVIVA master services agreement.

Furthermore, the 2010 Term Loan may put a strain on our financial position. For example:

- it could increase our vulnerability to general adverse economic and industry conditions;
- it could require us to dedicate a substantial portion of our cash flow from operations to payments on the 2010 Term Loan, thereby reducing the availability of our cash flow to fund capital expenditure, working capital and other general corporate purposes;
- it requires us to seek lenders' consent prior to paying dividends on our ordinary shares;
- it limits our ability to incur additional borrowings or raise additional financing through equity or debt instruments; and
- it imposes certain financial covenants on us which we may not be able to meet and this may cause the lenders to accelerate the repayment of the balance loan outstanding.

The international nature of our business exposes us to several risks, such as significant currency fluctuations and unexpected changes in the regulatory requirements of multiple jurisdictions.

We have operations in Costa Rica, India, the Philippines, Romania, Sri Lanka, the UK, the US, and we service clients across Asia, Europe, and North America. Our corporate structure also spans multiple jurisdictions, with our parent holding company incorporated in Jersey, Channel Islands, and intermediate and operating subsidiaries incorporated in Australia, China, Costa Rica, India, Mauritius, the Netherlands, the Philippines, Romania, Singapore, Sri Lanka, UAE, the UK and the US. As a result, we are exposed to risks typically associated with conducting business internationally, many of which are beyond our control. These risks include:

Table of Contents

- significant currency fluctuations between the US dollar and the pound sterling (in which our revenue is principally denominated) and the Indian rupee (in which a significant portion of our costs are denominated);
- legal uncertainty owing to the overlap of different legal regimes, and problems in asserting contractual or other rights across international borders;
- potentially adverse tax consequences, such as scrutiny of transfer pricing arrangements by authorities in the countries in which we operate;
- potential tariffs and other trade barriers;
- unexpected changes in regulatory requirements;
- the burden and expense of complying with the laws and regulations of various jurisdictions; and
- terrorist attacks and other acts of violence or war.

The occurrence of any of these events could have a material adverse effect on our results of operations and financial condition.

Currency fluctuations among the Indian rupee, the pound sterling and the US dollar could have a material adverse effect on our results of operations.

Although substantially all of our revenue is denominated in pound sterling or US dollars, a significant portion of our expenses (other than payments to repair centers, which are primarily denominated in pound sterling) are incurred and paid in Indian rupees. We report our financial results in US dollars and our results of operations would be adversely affected if the Indian rupee appreciates against the US dollar or the pound sterling depreciates against the US dollar. The exchange rates between the Indian rupee and the US dollar and between the pound sterling and the US dollar have changed substantially in recent years and may fluctuate substantially in the future.

The average Indian rupee/US dollar exchange rate was approximately 45.57 per \$1.00 in fiscal 2011, which represented an appreciation of the Indian rupee of 4.0% as compared with the average exchange rate of approximately 47.46 per \$1.00 in fiscal 2010, which in turn represented a depreciation of the Indian rupee of 3.0% as compared with the average exchange rate of approximately 46.10 per \$1.00 in fiscal 2009. The average pound sterling/US dollar exchange rate was approximately £0.64 per \$1.00 in fiscal 2011, which represented a depreciation of the pound sterling of 2.6% as compared with the average exchange rate of approximately £0.63 per \$1.00 in fiscal 2010, which in turn represented a depreciation of the pound sterling of 7.2% as compared with the average exchange rate of approximately £0.58 per \$1.00 in fiscal 2009.

Our results of operations may be adversely affected if the Indian rupee appreciates significantly against the pound sterling or the US dollar or if the pound sterling depreciates against the US dollar. We hedge a portion of our foreign currency exposures using options and forward contracts. We cannot assure you that our hedging strategy will be successful or will mitigate our exposure to currency risk.

Our business may not develop in ways that we currently anticipate due to negative public reaction to offshore outsourcing, proposed legislation or otherwise.

We have based our strategy of future growth on certain assumptions regarding our industry, services and future demand in the market for such services. However, the trend to outsource business processes may not continue and could reverse. Offshore outsourcing is a politically sensitive topic in the UK, the US and elsewhere. For example, many organizations and public figures in the UK and the US have publicly expressed concern about a perceived association between offshore outsourcing providers and the loss of jobs in their home countries.

Such concerns have led to proposed measures in the United States, including in connection with the Troubled Asset Relief Program, that are aimed at limiting or restricting outsourcing. There is also legislation that has been enacted or is pending at the State level in the United States, with regard to limiting outsourcing. The measures that have been enacted to date are generally directed at restricting the ability of government agencies to outsource work to offshore business service providers. These measures have not had a significant effect on our business because governmental agencies are not a focus of our operations. However, it is possible that legislation could be adopted that would restrict US private sector companies that have federal or state governmental contracts from outsourcing their services to offshore service providers or that could have an adverse impact on the economics of outsourcing for private companies in the US. Such legislation could have an adverse impact on our business with US clients.

Such concerns have also led the United Kingdom and other European Union, or EU, jurisdictions to enact regulations which allow employees who are dismissed as a result of transfer of services, which may include outsourcing to non-UK/EU companies, to seek compensation either from the company from which they were dismissed or from the company to which the work was transferred. This could discourage EU companies from outsourcing work offshore and/or could result in increased operating costs for us.

In addition, there has been publicity about the negative experiences, such as theft and misappropriation of sensitive client data, of various companies that use offshore outsourcing, particularly in India. Current or prospective clients may elect to perform such services themselves or may be discouraged from transferring these services from onshore to offshore providers to avoid negative perceptions that may be associated with using an offshore provider. Any slowdown or reversal of existing industry trends towards offshore outsourcing would seriously harm our ability to compete effectively with competitors that operate out of facilities located in the UK or the US.

Our senior management team and other key team members in our business units are critical to our continued success and the loss of such personnel could harm our business.

Our future success substantially depends on the performance of the members of our senior management team and other key team members in each of our business units. These personnel possess technical and business capabilities including domain expertise that are difficult to replace. There is intense competition for experienced senior management and personnel with technical and industry expertise in the business process outsourcing industry, and we may not be able to retain our key personnel. Although we have entered into employment contracts with our executive officers, certain terms of those agreements may not be enforceable and in any event these agreements do not ensure the continued service of these executive officers. In the event of a loss of any key personnel, there is no assurance that we will be able to find suitable replacements for our key personnel within a reasonable time. The loss of key members of our senior management or other key team members, particularly to competitors, could have a material adverse effect on our business, results of operations, financial condition and cash flows. A loss of several members of our senior management at the same time or within a short period may lead to a disruption in the business of our company, which could materially adversely affect our performance.

Wage increases may prevent us from sustaining our competitive advantage and may reduce our profit margin.

Salaries and related benefits of our operations staff and other employees in India are among our most significant costs. Wage costs in India have historically been significantly lower than wage costs in the US and Europe for comparably skilled professionals, which has been one of our competitive advantages. However, rapid economic growth in India, increased demand for business process outsourcing to India, and increased competition for skilled employees in India may reduce this competitive advantage. In addition, if the US dollar or the pound sterling declines in value against the Indian rupee, wages in the US or the UK will further decrease relative to wages in India, which may further reduce our competitive advantage. We may need to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting the quantity and quality of employees that our business requires. Wage increases may reduce our profit margins and have a material adverse effect on our financial condition and cash flows.

Further, following our acquisitions of Aviva Global, Business Application Associates Limited, or BizAps, and Chang Limited, our operations in the UK have expanded and our wage costs for employees located in the UK now represent a larger proportion of our total wage costs. Wage increases in the UK may therefore also reduce our profit margins and have a material adverse effect on our financial condition and cash flows.

Our operating results may differ from period to period, which may make it difficult for us to prepare accurate internal financial forecasts and respond in a timely manner to offset such period to period fluctuations.

Our operating results may differ significantly from period to period due to factors such as client losses, variations in the volume of business from clients resulting from changes in our clients' operations, the business decisions of our clients regarding the use of our services, delays or difficulties in expanding our operational facilities and infrastructure, changes to our pricing structure or that of our competitors, inaccurate estimates of resources and time required to complete ongoing projects, currency fluctuation and seasonal changes in the operations of our clients. For example, our clients in the travel and leisure industry experience seasonal changes in their operations in connection with the year-end holiday season, as well as episodic factors such as adverse weather conditions. Transaction volumes can be impacted by market conditions affecting the travel and insurance industries, including natural disasters, outbreak of infectious diseases or other serious public health concerns in Asia or elsewhere (such as the outbreak of the Influenza A (H1N1) virus in various parts of the world) and terrorist attacks. In addition, our contracts do not generally commit our clients to providing us with a specific volume of business.

In addition, the long sales cycle for our services, which typically ranges from three to 12 months, and the internal budget and approval processes of our prospective clients make it difficult to predict the timing of new client engagements. Revenue is recognized upon actual provision of services and when the criteria for recognition are achieved. Accordingly, the financial benefit of gaining a new client may be delayed due to delays in the implementation of our services. These factors may make it difficult for us to prepare accurate internal financial forecasts or replace anticipated revenue that we do not receive as a result of those delays. Due to the above factors, it is possible that in some future quarters our operating results may be significantly below the expectations of the public market, analysts and investors.

Employee strikes and other labor-related disruptions may adversely affect our operations.

Our business depends on a large number of employees executing client operations. Strikes or labor disputes with our employees at our delivery centers may adversely affect our ability to conduct business. Our employees are not unionized, although they may in the future form unions. We cannot assure you that there will not be any strike, lock out or material labor dispute in the future. Work interruptions or stoppages could have a material adverse effect on our business, results of operations, financial condition and cash flows.

Failure to adhere to the regulations that govern our business could result in us being unable to effectively perform our services. Failure to adhere to regulations that govern our clients' businesses could result in breaches of contract with our clients.

Our clients' business operations are subject to certain rules and regulations such as the Gramm-Leach-Bliley Act, the Health Insurance Portability and Accountability Act and Health Information Technology for Economic and Clinical Health Act in the US and the Financial Services Act in the UK. Our clients may contractually require that we perform our services in a manner that would enable them to comply with such rules and regulations. Failure to perform our services in such a manner could result in breaches of contract with our clients and, in some limited circumstances, civil fines and criminal penalties for us. In addition, we are required under various Indian laws to obtain and maintain permits and licenses for the conduct of our business. If we fail to comply with any applicable rules or regulations, or if we do not maintain our licenses or other qualifications to provide our services, we may not be able to provide services to existing clients or be able to attract new clients and could lose revenue, which could have a material adverse effect on our business.

Our clients may terminate contracts before completion or choose not to renew contracts which could adversely affect our business and reduce our revenue.

The terms of our client contracts typically range from three to eight years. Many of our client contracts can be terminated by our clients with or without cause, with three to six months' notice and, in most cases, without penalty. The termination of a substantial percentage of these contracts could adversely affect our business and reduce our revenue. Contracts that will expire on or before March 31, 2012 (including work orders/statement of works that will expire on or before March 31, 2012 although the related master services agreement has been renewed) represent approximately 11% of our revenue and 18% of our revenue less repair payments from our clients in fiscal 2011. Failure to meet contractual requirements could result in cancellation or non-renewal of a contract. Some of our contracts may be terminated by the client if certain of our key personnel working on the client project leave our employment and we are unable to find suitable replacements. In addition, a contract termination or significant reduction in work assigned to us by a major client could cause us to experience a higher than expected number of unassigned employees, which would increase our cost of revenue as a percentage of revenue until we are able to reduce or reallocate our headcount. We may not be able to replace any client that elects to terminate or not renew its contract with us, which would adversely affect our business and revenue.

Some of our client contracts contain provisions which, if triggered, could result in lower future revenue and have an adverse effect on our business.

In many of our client contracts, we agree to include certain provisions which provide for downward revision of our prices under certain circumstances. For example, certain contracts allow a client in certain limited circumstances to request a benchmark study comparing our pricing and performance with that of an agreed list of other service providers for comparable services. Based on the results of the study and depending on the reasons for any unfavorable variance, we may be required to make improvements in the service we provide or to reduce the pricing for services to be performed under the remaining term of the contract. Some of our contracts also provide that, during the term of the contract and for a certain period thereafter ranging from six to twelve months, we may not provide similar services to certain or any of their competitors using the same personnel. These restrictions may hamper our ability to compete for and provide services to other clients in the same industry, which may result in lower future revenue and profitability.

Some of our contracts specify that if a change in control of our company occurs during the term of the contract, the client has the right to terminate the contract. These provisions may result in our contracts being terminated if there is such a change in control, resulting in a potential loss of revenue. Some of our client contracts also contain provisions that would require us to pay penalties to our clients if we do not meet pre-agreed service level requirements. Failure to meet these requirements could result in the payment of significant penalties by us to our clients which in turn could have an adverse effect on our business, results of operations, financial condition and cash flows.

We enter into long-term contracts with our clients, and our failure to estimate the resources and time required for our contracts may negatively affect our profitability.

The terms of our client contracts typically range from three to eight years. In many of our contracts, we commit to long-term pricing with our clients and therefore bear the risk of cost overruns, completion delays and wage inflation in connection with these contracts. If we fail to estimate accurately the resources and time required for a contract, future wage inflation rates or currency exchange rates, or if we fail to complete our contractual obligations within the contracted timeframe, our revenue and profitability may be negatively affected. Some of our client contracts do not allow us to terminate the contracts except in the case of non-payment by our client. If any contract turns out to be economically non-viable for us, we may still be liable to continue to provide services under the contract.

Our profitability will suffer if we are not able to maintain our pricing and asset utilization levels and control our costs.

Our profit margin, and therefore our profitability, is largely a function of our asset utilization and the rates we are able to recover for our services. An important component of our asset utilization is our seat utilization rate which is the average number of work shifts per day, out of a maximum of three, for which we are able to utilize our work stations, or seats. If we are not able to maintain the pricing for our services or an appropriate seat utilization rate, without corresponding cost reductions, our profitability will suffer. The rates we are able to recover for our services are affected by a number of factors, including our clients' perceptions of our ability to add value through our services, competition, introduction of new services or products by us or our competitors, our ability to accurately estimate, attain and sustain engagement revenue, margins and cash flows over increasingly longer contract periods and general economic and political conditions.

Our profitability is also a function of our ability to control our costs and improve our efficiency. As we increase the number of our employees and execute our strategies for growth, we may not be able to manage the significantly larger and more geographically diverse workforce that may result, which could adversely affect our ability to control our costs or improve our efficiency.

We have incurred losses in the past. We may not be profitable in the future and may not be able to secure additional business.

We incurred losses in each of the three fiscal years from fiscal 2003 through fiscal 2005. We expect our selling, general and administrative expenses to increase in future periods. If our revenue does not grow at a faster rate than these expected increases in our expenses, or if our operating expenses are higher than we anticipate, we may not be profitable and we may incur losses.

If we cause disruptions to our clients' businesses, provide inadequate service or are in breach of our representations or obligations, our clients may have claims for substantial damages against us. Our insurance coverage may be inadequate to cover these claims and, as a result, our profits may be substantially reduced.

Most of our contracts with clients contain service level and performance requirements, including requirements relating to the quality of our services and the timing and quality of responses to the client's customer inquiries. In some cases, the quality of services that we provide is measured by quality assurance ratings and surveys which are based in part on the results of direct monitoring by our clients of interactions between our employees and our client's customers. Failure to consistently meet service requirements of a client or errors made by our associates in the course of delivering services to our clients could disrupt the client's business and result in a reduction in revenue or a claim for substantial damages against us. For example, some of our agreements stipulate standards of service that, if not met by us, will result in lower payment to us. In addition, in connection with acquiring new business from a client or entering into client contracts, our employees may make various representations, including representations relating to the quality of our services, abilities of our associates and our project management techniques. A failure or inability to meet a contractual requirement or our representations could seriously damage our reputation and affect our ability to attract new business or result in a claim for substantial damages against us.

Our dependence on our offshore delivery centers requires us to maintain active data and voice communications between our main delivery centers in India, Costa Rica, the Philippines, Romania, Sri Lanka and the UK, our international technology hubs in the US and the UK and our clients' offices. Although we maintain redundant facilities and communications links, disruptions could result from, among other things, technical and electricity breakdowns, computer glitches and viruses and adverse weather conditions. Any significant failure of our equipment or systems, or any major disruption to basic infrastructure like power and telecommunications in the locations in which we operate, could impede our ability to provide services to our clients, have a negative impact on our reputation, cause us to lose clients, reduce our revenue and harm our business.

Under our contracts with our clients, our liability for breach of our obligations is generally limited to actual damages suffered by the client and capped at a portion of the fees paid or payable to us under the relevant contract. Although our contracts contain limitations on liability, such limitations may be unenforceable or otherwise may not protect us from liability for damages. In addition, certain liabilities, such as claims of third parties for which we may be required to indemnify our clients, are generally not limited under those agreements. Although we have professional indemnity insurance coverage, the coverage may not continue to be available on reasonable terms or in sufficient amounts to cover one or more large claims, and our insurers may disclaim coverage as to any future claims. The successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our business, reputation, results of operations, financial condition and cash flows.

We are liable to our clients for damages caused by unauthorized disclosure of sensitive and confidential information, whether through a breach of our computer systems, through our employees or otherwise.

We are typically required to manage, utilize and store sensitive or confidential client data in connection with the services we provide. Under the terms of our client contracts, we are required to keep such information strictly confidential. Our client contracts do not include any limitation on our liability to them with respect to breaches of our obligation to maintain confidentiality on the information we receive from them. We seek to implement measures to protect sensitive and confidential client data and have not experienced any material breach of confidentiality to date. However, if any person, including any of our employees, penetrates our network security or otherwise mismanages or misappropriates sensitive or confidential client data, we could be subject to significant liability and lawsuits from our clients or their customers for breaching contractual confidentiality provisions or privacy laws. Although we have insurance coverage for mismanagement or misappropriation of such information by our employees, that coverage may not continue to be available on reasonable terms or in sufficient amounts to cover one or more large claims against us and our insurers may disclaim coverage as to any future claims. Penetration of the network security of our data centers could have a negative impact on our reputation which would harm our business.

We may not succeed in identifying suitable acquisition targets or integrating any acquired business into our operations, which could have a material adverse effect on our business, results of operations, financial condition and cash flows.

Our growth strategy involves gaining new clients and expanding our service offerings, both organically and through strategic acquisitions. Historically, we have expanded some of our service offerings and gained new clients through strategic acquisitions. For example, we acquired Aviva Global in July 2008, BizAps in June 2008, Chang Limited in April 2008, and Flovate Technologies Limited, or Flovate (which we subsequently renamed as WNS Workflow Technologies Limited), in June 2007. In March 2008, we entered into a joint venture with Advanced Contact Solutions, Inc., or ACS, a provider in BPO services and customer care in the Philippines, to form WNS Philippines Inc. It is possible that in the future we may not succeed in identifying suitable acquisition targets available for sale or investments on reasonable terms, have access to the capital required to finance potential acquisitions or investments, or be able to consummate any acquisition or investments. The inability to identify suitable acquisition targets or investments or the inability to complete such transactions may affect our competitiveness and our growth prospects. In addition, our management may not be able to successfully integrate any acquired business into our operations or benefit from any joint ventures that we enter into, and any acquisition we do complete or any joint venture we do enter into may not result in long-term benefits to us. For example, if we acquire a company, we could experience difficulties in assimilating that company's personnel, operations, technology and software, or the key personnel of the acquired company may decide not to work for us. The lack of profitability of any of our acquisitions or joint ventures could have a material adverse effect on our operating results. Future acquisitions or joint ventures may also result in the incurrence of indebtedness or the issuance of additional equity securities and may present difficulties in financing the acquisition on attractive terms. Further, we may receive claims or demands by the sellers of the entities acquired by us on the indemnities that we have provided to them for losses or damages arising from any breach of contract by us. Conversely, while we may be able to claim against the sellers on their indemnities to us for breach of contract or breach of the representations and warranties given by the sellers in respect of the entities acquired by us, there can be no assurance that our claims will succeed, or if they do, that we will be able to successfully enforce our claims against the sellers at a reasonable cost. Acquisitions and joint ventures also typically involve a number of other risks, including diversion of management's attention, legal liabilities and the need to amortize acquired intangible assets, any of which could have a material adverse effect on our business, results of operations, financial condition and cash flows.

We recorded an impairment charge of \$15.5 million to our earnings in fiscal 2008 and may be required to record a significant charge to earnings in the future when we review our goodwill, intangible or other assets for potential impairment.

As at March 31, 2011, we had goodwill and intangible assets of approximately \$94.0 million and \$156.6 million, respectively, which primarily resulted from the purchases of Aviva Global, BizAps, Chang Limited, Flovate, Marketics Technologies (India) Private Limited, or Marketics, Town & Country Assistance Limited (which we subsequently rebranded as WNS Assistance) and WNS Global. Of the \$156.6 million of intangible assets as at March 31, 2011, \$151.2 million pertain to our purchase of Aviva Global. Under IFRS and US GAAP (prior to adoption of IFRS), we are required to review our goodwill, intangibles or other assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. In addition, goodwill, intangible or other assets with indefinite lives are required to be tested for impairment at least annually. We performed an impairment review and recorded an impairment charge of \$15.5 million to our earnings in fiscal 2008 relating to Trinity Partners. If, for example, the insurance industry experiences a significant decline in business and we determine that we will not be able to achieve the cash flows that we had expected from our acquisition of Aviva Global, we may have to record an impairment of all or a portion of the \$151.2 million of intangible assets relating to our purchase of Aviva Global. Although our impairment review of goodwill and intangible assets in fiscal 2011, 2010 and 2009 did not indicate any impairment, we may be required in the future to record a significant charge to earnings in our financial statements during the period in which any impairment of our goodwill or other intangible assets is determined. Such charges may have a significant adverse impact on our results of operations.

Our facilities are at risk of damage by natural disasters.

Our operational facilities and communication hubs may be damaged in natural disasters such as earthquakes, floods, heavy rains, tsunamis and cyclones. For example, during floods caused by typhoons in Manila, Philippines in September 2009, our delivery center was rendered inaccessible and our associates were not able to commute to the delivery center for a few days, thereby adversely impacting our provision of services to our clients. During the floods in Mumbai in July 2005, our operations were adversely affected as a result of the disruption of the city's public utility and transport services making it difficult for our associates to commute to our office. Such natural disasters may also lead to disruption to information systems and telephone service for sustained periods. Damage or destruction that interrupts our provision of outsourcing services could damage our relationships with our clients and may cause us to incur substantial additional expenses to repair or replace damaged equipment or facilities. We may also be liable to our clients for disruption in service resulting from such damage or destruction. While we currently have property damage insurance and business interruption insurance, our insurance coverage may not be sufficient. Furthermore, we may be unable to secure such insurance coverage at premiums acceptable to us in the future or secure such insurance coverage at all. Prolonged disruption of our services as a result of natural disasters would also entitle our clients to terminate their contracts with us.

Our largest shareholder, Warburg Pincus, is able to significantly influence our corporate actions, and may also enter into transactions that may result in a change in control of our company.

Warburg Pincus beneficially owns approximately 48.0% of our shares. As a result of its ownership position, Warburg Pincus has the ability to significantly influence matters requiring shareholder and board approval including, without limitation, the election of directors, significant corporate transactions such as amalgamations and consolidations, changes in control of our company and sales of all or substantially all of our assets. Actions that are supported by Warburg Pincus are very likely to be taken and the interests of Warburg Pincus may differ from the interests of other shareholders of our company.

A change in control or potential change in control transaction may consume management time and company resources and may have a material adverse impact on our business.

In July 2009, our Board of Directors received unsolicited offers from a few financial institutions and strategic investors to buy a majority or all of the ordinary shares of our company. While such offers or proposed sale may not result in the consummation of a change in control transaction, consideration and evaluation of such offers may consume management time and company resources and distract management's attention. Warburg Pincus, our largest shareholder who owns approximately 48.0% of our shares, may also seek to sell all or a substantial portion of its shareholding in our company, which may result in a change in control in our company. A potential change in control may cause uncertainty among our employees, our creditors and other stakeholders, and may thereby have a material adverse impact on our business. If a change in control transaction is consummated, many of our client contracts may entitle those clients to terminate the client contract with our company. Any of the foregoing events could have a material adverse effect on our business, results of operations, financial condition and cash flows, as well as cause our ADS price to fall.

We have certain anti-takeover provisions in our Articles of Association that may discourage a change in control.

Our Articles of Association contain anti-takeover provisions that could make it more difficult for a third party to acquire us without the consent of our Board of Directors. These provisions include:

- a classified Board of Directors with staggered three-year terms; and
- the ability of our Board of Directors to determine the rights, preferences and privileges of our preferred shares and to issue the preferred shares without shareholder approval, which could be exercised by our Board of Directors to increase the number of outstanding shares and prevent or delay a takeover attempt.

These provisions could make it more difficult for a third party to acquire us, even if the third party's offer may be considered beneficial by many shareholders. As a result, shareholders may be limited in their ability to obtain a premium for their shares.

It may be difficult for you to effect service of process and enforce legal judgments against us or our affiliates.

We are incorporated in Jersey, Channel Islands, and our primary operating subsidiary, WNS Global, is incorporated in India. A majority of our directors and senior executives are not residents of the US and virtually all of our assets and the assets of those persons are located outside the US. As a result, it may not be possible for you to effect service of process within the US upon those persons or us. In addition, you may be unable to enforce judgments obtained in courts of the US against those persons outside the jurisdiction of their residence, including judgments predicated solely upon the securities laws of the US.

We face competition from onshore and offshore business process outsourcing companies and from information technology companies that also offer business process outsourcing services. Our clients may also choose to run their business processes themselves, either in their home countries or through captive units located offshore.

The market for outsourcing services is very competitive and we expect competition to intensify and increase from a number of sources. We believe that the principal competitive factors in our markets are price, service quality, sales and marketing skills, and industry expertise. We face significant competition from our clients' own in-house groups including, in some cases, in-house departments operating offshore or captive units. Clients who currently outsource a significant proportion of their business processes or information technology services to vendors in India may, for various reasons, including diversifying geographic risk, seek to reduce their dependence on any one country. We also face competition from onshore and offshore business process outsourcing and information technology services companies. In addition, the trend toward offshore outsourcing, international expansion by foreign and domestic competitors and continuing technological changes will result in new and different competitors entering our markets. These competitors may include entrants from the communications, software and data networking industries or entrants in geographic locations with lower costs than those in which we operate.

Some of these existing and future competitors have greater financial, human and other resources, longer operating histories, greater technological expertise, more recognizable brand names and more established relationships in the industries that we currently serve or may serve in the future. In addition, some of our competitors may enter into strategic or commercial relationships among themselves or with larger, more established companies in order to increase their ability to address client needs, or enter into similar arrangements with potential clients. Increased competition, our inability to compete successfully against competitors, pricing pressures or loss of market share could result in reduced operating margins which could harm our business, results of operations, financial condition and cash flows.

We are incorporated in Jersey, Channel Islands and are subject to Jersey rules and regulations. If the tax benefits enjoyed by our company are withdrawn or changed, we may be liable for higher tax, thereby reducing our profitability.

As a company incorporated in Jersey, Channel Islands, we enjoy tax benefits that result in us not having to pay taxes in Jersey. In late 2009 it was reported that concerns had been raised by some members of the European Union's Economic and Financial Affairs Council, or ECOFIN, Code of Conduct group that the current tax regime for companies in Jersey, known as "zero-ten", could be interpreted as being outside the spirit of the EU Code of Conduct for Business Taxation, or the Code of Conduct. In the light of this, the Treasury and Resources Minister of the States of Jersey announced a review of business taxation in Jersey in his budget speech on December 8, 2009. In a review undertaken on January 31, 2011 by the EU Council's High Level Working Party on Tax issues, or HLWP, it was concluded that the personal tax provisions known as the "deemed distribution" and "attribution" rules were in fact a business tax measure, and were therefore within the scope of the Code of Conduct. On February 15, 2011, and in the light of the HLWP's conclusions, the States of Jersey announced that Jersey's business taxation regime known as "zero-ten" will remain in place but that, as part of its good neighbor policy, Jersey will abolish the deemed distribution and attribution rules with effect from January 1, 2012.

Representatives from Jersey met with the ECOFIN Code of Conduct group on September 13, 2011 to discuss Jersey's position on the harmful elements of the zero-ten regime. Jersey explained to the ECOFIN Code of Conduct group that legislation had been passed to abolish the deemed distribution and attribution rules with effect from January 1, 2012, thus removing the harmful elements of the zero-ten regime. The ECOFIN Code of Conduct group accepted Jersey's position and will now recommend to ECOFIN that Jersey has rolled back on the harmful tax measures and what now remains (the zero-ten tax rates) is compliant with the Code of Conduct. Accordingly, it is not anticipated that the way in which either we or our shareholders not resident in Jersey are taxed in Jersey will change (although ECOFIN still has to meet in December 2011 formally to ratify the ECOFIN Code of Conduct group's recommendations). We cannot assure you that following the meeting of ECOFIN or otherwise in the future, the current taxation regime applicable in Jersey will not be amended and render us liable for taxation.

Risks Related to Key Delivery Locations

A substantial portion of our assets and operations are located in India and we are subject to regulatory, economic, social and political uncertainties in India.

Our primary operating subsidiary, WNS Global, is incorporated in India, and a substantial portion of our assets and employees are located in India. We intend to continue to develop and expand our facilities in India. The Government of India, however, has exercised and continues to exercise significant influence over many aspects of the Indian economy. The Government of India has provided significant tax incentives and relaxed certain regulatory restrictions in order to encourage foreign investment in specified sectors of the economy, including the business process outsourcing industry. Those programs that have benefited us include tax holidays, liberalized import and export duties and preferential rules on foreign investment and repatriation. We cannot assure you that such liberalization policies will continue. Various factors, including a collapse of the present coalition government due to the withdrawal of support of coalition members or the formation of a new unstable government with limited support, could trigger significant changes in India's economic liberalization and deregulation policies and disrupt business and economic conditions in India generally and our business in particular. The Government of India may decide to introduce the reservation policy. According to this policy, all companies operating in the private sector in India, including our subsidiaries in India, would be required to reserve a certain percentage of jobs for the economically underprivileged population in the relevant state where such companies are incorporated. If this policy is introduced, our ability to hire employees of our choice may be restricted. Our financial performance and the market price of our ADSs may be adversely affected by changes in inflation, exchange rates and controls, interest rates, Government of India policies (including taxation policies), social stability or other political, economic or diplomatic developments affecting India in the future.

India has witnessed communal clashes in the past. Although such clashes in India have, in the recent past, been sporadic and have been contained within reasonably short periods of time, any such civil disturbance in the future could result in disruptions in transportation or communication networks, as well as have adverse implications for general economic conditions in India. Such events could have a material adverse effect on our business, on the value of our ADSs and on your investment in our ADSs.

If the tax benefits and other incentives that we currently enjoy are reduced or withdrawn or not available for any other reason, our financial condition would be negatively affected.

We have benefitted from, and continue to benefit from, certain tax holidays and exemptions in various jurisdictions in which we have operations.

For example, the majority of our Indian operations were eligible to claim income-tax exemption with respect to profits earned from export revenue from operating units registered under STPI. The benefit was available for a period of 10 years from the date of commencement of operations, but not beyond March 31, 2011. We had 13 delivery centers for the year ended March 31, 2011 eligible for the income tax exemption, which expired on April 1, 2011 for all the units. We incurred minimal income tax expense on our Indian operations in fiscal 2011 as a result of this tax exemption, compared to approximately \$13.6 million that we would have incurred if the tax exemption had not been available for the period. Effective April 1, 2011, upon the expiration of this tax exemption, income derived from our operations in India is subject to the annual tax rate of 32.45%. As a result, we expect our tax expense to materially increase in this fiscal 2012 and going forward.

Further, in 2005, the Government of India implemented the Special Economic Zones Act, 2005, or the SEZ legislation, with the effect that taxable income of new operations established in designated special economic zones, or SEZs, may be eligible for a 15-year tax holiday scheme consisting of a complete tax holiday for the initial five years and a partial tax holiday for the subsequent ten years, subject to the satisfaction of certain capital investment conditions. We have a delivery center located in Gurgaon, India registered under the SEZ scheme and eligible for 100% income tax exemption until fiscal 2012, and 50% income tax exemption from fiscal 2013 till fiscal 2022. During fiscal 2012, we have also started operations in delivery centers in Pune & Navi Mumbai, India registered under the SEZ scheme and eligible for 100% income tax exemption until fiscal 2016 and 50% income tax exemption from fiscal 2017 till 2026. The SEZ legislation has been criticized on economic grounds by the International Monetary Fund and the SEZ legislation may be challenged by certain non-governmental organizations. It is possible that, as a result of such political pressures, the procedure for obtaining the benefits under the SEZ legislation may become more onerous, the types of land eligible for SEZ status may be further restricted or the SEZ legislation may be amended or repealed. Moreover, there is continuing uncertainty as to the governmental and regulatory approvals required to establish operations in the SEZs or to qualify for the tax benefit. This uncertainty may delay our establishment of operations in the SEZ's. Further, the Government of India, pursuant to the Indian Finance Act, 2011, has levied minimum alternate tax, or MAT, on the profits earned by the SEZ units at the rate of 20.01%.

We have operations in Costa Rica and Philippines which are also eligible for tax exemptions which expire in fiscal 2017 and fiscal 2013, respectively. Our operations in Sri Lanka are also eligible for tax exemptions. We incurred minimal income tax expense on our Sri Lanka operations in fiscal 2011 as a result of the tax holiday, compared to approximately \$0.5 million that we would have incurred if the tax holiday had not been available for the period. The tax holiday our Sri Lankan subsidiary initially relied upon expired in fiscal 2011. However, the Government of Sri Lanka has exempted the profits earned from export revenue from tax. This enables our Sri Lankan subsidiary to continue to claim tax exemption under the Sri Lankan Inland Revenue Act following the expiry of the tax holiday.

We incurred minimal income tax expense on our operations in Sri Lanka and SEZ operations in India in the first six months of fiscal 2012 as a result of the tax holidays described above, compared to approximately \$0.6 million that we would have incurred if the tax holiday had not been available for the period.

When our tax holiday expires or terminates, or if the applicable government withdraws or reduces the benefits of a tax holiday that we enjoy, our tax expense will materially increase and this increase will have a material impact on our results of operations.

The applicable tax authorities may also disallow deductions claimed by us and assess additional taxable income on us in connection with their review of our tax returns.

We are subject to transfer pricing and other tax related regulations and any determination that we have failed to comply with them could materially adversely affect our profitability.

Transfer pricing regulations to which we are subject require that any international transaction among WNS and its subsidiaries, or the WNS group enterprises, be on arm's-length terms. We believe that the international transactions among the WNS group enterprises are on arm's-length terms. If, however, the applicable tax authorities determine the transactions among the WNS group enterprises do not meet arms' length criteria, we may incur increased tax liability, including accrued interest and penalties. This would cause our tax expense to increase, possibly materially, thereby reducing our profitability and cash flows.

We may be required to pay additional taxes in connection with audits by the Indian tax authorities.

From time to time, we receive orders of assessment from the Indian tax authorities assessing additional taxable income on us and/or our subsidiaries in connection with their review of our tax returns. We currently have a few orders of assessment outstanding that we believe could be material to our company given the magnitude of the claim. For example, in January 2009, we received an order of assessment from the Indian tax authorities that assessed additional taxable income for fiscal 2005 on WNS Global, our wholly-owned Indian subsidiary, that could give rise to an estimated ₹728.1 million (\$14.9 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹225.9 million (\$4.6 million based on the exchange rate on September 30, 2011). The assessment order alleges that the transfer price we applied to international transactions between WNS Global, one of our Indian subsidiaries, and our other wholly owned subsidiaries was not appropriate, disallows certain expenses claimed as tax deductible by WNS Global and disallows a tax holiday benefit claimed by us. We had disputed the said order of assessment before a first level Indian appellate authority. In November 2010, we received the order from the first level Indian appellate authority for fiscal 2005 deciding the issues in our favor. However, the order has been contested before higher appellate authorities by the Indian tax authorities.

In November 2009, we received a draft order of assessment for fiscal 2006 from the Indian tax authorities (incorporating a transfer pricing order that we had received in October 2009). We had disputed the draft order of assessment before Dispute Resolution Panel, or DRP, a panel set up by Government of India as an alternative to first appellate authority. In September 2010, we received the DRP order, as well as the order of assessment giving effect to DRP order, that assessed additional taxable income for fiscal 2006 on WNS Global that could give rise to an estimated ₹457.3 million (\$9.3 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹160.4 million (\$3.3 million based on the exchange rate on September 30, 2011). The assessment order involves issues similar to that alleged in the order for fiscal 2005. Further, in September 2010, we also received the DRP orders, as well as the orders of assessment giving effect to the DRP orders, relating to our certain other subsidiaries assessed for tax in India, that assessed additional taxable income for fiscal 2006 that could give rise to an estimated ₹273.2 million (\$5.6 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹95.4 million (\$1.9 million based on the exchange rate on September 30, 2011). The DRP orders as well as assessment orders allege that the transfer price we applied to international transactions with its related parties were not appropriate and taxed certain receipts claimed by us as not taxable. We have disputed these orders before higher appellate tax authorities.

In February 2011, we received the order of assessment for fiscal 2007 from the Indian tax authorities (incorporating a transfer pricing order that we had received in November 2010) that assessed additional taxable income on WNS Global that could give rise to an estimated ₹854.4 million (\$17.4 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹277.3 million (\$5.7 million based on the exchange rate on September 30, 2011).

We were granted a stay of demand by the Indian income tax authorities in respect of the remaining ₹660.6 million (\$13.5 million based on the exchange rate on September 30, 2011) in additional taxes after adjusting for the refund due to WNS Global for prior years which amounted to ₹124.5 million (\$2.5 million based on the exchange rate on September 30, 2011), rectification of the assessment order which amounted to ₹39.2 million (\$0.8 million based on the exchange rate on September 30, 2011) and taxes that have been paid by WNS Global which amounted to ₹30 million (\$0.6 million based on the exchange rate on September 30, 2011). Following the grant of the stay of demand, we paid additional taxes of ₹7.5 million (\$0.2 million based on the exchange rate on September 30, 2011).

In October 2011, we received a notice from the Indian income tax authorities revoking the stay of demand issued in respect of the assessment orders relating to WNS Global for fiscal 2007, and demanding payment of the pending tax amount. After consultation with our tax advisors, we have filed a writ petition with the Bombay High Court, requesting for a stay of demand. We have contested the assessment orders from the Indian tax authorities for fiscal 2007 before the higher appellate tax authorities, and intend to contest such notice as well.

Further, in February 2011, we also received the orders of assessment, relating to certain of our other subsidiaries assessed for tax in India, that assessed additional taxable income for fiscal 2007 that could give rise to an estimated ₹462.7 million (\$9.4 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹145.6 million (\$3.0 million based on the exchange rate on September 30, 2011). The orders of assessment involve issues similar to that alleged in the orders for fiscal 2005 and 2006. We have disputed the said orders of assessment before first level Indian appellate authorities. In September 2011, we received an order from the first level Indian appellate authorities granting part relief to one of our subsidiaries in respect of its disputed order of assessment. As a result of this order, the adjusted assessed additional taxable income for fiscal 2007 of our subsidiaries assessed for tax in India could give rise to an estimated ₹436.2 million (\$8.9 million based on the exchange rate on September 30, 2011) in additional taxes, including interest of ₹138 million (\$2.8 million based on the exchange rate on September 30, 2011).

Based on certain favorable decision from appellate authorities in previous years, certain legal opinions from counsel and after consultation with the Indian tax advisors, we believe that the chances of the aforementioned assessments, upon challenge, being sustained at the higher appellate authorities are remote and we intend to vigorously dispute the assessments and order. We have deposited a small portion of the disputed amount with the tax authorities and may be required to deposit the remaining portion of the disputed amount with the tax authorities pending final resolution of the respective matters.

In March 2009, we received an assessment order from the Indian Service Tax Authority demanding payment of ₹ 346.2 million (\$7.1 million based on the exchange rate on September 30, 2010) of service tax and penalty for the period from March 1, 2003 to January 31, 2005. The assessment order alleges that service tax is payable in India on BPO services provided by WNS Global to clients based abroad as the export proceeds are repatriated outside India by WNS Global. In April 2009, we filed an appeal to the appellate tribunal against the assessment order and the appeal is currently pending. After consultation with the Indian tax advisors, we believe the chances that the assessment would be upheld against us are remote. We intend to continue to vigorously dispute the assessment.

No assurance can be given, however, that we will prevail in our tax disputes. If we do not prevail, payment of additional taxes, interest and penalties may adversely affect our results of operations, financial condition and cash flows.

There can also be no assurance that we will not receive similar or additional orders of assessment in the future. See “Part II — Management’s Discussion and Analysis of Financial Condition and Results of Operations — Tax Assessment Orders” for more details on these assessments.

Terrorist attacks and other acts of violence involving India or its neighboring countries could adversely affect our operations, resulting in a loss of client confidence and materially adversely affecting our business, results of operations, financial condition and cash flows.

Terrorist attacks and other acts of violence or war involving India or its neighboring countries may adversely affect worldwide financial markets and could potentially lead to economic recession, which could adversely affect our business, results of operations, financial condition and cash flows. South Asia has, from time to time, experienced instances of civil unrest and hostilities among neighboring countries, including India and Pakistan. In previous years, military confrontations between India and Pakistan have occurred in the region of Kashmir and along the India/Pakistan border. There have also been incidents in and near India such as the bombings of the Taj Mahal Hotel and Oberoi Hotel in Mumbai in 2008, a terrorist attack on the Indian Parliament, troop mobilizations along the India/Pakistan border and an aggravated geopolitical situation in the region. Such military activity or terrorist attacks in the future could influence the Indian economy by disrupting communications and making travel more difficult. Resulting political tensions could create a greater perception that investments in Indian companies involve a high degree of risk. Such political tensions could similarly create a perception that there is a risk of disruption of services provided by India-based companies, which could have a material adverse effect on the market for our services. Furthermore, if India were to become engaged in armed hostilities, particularly hostilities that were protracted or involved the threat or use of nuclear weapons, we might not be able to continue our operations.

Restrictions on entry visas may affect our ability to compete for and provide services to clients in the US and the UK, which could have a material adverse effect on future revenue.

The vast majority of our employees are Indian nationals. The ability of some of our executives to work with and meet our European and North American clients and our clients from other countries depends on the ability of our senior managers and employees to obtain the necessary visas and entry permits. In response to previous terrorist attacks and global unrest, US and European immigration authorities have increased the level of scrutiny in granting visas. Immigration laws in those countries may also require us to meet certain other legal requirements as a condition to obtaining or maintaining entry visas. These restrictions have significantly lengthened the time requirements to obtain visas for our personnel, which has in the past resulted, and may continue to result, in delays in the ability of our personnel to meet with our clients. In addition, immigration laws are subject to legislative change and varying standards of application and enforcement due to political forces, economic conditions or other events, including terrorist attacks. We cannot predict the political or economic events that could affect immigration laws, or any restrictive impact those events could have on obtaining or monitoring entry visas for our personnel. If we are unable to obtain the necessary visas for personnel who need to visit our clients’ sites or, if such visas are delayed, we may not be able to provide services to our clients or to continue to provide services on a timely basis, which could have a material adverse effect on our business, results of operations, financial condition and cash flows.

If more stringent labor laws become applicable to us, our profitability may be adversely affected.

India has stringent labor legislation that protects the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes financial obligations on employers upon retrenchment. Though we are exempt from a number of these labor laws at present, there can be no assurance that such laws will not become applicable to the business process outsourcing industry in India in the future. In addition, our employees may in the future form unions. If these labor laws become applicable to our workers or if our employees unionize, it may become difficult for us to maintain flexible human resource policies, discharge employees or downsize, and our profitability may be adversely affected.

Risks Related to our ADSs

Substantial future sales of our shares or ADSs in the public market could cause our ADS price to fall.

Sales by us or our shareholders of a substantial number of our ADSs in the public market, or the perception that these sales could occur, could cause the market price of our ADSs to decline. These sales, or the perception that these sales could occur, also might make it more difficult for us to sell securities in the future at a time or at a price that we deem appropriate or pay for acquisitions using our equity securities. As at September 30, 2011, we had 44,603,519 ordinary shares outstanding, including 22,600,768 shares represented by 22,600,768 ADSs. In addition, as at September 30, 2011, there were options and RSUs outstanding under our 2002 Stock Incentive Plan and our Second Amended and Restated 2006 Incentive Award Plan to purchase a total of 2,908,652 ordinary shares or ADSs. All ADSs are freely transferable, except that ADSs owned by our affiliates, including Warburg Pincus, may only be sold in the US if they are registered or qualify for an exemption from registration, including pursuant to Rule 144 under the Securities Act of 1933, as amended, or the Securities Act. The remaining ordinary shares outstanding may be sold in the United States if they are registered or qualify for an exemption from registration, including pursuant to Rule 144 under the Securities Act.

The market price for our ADSs may be volatile.

The market price for our ADSs is likely to be highly volatile and subject to wide fluctuations in response to factors including the following:

- announcements of technological developments;
- regulatory developments in our target markets affecting us, our clients or our competitors;
- actual or anticipated fluctuations in our three monthly operating results;
- changes in financial estimates by securities research analysts;
- changes in the economic performance or market valuations of other companies engaged in business process outsourcing;
- addition or loss of executive officers or key employees;
- sales or expected sales of additional shares or ADSs;
- loss of one or more significant clients; and
- a change in control, or possible change of control, of our company.

In addition, securities markets generally and from time to time experience significant price and volume fluctuations that are not related to the operating performance of particular companies. These market fluctuations may also have a material adverse effect on the market price of our ADSs.

Holders of ADSs may be restricted in their ability to exercise voting rights.

At our request, the depository of the ADSs will mail to you any notice of shareholders' meeting received from us together with information explaining how to instruct the depository to exercise the voting rights of the ordinary shares represented by ADSs. If the depository timely receives voting instructions from you, it will endeavor to vote the ordinary shares represented by your ADSs in accordance with such voting instructions. However, the ability of the depository to carry out voting instructions may be limited by practical and legal limitations and the terms of the ordinary shares on deposit. We cannot assure you that you will receive voting materials in time to enable you to return voting instructions to the depository in a timely manner. Ordinary shares for which no voting instructions have been received will not be voted.

As a foreign private issuer, we are not subject to the proxy rules of the Commission, which regulate the form and content of solicitations by US-based issuers of proxies from their shareholders. The form of notice and proxy statement that we have been using does not include all of the information that would be provided under the Commission's proxy rules.

We may be classified as a passive foreign investment company which could result in adverse United States federal income tax consequences to US Holders.

Based on the current and anticipated valuation of our assets, including goodwill, and composition of our income and assets, we do not expect to be a passive foreign investment company, or PFIC, for US federal income tax purposes for our current taxable year or in the foreseeable future. However, we must make a separate determination each year as to whether we are a PFIC after the close of each taxable year. A non-US corporation will be considered a PFIC for any taxable year if either (i) at least 75% of its gross income is passive income or (ii) at least 50% of the value of its assets (based on an average of the quarterly values of the assets during a taxable year) is attributable to assets that produce or are held for the production of passive income.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunder duly authorized.
